**SKIDO® INSTITUTIONAL FLYING INSECT KILLER**

Contains the botanicalspyrethrum. It provides fast, effective control and repellency of the listed pests. Skidoo Institutional Flying Insect Killer can be used to control rodents and other listed areas to kill, on contact, listed pests and in a safe, effective product for flying insect control. Effectively controls exposed stages of stored product pests without persistent residue problems, because it breaks down quickly on treated surfaces exposed to light.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read all directions completely before use. For best results, follow directions for specific use areas. **SHAKE BEFORE USE AND AT INTERVALS DURING PROLONGED USE.** Hold container upright with nozzle facing away from body. Never allow container to freeze. Shake vigorouly before use. Apply in an area where no children or pets can enter. Apply in a manner to prevent damage to ornamental plants or treated surfaces. Do not allow pressure to escape during application. **CONTRAINDICATED FOR USE ON FOOD OR NONFOOD AREAS OF FOOD PROCESSING PLANTS, INDUSTRIAL INSTALLATIONS, BREEDING, Poultry Houses, and other listed areas.** For targeted use of insects, flies, stable flies, horse flies, oriental flies, horn flies, lesser house flies, lesser house flies, deer flies, horn flies, and black flies, spray the area at 4-10” intervals over 100 cubic feet of space, directing the spray toward the ceiling and upper corners of the room and then directly toward the animal or bugs. For bed bugs, place doors and hardware if possible, barrier screens and leave doors closed for 1-2 hours. Applicator should vacate the treated area and ventilate it prior to returning. **SPACE TREATMENT NEEDS FOR USE IN FOOD AND NON-FOOD AREAS OF FOOD PROCESSING PLANTS, INDUSTRIAL INSTALLATIONS, BREEDING, Poultry Houses, and other listed areas:** For targeted use of insects, flies, stable flies, horse flies, oriental flies, horn flies, lesser house flies, lesser house flies, deer flies, horn flies, and black flies, spray the area at 4-10” intervals over 100 cubic feet of space, directing the spray toward the ceiling and upper corners of the room and then directly toward the animal or bugs. For bed bugs, place doors and hardware if possible, barrier screens and leave doors closed for 1-2 hours. Applicator should vacate the treated area and ventilate it prior to returning.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. **SOIL CONTAMINATION:** If material adheres to soil, it is very likely to remain in the ground. **CAUTION:** Material is not biodegradable. Never allow container to freeze. Shake vigorously before use. Application may be used where food is handled. **FIRST AID**

**INHALATION:** Remove to fresh air if not breathing. **IF SWALLOWED:** Do not induce vomiting unless told to do so by a poison control center or doctor.
