GUARANTEED ANALYSIS

Total Nitrogen (N) 15.00% 1.17% Ammoniacal Nitrogen
13.83% Urea Nitrogen* Available Phosphoric Acid (P2O5) 3.00%
Soluble Potash (K2O) 5.00%

Derived From: Di ammonium Phosphate, Murate of Potash, Polymer Coated Urea, Urea

*3.00% Slowly Available Urea Nitrogen From Polymer Coated Urea

Chlorine (Cl), not more than 6.00%

F315 FG#49971

GUARANTEED HEDGEROW COMBINATION WHICH CONTROLS A WIDE SPECTRUM OF BROADLEAF WEEDS WHILE PROVIDING BOTH FERTILIZER AND HERBICIDE ACTION. CONTAINS 2,4-D, MECOPROP-P AND DICAMBA

50 LBS: CONTAINS 50# 2,4-D AND MECOPROP-P (HORMONAL HERBICIDES) COMBINED WITH 20# DCON MAP UREA (NITROGEN FERTILIZER). FORMULATION: 34% 2,4-D 4% MECOPROP-P 0.07% 3,6-DICHLORO-O-FENILACETIC ACID

FERTILIZER COMBINATION WHICH CONTROLS A WIDE SPECTRUM OF BROADLEAF WEEDS WHILE PROVIDING BOTH FERTILIZER AND HERBICIDE ACTION. CONTAINS 2,4-D, MECOPROP-P AND DICAMBA

The following LAWN NUTRITION compatible with this product:

SUGGESTIONS FOR USE:

HOW TO APPLY: For optimal results (1) Avoid mowing 1 to 2 days before and after application; (2) Apply when grass is moist (after a rain or sprinkling) or dew; (3) Avoid applying at 100°F or above; and at 50°F or below. Contact your local extension agent or registered retail dealer for application advice if rainfall is expected within 48 hours following treatment. Possible re-treatment in approximately 30 days may be necessary if lawn is heavily infested with weeds or if adverse low moisture conditions persist and weeds are in a state of poor growth. Do not exceed recommended rates because damage to turf may occur.

NOTE: When applying to Southern Grasses - under conditions of inadequate moisture, high temperature and high humidity, over-application may cause minor transitory discoloration on Centipedes and St. Augustin grasses. It is recommended that during hot, dry conditions, application rates should be reduced 50% to avoid possible denitrification or browning of grass. HOW TO APPLY: This 50 pound bag should be used on 12,500 square feet. Apply evenly with a lawn spreader as a one pass application. A two pass application may be cross-cropped at right angles to the first application. The second application should be made within 5 to 10 days after the first application. Limitations: The maximum rate per application is 4 pounds per 1,000 square feet, limited to 2 applications per year. The maximum seasonal rate is 8 pounds per 1,000 square feet, not to exceed 30 days between applications.

This product is designed to promote lush green growth in lawns and controls many broadleaf weeds such as:

This product is registered for use on Ornamental Herbicide and Turf Food Combination which controls a wide spectrum of broadleaf weeds while providing both fertilizer and herbicide action. Contains 2,4-D, Mecoprop-P and Dicamba. Distributed for: Viper, Inc.
