**KILLS ROOTS!**

**In Sewers & Septic Systems**

- **Active Ingredient:** Copper Sulfate Pentahydrate
- **Net Wt.:** 2 lbs. (907 g)

**Keep Out of Reach of Children**

**DANGER:** CORROSIVE.

(See back panel for specific pesticidal use directions and state restrictions.)

**FIRST AID**

- **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
- **If inhaled:** Give plenty of fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth.
- **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**ENVIRONMENTAL HAZARDS:**

- This product is toxic to fish. Direct application of Copper Sulfate to water may cause a significant reduction in populations of aquatic invertebrates, plants, and fish. **STORAGE:** Store in original container and place in a locked storage area. **CONTAINER DISPOSAL:** Nonrefillable containers. Do not reuse or refill this container. **Handling:** Place in trash or offer for recycling, if available. If badly blocked, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**DIRECTIONS FOR USE:**

- **NON-AGRICULTURAL USE REQUIREMENTS:** The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, nurseries, or greenhouses. Applications and other handlers who handle this pesticide for any use NOT covered by the Worker Protection Standard (40 CFR Part 170) must wear: long-sleeved shirt, chemical-resistant gloves made of any waterproof material (such as polyvinyl chloride, nitrile rubber, or butyl rubber), shoes plus socks, and protective eyewear.

- **SEWER TREATMENT - ROOT DESTROYER**

  - **ROOT CONTROL IN SEPTIC TANK AND LEACH LINES AND LEACH LINE PIPES - SEPTIC TANKS:** Root control can be accomplished by pouring 2-6 pounds of Root Clear into a household sewer line by pouring about 1/2 pound increments into the toilet bowl nearest the sewer line and flush, repeat this process until the recommended dose has been added. Do not mix with other root control products; copper sulfate does not mix with the other root control products. Root Clear will settle in the septic tank itself and little will pass into the leach lines. To treat leach line pipes, add 2 to 6 pounds of Root Clear to the distribution box located between the septic tank and the leach lines. To achieve effective root control in the leach lines it is necessary to transfer Root Clear from the septic tank to the leach lines. A chemical pipe opener may need to be installed if the distribution box does not have an opening leading to the leach lines. *NOTE:* Do not apply Root Clear through sink or tub drains as it will corrode the metal drains.

**RAIDERS & DOMESTIC ANIMALS:**

- This product is toxic to fish. Direct application of Copper Sulfate to water may cause a significant reduction in populations of aquatic invertebrates, plants, and fish. **STORAGE:** Store in original container and place in a locked storage area. **CONTAINER DISPOSAL:** Nonrefillable containers. Do not reuse or refill this container. **Handling:** Place in trash or offer for recycling, if available. If badly blocked, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**In Sewers & Septic Systems:**

- **If in eyes:** Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue to rinse eye. Call a poison control center or doctor for further treatment advice.
- **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
- **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
