STORAGE AND DISPOSAL
Store in a secure, well-ventilated area protected from extreme temperatures. Do not transfer to unmarked containers. Keep container closed when not in use. Non-refillable. Do not reuse container.

If empty: Offer for recycling if available. If not, place in trash.
If partially filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Causes moderate eye irritation. Harmful if inhaled, swallowed or absorbed through skin. Avoid contact with eyes, skin or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic invertebrates and may contaminate water through runoff. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Outlast®
Q®Log Oil®

Water Repellent Wood Preservative

*End-Cut Solution/Stain * Semi-transparent color and DECAY CONTROL FOR: Log Homes* Wood Roofs * Wood Decks * Siding

Manufactured for:
CTA Products Group
1899 King’s Castle Dr. Southaven, MS 38671
Phone: 662-536-1446 Toll Free: 877-536-1446
www.OutlastCTA.com Info@OutlastCTA.com
EPA Reg. No. 81819-1

ACTIVE INGREDIENT:
Copper 8-quinolinolate: 0.675%
OTHER INGREDIENTS*: 99.325%
TOTAL: 100.000%
*Contains petroleum distillates. Contains Metallic equivalent of Copper.
EPA Est. No. 45326-AR-1

KEEP OUT OF REACH OF CHILDREN
CAUTION
See other panels for additional precautions

Net Contents: 1 Gallon
LIMITED WARRANTY AND DISCLAIMER

CTA Products Group warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use. Buyer assumes all risks of use and handling not in strict accordance with the directions provided in this label. CTA Products Group makes no other express or implied warranty of fitness or by state law, neither CTA Products Group nor the seller shall be liable for damages resulting from the directions provided in this label. Buyer and user accept it, subject to the following notice: Limited Warranty and Disclaimer, which is an extension by a duly authorized representative of CTA Products Group.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

Q8® Log Oil is an oil based semi-transparent preservative designed for log homes, wood siding, roofing, decks, doors and fences. Q8® Log Oil is also effective on greenhouse items, fruit and vegetable boxes, and other farm uses and is especially effective on wood surfaces in close proximity to animals, feedstuffs and similar sites.

Q8® Log Oil's oil formula penetrates deep into wood providing long-term protection, on rough sawn lumber, old weathered wood and new porous wood where maximum penetration results in exceptional water repellency on sloping roofs and vertical surfaces. Q8® Log Oil combines decay and mold control with unique and exceptional water repellency that withstands vertical weathering, particularly on old, cracked, weathered wood.

Q8® Log Oil will never chip, crack or peel. When applied as directed, it leaves a uniform, streak-free appearance without lap marks and brushmarks. Do not apply to non-porous or film-covered surfaces that prevent or significantly retard penetration. Remove previous coatings prior to application of Q8® Log Oil. In addition to protecting and extending service life by inhibiting decay and mold, Q8® Log Oil is toxic to termite and wood-eating beetles. Make a single coat application every 2 to 4 years on vertical surfaces. Annual retreatment may be required to maintain water repellency for harsh exposures involving standing water, such as horizontal surfaces, decks, window sills, etc. When making applications, always apply to the point of refusal. Double coating application is not required. Q8® Log Oil may be cleaned up with water and detergent at the time of application. Provided it has not soaked into the surface. Cured Q8® Log Oil will clean up with paint thinner or mineral spirits. Q8® Log Oil temporarily darkens the wood color and lightens to the selected semi-transparent color tone selected as it cures. Exact color is dependent upon the base color of the original wood.

For Best Results: Stir or shake well prior to use. Do not apply Q8® Log Oil if rain is expected within 36 hours of application. Apply Q8® Log Oil to the wood until the wood stops absorbing the product. Unabsorbed liquid still standing after 15 minutes on walk surfaces of decks and other horizontal surfaces must be mopped up thoroughly prior to use. Do NOT WALK on decks until the liquid is absorbed and the surface is no longer slippery. Apply when temperatures are above 65°F when possible; the warmer the weather, the faster the drying. Below 65°F, Q8® Log Oil may become too viscous to spray, but can easily be applied by brush or roller in lower temperatures. To assure expected results on smooth and / or dense wood, test on a small area before use.

Avoid contact of Q8® Log Oil with asphalt as asphalt softening will occur. Avoid contact of Q8® Log Oil with vegetation (such as grass, shrubs, or trees) or damage to the plants may occur. Do not use Q8® Log Oil on painted or otherwise treated surfaces as paint must penetrate the surface to be effective. Avoid open flame during application and until Q8® Log Oil has soaked in completely. Avoid using Q8® Log Oil on wood in contact with chlorine, or treat as necessary.

General Information: One gallon of Q8® Log Oil will cover approximately 150 to 300 sq. ft. depending on surface condition and wood porosity. The final appearance of wood finished with Q8® Log Oil is considerably lighter than when first applied. Q8® Log Oil is normally cured 2 weeks after application. Final cure time depends on temperature and wood porosity. Q8® Log Oil provides an immediate water repellent barrier, however, its ability to harden water develops during the curing process. Until Q8® Log Oil has thoroughly cured, treated surfaces may be slippery. Surfaces may be retreated when they show signs of losing water repellency.

APPLICATION INSTRUCTIONS

Surfaces to be treated must be clean and free of all loose debris, dirt, grease, oil, mildew and mold. For maximum penetration and fastest drying, apply to dry wood. Q8® Log Oil can be applied to damp wood, but expect reduced performance. Apply one coat of Q8® Log Oil liberally to the surfaces to be treated by wetting down the surface as follows:

Spray—Using pump-up garden type spray equipment, set the sprayer nozzle to deliver a coarse, low pressure spray, and backbrush as needed. Roller and Brush applications are suitable if applied to the point of refusal. Pump—spray applications are preferred when possible.

FIRST AID

If in eyes:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed:
Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If on skin or clothing:
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If inhaled:
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact InfoTec 800-635-5953 for emergency medical treatment information.

NOTE TO PHYSICIAN

Contains petroleum distillate—vomiting may cause aspiration pneumonia.
