For use only by federal, state, tribal, or local government officials responsible for public health or vector control, or by persons certified in the appropriate category or otherwise authorized by the state or tribal lead pesticide regulatory agency to perform adult mosquito control applications, or by persons under their direct supervision.

This product is Ready-To-Use, Quick Knockdown, Low Odor, Non-Corrosive Synergized Synthetic Pyrethroid for Control of Adult Mosquitoes, Biting and Non-Biting Midges, Black flies and other outdoor flying insects as listed on this label which cause Public Health Annoyance in Residential, Municipal and Recreational Areas.

This product will not dilute with water.

READ ENTIRE LABEL BEFORE USING READY-TO-USE

ACTIVE INGREDIENTS:
*Permethrin .................................. 4.0%
**Piperonyl Butoxide Technical .................. 4.0%
OTHER INGREDIENTS**.............................. 92.0%
Total.............................................................. 100.0%

**Dichlorophenylmethyl-k(+)-cis-trans 3,2,2-Dichloroethenyl-2,2-Dimethyl cyclopropane carboxylate cis/trans ratio: min. 35.5% (+/-) cis and max. 65.5% (+/-) trans.
**Equivalent to 80% (butylinphyl-k(+)-piperonyl) ether and 20% related compounds.
** Contains a petroleum distillate solvent
Contains 0.29 pounds of Permethrin and 0.29 pounds of Piperonyl Butoxide per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION
Si usted no entienda la etiqueta, busque a alguien que se le explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail).

IF SWALLOWED:
Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF IN EYES:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED:
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further advice.

HOT LINE NUMBER: Have this product container or label with you when calling a poison control center or doctor or when going for treatment. You may also call 1-800-858-7738 for emergency medical treatment advice.

NOTE TO PHYSICIAN: Solvent presents an aspiration hazard. Gastric lavage is indicated if material was taken internally. Vomiting may cause aspiration pneumonia.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Causes moderate eye irritation. Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or the toilet. Prolonged or repeated skin contact may cause allergic reactions in some individuals. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. Runoff from treated areas or deposition of spray droplets into a body of water may be hazardous to aquatic organisms and aquatic invertebrates. Do not apply over bodies of water (lakes, rivers, permanent streams, natural ponds, commercial fish ponds, swamps, marshes or estuaries), except when necessary to target areas where adult mosquitoes are present and weather conditions will facilitate movement of applied material away from the water in order to minimize incidental deposition into the water body. Do not contaminate bodies of water when disposing of equipment rinsate or washwaters.

Bee Warning: This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply to blooming crops or weeds while bees are visiting the treatment areas, except when applications are made to prevent or control a threat to public and/or animal health determined by a state, tribal or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

PHYSICAL AND CHEMICAL HAZARDS
Do not use, pour, spill, or store near heat or open flame

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

WHEN TO APPLY
Note: Before making the first application in a season, it is advisable to consult with the state or tribal agency with primary responsibility for pesticide regulation to determine if other regulatory requirements exist.

FOR BEST RESULTS treat when mosquitoes or insects are most active and weather conditions are conducive to keeping the fog near the ground such as cool temperatures, and consistent wind speeds are not greater than 10 m.p.h. Apply when wind speed is greater or equal to 1 mph. Applications during the cool hours of night or early morning are usually preferable. Do not apply when air temperature is below 50°F. Do not retreat the same site more than once in 12 hours. Do not apply more than 0.18 lbs. of permethrin per acre per year to any site. More frequent treatments may be made to prevent or control a threat to public and/or animal health determined by a state, tribal or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

RATES CHART FOR EVOLVER 4-4 ULV USE, UNDILUTED

| Permethrin | PBO | Application Rates | Fluid Ounces per Minute at MPH | Fluid Ounces and (milliliters) |
| a.i./Acre | a.i./Acre | | | |
| 5 MPH | 10 MPH | 15 MPH | 20 MPH | Per Acre |
| 0.007 | 0.007 | 9.40 | 18.80 | 28.20 | 37.60 | 3.10 (91.7 mil) |
| 0.0035 | 0.0035 | 4.70 | 9.40 | 14.10 | 18.80 | 1.55 (45.9 ml) |
| 0.0075 | 0.0075 | 2.35 | 4.70 | 7.05 | 9.40 | 0.78 (22.9 ml) |
| 0.001 | 0.001 | 1.34 | 2.69 | 4.03 | 5.37 | 0.44 (13.1 ml) |

