PROCON-Z™

FUNGICIDE

Broad spectrum and systemic disease control for turf and ornamentals.

ACTIVE INGREDIENT:
Propiconazole: 14.3%

OTHER INGREDIENTS: 85.7%

TOTAL 100.0%

Propiconazole Fungicide contains a nominal 1.3 pounds of active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN

WARNING—AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

EPA REG. NO. 34704-879
EPA EST. NO. 34704-MS-002
Product of China, Brazil, Switzerland and Israel. Formulated in the United States with U.S. and imported ingredients.

NET CONTENTS 2½ GALS. (9.46 L)

FORMULATED FOR
LOVELAND PRODUCTS, INC., P.O. BOX 1286, GREELEY, COLORADO 80632-1286
FIRST AID

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing the eye.
- Call a poison control center or doctor for treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: If ingested, induce emesis or lavage stomach. Treat symptomatically.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-866-944-8565.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING—AVISO
Causes substantial, but temporary eye injury. Do not get in eyes or on clothing. Avoid contact with skin or clothing. Avoid breathing vapor or spray mist.

Personal Protective Equipment (PPE)
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category C on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants, chemical-resistant gloves, such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC), or viton, shoes plus socks and protective eyewear.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements
When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the high water mark. Do not contaminate water when disposing of equipment wash waters.

PHYSICAL AND CHEMICAL HAZARDS
Do not use or store near heat or open flame.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

DO NOT apply when wind speed favors drift beyond the target area.

NOTE: Do not apply more than 5.4 gals. of ProCon-Z Fungicide/Acre/calendar year.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.
**Agricultural Use Requirements cont’d.:**

Do not enter treated areas during the restricted entry interval (REI) of 24 hours. PPE required for early entry to treated areas that involves contact with anything that has been treated, such as plants, soil, or water is: Coveralls, chemical-resistant gloves, such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC), or viton, shoes plus socks and protective eyewear.

**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to users of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when the product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter treated areas without protective clothing until sprays have dried.

**GENERAL INFORMATION**

ProCon-Z Fungicide is a systemic fungicide for use on turfgrasses for the control of dollar spot (Sclerotinia homoeocarpa), brown patch (Rhizoctonia solani), anthracnose (Colletotrichum graminicola), red thread (Laetissia farciiformis), pink patch (Limonomyces roseipellis), rust (Puccinia graminis), powdery mildew (Erysiphe graminis), stripe smut (Ustilago striiformis and Urocystis agropyri), necrotic ring spot (Leptosphaeria korrae), striped leaf blight (Herpotrichia fungicola), take-all patch (Gaeumannomyces graminis), take-all brown spot (Sclerotium oryzae), gray snowmold (Typhula spp.), yellow patch (Rhizoctonia cerealis), and zyotia patch (Rhizoctonia solani).

ProCon-Z Fungicide also controls numerous diseases on ornamentals and other landscape and nursery plantings. It controls mildews, rusts, leafspots, scabs, and blights. Refer to the appropriate section for specified disease and plants.

**CHEMIGATION**

Do not apply this product through any type of irrigation system. Do not use ProCon-Z Fungicide as a tree injection. Do not use ProCon-Z Fungicide in greenhouses.

**MIXING INSTRUCTIONS**

Fill the spray tank ½ - ¾ full with water. Add the proper amount of ProCon-Z Fungicide and then add the rest of the water. Provide sufficient agitation during mixing and application to maintain a uniform emulsion.

If ProCon-Z Fungicide is tank mixed with other products, use the following sequence:
1. Always check the compatibility of the tank mix using a jar test with proportionate amounts of ProCon-Z Fungicide, other chemicals to be used, and the water, before mixing in a spray tank.
2. Provide sufficient jet or mechanical agitation during filling and application to keep the tank mix uniformly suspended.
3. Fill tank at least ½ full of clean water.
4. Add wettable powders to the tank first, allowing them to completely suspend in the tank before proceeding. This process can be hastened by pre-mixing the product in water before adding to the tank.
5. Add flowsables or suspensions next.
6. Add ProCon-Z Fungicide next.
7. Add emulsifiable concentrates last.
8. Do not leave tank mix combinations in the spray tank for prolonged periods without agitation. Mix and apply them the same day.

