Carpenter Ant Control

Concentrate

Trusted Since 1926

BONIDE

House Guard

Kills Carpenter Ants and other wood infesting insects

Carpenter Bee

Termite

Active Ingredients:
- Permethrin (CAS No. 92947-07-7) 3.5%
- Other Ingredients 96.5%
- Total 100.0%
- EPA Reg. No. 4-MW-1
- EPA Reg. No. 4-505

Keep out of reach of children

Caution

See back panel for additional precautionary statements and first aid

Net Contents: 16 FL OZ (473 ML)

For residential use only

xxxxxxx
CARPENTER ANT CONTROL CONCENTRATE

CONTROLS: BEETLES (FURNITURE, DEATHWATCH, FALSE POWDERPOST, LONGHORNED, POWDERPOST), CARPENTER ANTS, CARPENTER BEES, AND TERMITES (INCLUDING DRYWOOD TERMITES)

USE ON: OUTSIDE OF BUILDINGS, PORCHES, WOODEN DECKS, AND PATIOS, WOODEN FENCES, WINDOW FRAMES, DOORWAYS, FOUNDATIONS, EAVES, GARAGES, GARBAGE AREAS AND OTHER AREAS WHERE YOU MAY FIND THESE PESTS.

MIX: 10 FL. OZ. WITH 1 GAL. WATER TO TREAT 100 SQ. FT. (READ AND FOLLOW LABEL INSTRUCTIONS)

APPLY: BY BRUSHING OR SPRAYING THE DILUTED SPRAY (READ AND FOLLOW LABEL DIRECTIONS)

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.

Store and transport in an upright position.

EPA Est. No. 4-NY-1 EPA Reg. No. 4-408

Family made in America

Pint
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for use on plants being grown for sale or for other commercial use, or for commercial seed production or for research purposes.

Do not water the treated area to the point of run-off. Do not make applications during rain. All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:
(1) Treatment to soil or vegetation around structures;
(2) Applications to lawns, turf, and other vegetation;
(3) Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only. Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
Use a clean sprayer. Carefully measure and mix the amount of concentrate and water as directed. Spray as directed. Thorough coverage is important. Flush sprayer with clean water after each use. Make applications when insects first appear. Repeat applications as directed. See directions for complete insect list. People and pets should not be allowed in treated areas until spray has dried.

Use dilution rates as indicated.
1 fl. oz = 6 tsp. or 2 Tbsp.
8 fl. oz = ½ pt. or 1 cup

**WOOD-INFESTING INSECTS (including termites)**

For Beetles (Furniture, Deathwatch, False Powderpost, Longhorned, Powderpost), Carpenter Ants (and other wood-infesting ants), Carpenter Bees and termites (including drywood termites): Treat outside of buildings, porches, wooden decks, and patios, wooden fences, window frames, doorways, foundations, eaves, garages, garbage areas and other areas where you may find these pests.

Mix 10 fl. oz with 1 gal. of water to treat 100 sq. ft. Spray infested surfaces thoroughly to a height of 3 feet, avoiding dripping and runoff. Apply evenly on wood surfaces. To treat small areas, apply as a spot or crack-and-crevice treatment by brushing or spraying the diluted spray. For large areas, use a coarse, low pressure spray. Repeat treatment as needed to maintain effectiveness. Do not spray into electrical outlets or utilities.
Spray infested areas and areas likely to be infested, such as wood surfaces, voids and channels in damaged wood, spaces between wooden parts of structure, and between wood and foundations where infestation is likely to occur. Also spray around fence posts, wood piles (do not use on firewood) and tree stumps.

Suitable protective clothing should be worn in confined or overhead areas to prevent exposure to eyes and skin. The use of eye protection, protective head covering, chemical resistant gloves and footwear, a long-sleeved shirt and long pants or coveralls are recommended. Do not permit contact with treated surfaces until spray has dried. Treated confined areas, such as detached garages, under porches and decks, should be ventilated during and immediately following application before the areas are re-occupied.

For carpenter ants, spray around doors and windows and other places where ants may enter or crawl and hide. Also treat cracks and crevices or openings into wall voids or other areas where these ants may be present.

For carpenter bees, spray or inject into holes and tunnels already made by the bees with a tank sprayer, and spray areas where they are beginning to build tunnels into the wood.
For termites* (including drywood termites), treat as for other wood-infesting insects. This product will kill workers and winged reproductive forms of termites in the treated areas. Re-treat as needed to maintain effectiveness. Do not exceed 24 applications per year.

*USE OF THIS TYPE OF PRODUCT TO CONTROL TERMITES SHOULD NOT BE CONSIDERED A SUBSTITUTE FOR SOIL TREATMENT OF SUBTERRANEAN TERMITES DONE BY A PROFESSIONAL PEST CONTROL OPERATOR.

**FIRE ANT CONTROL**

Individual Mound and Plant Container Treatment
Mix 2 fl. oz. in 3 gals. water and apply as a drench using a sprinkler can. Gently apply 1 gallon of the mixture over the surface of each mound. Thoroughly wet mound and surrounding area of 3x4 ft. (12 sq. ft.) For best results apply in cool weather 65°F-80°F, early or late in the day. Treat new mounds as they appear. Pressurized sprays may disturb ants and cause migration which will reduce product effectiveness. Use the same method as above for the control of Fire Ants that may nest in permanently placed containerized ornamentals plants.
STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage and disposal. 

**Storage:** Store and transport in an upright position. Store in original container in a cool, dry area away from heat or open flame.

**Disposal:** If empty - Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled - Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**If inhaled:**
Move person to fresh air.
If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
Call a poison control center or doctor for further treatment advice.

**If on skin or clothing:**
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes.
Call a poison control center or doctor for treatment advice.

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**CAUTION:** May be harmful if swallowed or absorbed through skin. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.
Environmental Hazards

This pesticide is extremely toxic to fish. Avoid contamination of ornamental fish ponds. Drift and runoff from treated areas may be hazardous to fish and aquatic organisms in adjacent waters. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.