1 to 1 Dilution Rates for EVOLVER 4-4 ULV

MIX 1 PART EVOLVER 4-4 ULV WITH 1 PART OF A SUITABLE MINERAL OIL. APPLY AS FOLLOWS:

| Permethrin | PBO | Application Rates | Fluid Ounces per Minute at Vehicle Speeds | Fluid Ounces and (milliliters) Finished Spray |
| a.i./Acre | a.i./Acre | | | |
| 5 MPH | 10 MPH | 15 MPH | 20 MPH | Per Acre |
| 0.007 | 0.007 | 19.80 | 37.60 | 56.40 | 75.20 | 6.20 (183.3) |
| 0.0035 | 0.0035 | 9.40 | 18.80 | 28.20 | 39.57 | 3.10 (91.7 ml) |
| 0.0075 | 0.0075 | 4.70 | 9.40 | 14.10 | 18.80 | 1.55 (45.9 ml) |
| 0.001 | 0.001 | 2.70 | 5.37 | 8.06 | 10.74 | 0.90 (26.6 ml) |

HOW TO APPLY
Ground Application: Spray equipment must be adjusted so the volume median diameter is less than 20 microns (Dv 0.5 < 20 µm) and that 90% of the spray is contained in droplets smaller than 48 microns (Dv 0.9 < 48 µm). Directions from the equipment manufacturer or vendor, pesticide registrant or a test facility using a laser-based measurement instrument must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rate(s) are properly calibrated.

Aerial Application: Spray equipment must be adjusted so the volume median diameter produced is less than 60 microns (Dv 0.5 < 60 µm) and that 90% of the
spray is contained in droplets smaller than 115 microns (0.0 < 0.115 mm). Directions for the equipment manufacturer or vendor must state that the same hazard precautions should be taken in applying this product as would be used when applying the same product using a wind tunnel and laser-based measurement instrument must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rate(s) are properly calibrated. For proper ground application equipment, the nozzle is at least 4 to 1 feet above the ground level and directed out of the back of the vehicle. Failure to follow the label directions may result in reduced effectiveness. See the "Aerial Application" section on this label. AllPro EVOLVER 4-4 ULV may be used as, or diluted with a suitable solvent such as 60 to 100 Second viscosity mineral oil and applied at a rate not to exceed 3.0 l/1000 ft² of AllPro EVOLVER 4-4 ULV per acre. For exact rates, see the "Undiluted" or the "1 to 1 Dilution" rate charts on this label.

AllPro EVOLVER 4-4 ULV is recommended for application as an Ultra Low Volume (ULV) Thermal or Non-Thermal aerosol (cold fog) to control adult mosquitoes, and other insects as listed on this label, in residential and recreational areas where these insect pests become a problem; such as, but not limited to parks, campgrounds, woodlands, athletic fields, golf courses, residential areas, municipalities, gardens, playgrounds, and non-crop waste areas.

AllPro EVOLVER 4-4 ULV can be applied over specific growing crops and range grasses prior to harvest for the control of adult mosquitoes and biting flies within or adjacent to these areas. Application can only be made where the following crops are present.

Alfalfa
Corn, grain (field and pop)
Apples
Artichoke, globe
Asparagus
Avocados
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celery
Cherries (except Brassaica)
Corn, Forage
Corn, fodder
Onions, dry bulb
Peaches
Pears
Pineapples, bell peppers
Plums
Potato
Range Grasses
Soybeans
Spinach
Tomatoes
Vegetables,
cucurbit
Walnuts
Watercress

Do not apply spray treatment to drift on crop land (other than crops listed) or water supplies. In treatment of curculios, feedlings, animal confinement houses, swine lots and zoos, never apply any exposed drinking water, drinking fountains and animal feed before application.

GROUNDL ULV NON-THERMALAESROSOL (COLD FOG) APPLICATIONS
To control mosquitoes, midges and black flies, apply AllPro EVOLVER 4-4 ULV using any standard ULV ground applicator capable of producing a non-thermal aerosol fog and base all application calculations on the equipment manufacturer's recommended swath width.

When applying this product undiluted, apply at a flow rate of 2.69 to 18.80 ounces per minute at an average vehicle speed of 10 mph. These rates are equivalent to 0.001 to 0.007 pound of permethrin a.i. and 0.001 to 0.007 pound of piperonyl butoxide a.i. per acre. If diluted, adjust the speed accordingly. Vary flow rates accordingly to vegetation density and mosquito population. Use higher flow rates in heavy vegetation or when insect populations are high. An aerosol fog control system must be used to ensure proper flow rate. AllPro EVOLVER 4-4 ULV may also be applied by diluting 1 part to 1 part of a 60 to 100 second mineral oil or another suitable solvent applies so as not to exceed the maximum a.i. rates as per above in the rates charts. If an alternative rate is required, adjust the flow rate accordingly, provided the droplet size and spectrum remain within the label specifications. Do not exceed a flow rate of 20 oz. per minute. Consult your local equipment manufacturers and/or Public Health Officials when undiluted or diluted 1 to 1, and high vehicle speeds of 10 mph, 15 or 20 mph are necessary in emergency conditions, and when fogging equipment is capable of such higher rates of output per minute.