**TURFGRASS AND DICHONDRA DISEASE CONTROL**

1. USE PROCON-Z FUNGICIDE IN A PREVENTATIVE DISEASE CONTROL PROGRAM.
2. Apply in sufficient water to ensure thorough coverage.
3. Apply after mowing or allow sprayed area to completely dry before mowing.
4. For control of foliar diseases, allow sprayed area to completely dry before irrigation.
5. For control of soil-borne disease, ProCon-Z Fungicide can be watered in after application.
6. Under conditions optimum for high disease pressure, use the higher rate and the shorter interval.
7. For optimum turf quality and disease control, use ProCon-Z Fungicide in conjunction with turf management practices that promote good plant health and optimum disease control.
8. Evaluate spray additives prior to use. Label directions are based on data obtained with no additives.
9. Before use of any fungicide, proper diagnosis of the organism causing the disease is important. Use of diagnostic kits or other means of identification of the disease organism is essential to determine the best control measures.
10. Do not apply more than 16 fl. oz./1,000 ft. ²/calendar year.

**IMPORTANT:** Bermudagrass can be sensitive to ProCon-Z Fungicide. Do not exceed 4 fl. oz./1,000 sq. ft. every 30 days on any variety of bermudagrass. In FL, do not apply ProCon-Z Fungicide to bermudagrass golf course greens when temperatures exceed 90° F.

**NOTE:** Do not graze animals on treated areas. Do not feed clippings from treated areas to livestock or poultry.
### Turfgrass - Specific Disease, Rates, and Application Timing

<tr>
<td></td>
<td>1-2</td>
<td>44-88</td>
<td>14-28 days</td>
<td>If using the 1-2 fl. oz./1,000 sq. ft. rate without tank mixing, make no more than 3 consecutive applications for dollar spot control before rotating to an alternate EPA-registered fungicide having a different mode of action.</td>
</tr>
<tr>
<td>Anthracnose (Colletotrichum graminicola)</td>
<td>1-2</td>
<td>44-88</td>
<td>14-28 days</td>
<td>Apply when conditions are favorable for disease development. When disease pressure is high, use higher rates of ProCon-Z Fungicide and shorter intervals. For broader spectrum control, tank mix with a registered contact fungicide at the label rate. If disease is present, mix 2 fl. oz. of ProCon-Z Fungicide per 1,000 sq. ft. with the label rate of the above mentioned contact fungicides.</td>
</tr>
<tr>
<td>Brown Patch (Rhizoctonia solani)</td>
<td>1-2</td>
<td>44-88</td>
<td>14-21 days</td>
<td>Begin applications in May or June before disease is present. Tank mix with a registered contact fungicide labeled for brown patch control at the label rate. Under conditions of high temperatures and high humidity, use the higher rates of ProCon-Z Fungicide and shorter intervals.</td>
</tr>
<tr>
<td>Powdery Mildew (Erysiphe graminis)</td>
<td>1-2</td>
<td>44-88</td>
<td>14-28 days</td>
<td>Apply when conditions are favorable for disease development. If disease is present, use 2 fl. oz. of ProCon-Z Fungicide per 1,000 sq. ft.</td>
</tr>
<tr>
<td>Rust (Puccinia graminis)</td>
<td>2</td>
<td>88</td>
<td>14-21 days</td>
<td>Apply when conditions are favorable for disease development.</td>
</tr>
<tr>
<td>Red Thread (Laetisaria fuciformis)</td>
<td>1-2</td>
<td>44-88</td>
<td>Fall or Spring</td>
<td>Apply once in the fall after grass becomes dormant or in the early spring before grass starts to grow.</td>
</tr>
<tr>
<td>Brown Patch (Limonanymex rosepepitella)</td>
<td>1-2</td>
<td>44-88</td>
<td>14 days</td>
<td>Apply when conditions are favorable for disease development. If using the 1 fl. oz./1,000 sq. ft. rate, tank mix with a registered contact fungicide at the label rate.</td>
</tr>
<tr>
<td>Melting Out Leaf Spot (Bipolaris spp.)</td>
<td>1-2</td>
<td>44-176</td>
<td>14 days</td>
<td>Under light to moderate pressure, apply ProCon-Z Fungicide to reduce the severity of leaf spot and melting out caused by Helminthosporium-type pathogens. For broad spectrum disease control, tank mix the 1 fl. oz. ProCon-Z Fungicide with a registered contact fungicide at the label rate. Tank mix the 1-2 fl. oz./1,000 sq. ft. ProCon-Z Fungicide rate with a registered contact fungicide at the label rate.</td>
</tr>
<tr>
<td>Summer Patch</td>
<td>2</td>
<td>88</td>
<td>14 days</td>
<td>Apply ProCon-Z Fungicide beginning in April. Use the 4 fl. oz./1,000 sq. ft. rate on a 28-day schedule and the 2 fl. oz./1,000 sq. ft. rate on a 14-day schedule.</td>
</tr>
<tr>
<td>Poa Patch (Magnaapatho poae)</td>
<td>4</td>
<td>176</td>
<td>28 days</td>
<td>Apply ProCon-Z Fungicide to reduce the severity of take-all patch. Make 1-2 fall applications in September and October or when night graminis temperatures drop to 55°, and 1-2 spring applications in April and May, depending on local recommendations.</td>
</tr>
<tr>
<td>Take-All Patch (Gaerumamnomyces)</td>
<td>2-4</td>
<td>88-176</td>
<td>Spring and Fall</td>
<td>Apply ProCon-Z Fungicide to reduce the severity of take-all patch. Make 1-2 fall applications in September and October or when night graminis temperatures drop to 55°, and 1-2 spring applications in April and May, depending on local recommendations.</td>
</tr>