THERMAL AEROSOL FOGGING

TRUCK MOUNTED: Apply AllPro EVOLVER 4-4 ULV undiluted or diluted with suitable Thermal Fogging equipment. Droplet size of thermal "fog" will range 0.1 to 1 micron. If diluted use a 60 to 100 second viscosity mineral oil, or another suitable non-phytotoxic diluent to reduce oil requirements and reduce build up in equipment. Do not exceed the maximum rates. May be applied at speeds of 5 mph up to 20 mph.

HAND CARRIED and/or LAWN MOVER FOGGERS: Use the same rates of a.i. per acre with a 50 foot swath width at a walking speed of 2 mph. Do not fog to wet foliage. Only use a clean, well maintained, and properly calibrated fogger, known to give excellent performance. Fog downward. Apply AllPro EVOLVER 4-4 ULV to deliver 0.001 to 0.007 pound of permethrin a.i. per acre and 0.001 to 0.007 pound of piperonyl butoxide a.i. per acre.

USE AS AN INSECT BARRIER TREATMENT
For use in Non-Thermal ULV, motorized, portable backpack fog type mist blowers equipment, apply AllPro EVOLVER 4-4 ULV with equipment adjusted to deliver ULV particles of 50 to 100 volume median diameter. AllPro EVOLVER 4-4 ULV may be applied undiluted or diluted (see application rate charts on this label). If diluted, use a 30 to 100 second viscosity mineral oil, or another (if recommended by the equipment manufacturer) non-phytotoxic diluent. Use 0.001 to 0.007 pound of permethrin a.i. per acre at a speed of 2 mph (3.2 kph). Whether applied undiluted or diluted, or at a different ULV flow rate, the recommended label rate of 0.001 to 0.007 lb. of permethrin a.i. and piperonyl butoxide a.i. is applied per acre.

When this product is applied as a barrier application using low pressure hand sprayers, hydraulic sprayers or ground ULV equipment, do not apply within 100 feet (30 meters) of lakes and streams.

AERIAL APPLICATION
Aerial application with ULTRA LOW VOLUMES of AllPro EVOLVER 4-4 ULV may be applied at rates not to exceed 1.0 cubic foot per acre. This product should be applied at the label rate of 0.001 to 0.007 lb. of permethrin a.i. and 0.001 to 0.007 lb. piperonyl butoxide a.i. per acre.

IN FLORIDA: Do not apply by aircraft unless approved by the Florida Department of Agriculture and Consumer Services.

STORAGE & DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage and Spill Procedures: Store under roof or in a secure area. Avoid exposure to extreme temperatures. In case of spill or leakage, soak up with an absorbent material such as sand, sawdust, earth, fuller's earth, etc. Dispose of with chemical waste.

Pesticide Disposal: Pesticide, spray mixture or rinse water that cannot be used according to label instructions must be disposed of at or by an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill the container. Do not reuse or refill a container. Triple rinse and store containers in an approved, secure, and leak-proof container. Do not use the contents of a container for ground ULV applications.

Container 5 gallons or less in capacity: Do not reuse or refill this container. Triple rinse and store containers in an approved, secure, and leak-proof container. Do not use the contents of this container for ground ULV applications.

Containers greater than 5 gallons in capacity: Empty the remaining contents into an approved application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill container 1/4 full with mineral oil in the container and recap. Shake for 10 seconds. Pour in to an application equipment or a mix tank at storage space for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Containers greater than 5 gallons in capacity: Empty the remaining contents from the equipment or a mix tank. Fill the container 1/4 full with mineral oil in the container and recap. Shake for 10 seconds. Pour in to an application equipment or a mix tank at storage space for later use or disposal. Drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank and collect rinse for later use or disposal. Insert pressure-rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

READ ENTIRE LABEL BEFORE USING
Read the entire Directions for Use, Conditions, Disclaimer of Warranties, and Limitation of Liability before using this product. By using this product, User and Buyer accept the following Conditions, Disclaimer of Warranties and Limitation of Liability:

CONDITIONS: The Directions for Use of this product are believed to be adequate and should be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Value Garden Supply.