</table>
Establishment of Cool Season Turfgrass

ProCon-Z Fungicide provides control of many diseases of turf, and its primary use is as a fungicide for use against the diseases listed on this label. As an additional benefit, ProCon-Z Fungicide will improve the rate of establishment when it is applied to cool season grass seedlings or sod.

New Seedlings: Apply 1 fl. oz./1,000 sq. ft. at the 2 to 3-leaf stage of growth for faster root development and top growth.

Sod: Apply 1 fl. oz./1,000 sq. ft. 2-6 weeks before cutting for increased sod knitting and faster establishment after laying.

Disease Control in Nurseries (Field) and Landscape Plantings
1. USE PROCON-Z FUNGICIDE IN A PREVENTATIVE DISEASE CONTROL PROGRAM. To determine the use directions for controlling a disease on an ornamental plant species, select the plant species in Table 1. The number in parentheses following the plant species refers you to the disease(s) controlled in Table 2. Find the disease in Table 2. The letter in brackets following the disease refers you to the application regime in Table 3.
2. Allow spray to dry before overhead irrigation is applied.
3. Optimum benefit of ProCon-Z Fungicide is obtained when used in conjunction with sound disease management practices.

General Recommendations

ProCon-Z Fungicide may be used at rates of 2-24 fl. oz./100 gals. water for control of disease of ornamental plant species (see Tables 1, 2, and 3).

NOTE: For outdoor uses, you can apply up to 5.4 gallons of ProCon-Z Fungicide/acre/crop/calendar year.

For general disease control in landscapes, apply 6-8 fl. oz./100 gals. water every 21 days. For best control, begin ProCon-Z Fungicide applications before disease development.

NOTE: Plant tolerances to ProCon-Z Fungicide have been found acceptable for the specific genera and species of plants listed under the Directions for Use. In addition, crop tolerance to ProCon-Z Fungicide has been demonstrated (at a rate of 6-8 fl. oz./100 gals.) on the following ornamental plants: ajuga, Bartlett pear, bayberry, camellia, candy tuft, cotoneaster, elm, English ivy, euonymus, German statice, holly, hollyhock, impatiens, linden, liriope, magnolia, maples, peony, privet, raphiolepis, redbud, sycamore, tulip tree, vinca, and wax myrtle. Other plant species may be sensitive to ProCon-Z Fungicide and diseases other than those listed may not be controlled. Before using ProCon-Z Fungicide on plants or for diseases that are not listed in the Directions for Use, test ProCon-Z Fungicide on a small scale basis first. Apply the recommended rates for a particular type of disease, i.e., rust, powdery mildew, etc., and evaluate for phytotoxicity and disease control prior to widespread use.

Table 1. Ornamentals - Plant Species
Numbers in parentheses refer to disease controlled. See Table 2.
4. Powdery Mildew
   a. Erysiphe spp. [B]
   b. Microsphaera spp. [C]
   c. Oidium spp. [B]

5. Rust
   a. Gymnosporangium [A]
   b. Puccinia spp. [B]
   c. Pucciniomaras virginiensis [A]
   d. Pucciniomaras juniperi-virginianae [A]
   e. Pucciniomaras psoracinum [D]
   f. Uromyces diaphan [B]
   g. Phragmidium spp. [B]

Table 3. Application Regimes
[A] Mix 2-4 fl. oz. of ProCon-Z Fungicide in 100 gals. of water and apply as a full coverage spray to the point of drip. Apply every 14-21 days during the period of primary infection. If disease is present, tank mix with an EPA-registered contact fungicide. For flower blight, apply ProCon-Z Fungicide when there is 5-10% bloom and again at 70-100% bloom. For peach and nectarine, apply the 2-4 fl. oz. rate every 14 days, or apply 8 fl. oz. of ProCon-Z Fungicide every 28 days.

[B] Mix 5-8 fl. oz. of ProCon-Z Fungicide in 100 gals. of water and apply as a full coverage spray to the point of drip. Apply as needed, beginning when conditions are favorable for disease development. For blackspot, apply with a registered contact fungicide labeled for blackspot. For Calendula, apply every 30 days. For diplodia tip blight, make 3 applications every 14 days, beginning when conditions are favorable for disease development. For blackspot, apply with a registered contact fungicide labeled for blackspot. For Calendula, apply every 30 days. For diplodia tip blight, make 3 applications every 14 days.

[C] Mix 8-12 fl. oz. of ProCon-Z Fungicide in 100 gals. of water and apply as a full coverage spray to the point of drip. Apply every 30 days, beginning when conditions are favorable for disease development. For pecans, apply the 12 fl. oz. rate beginning at bud break. Apply 3 times on 14-day intervals. For walnuts, apply 8.5 fl. oz. at 14-day intervals. For ray blight, begin with 12 fl. oz. at 7-day intervals or 20 fl. oz. at 14-day intervals.

[D] Mix 16 fl. oz. of ProCon-Z Fungicide in 100 gals. of water and apply as a full coverage spray to the point of drip. Apply every 14-28 days, beginning when conditions are favorable for disease development. For Douglas fir needle rust, apply once in May. For tip blight, initial application is in mid-late winter, and apply 3 times at 3 month intervals.

[E] Mix 20-24 fl. oz. of ProCon-Z Fungicide in 100 gals. of water and apply as a full coverage spray to the point of drip. Apply during June to August time period.

NOTE: To avoid possible illegal residues, do not apply to apple, cherry, citrus, nectarine, peach, pear, pecan, plum, or walnut trees that will bear harvestable fruit within 12 months.
Storage & Disposal cont’d:

Hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Once cleaned, some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site, contact your chemical dealer or manufacturer, or contact The Agricultural Container Recycling Council (ACRC) at www.acrcycle.org.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

For packages up to 5 gallons: Triangle rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For packages greater than 5 gallons and less than 56 gallons: Triangle rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank and store rinsate for later use or disposal. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For packages greater than 56 gallons: To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

For refillable containers: Refill this container with pesticide only. Do not reuse this container or rinse container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

For help with any spill, leak, fire or exposure involving this material, call day or night CHEMTREC • 1-800-424-9300.

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

Before Buying or Using this Product, read the entire Directions for Use and the following Conditions of Sale and Limitation of Warranty and Liability. By buying or using this product, the buyer or user accepts the following Conditions of Sale and Limitation of Warranty and Liability, which no employee or agent of LOVELAND PRODUCTS, INC. or the seller is authorized to vary in any way.

Follow the Directions for Use of this product carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop or other plant injury, ineffectiveness, or other unintended consequences may result from such risks as weather or crop conditions, mixture with other chemicals not specifically identified in this product’s label, or use of this product contrary to the label instructions, all of which are beyond the control of LOVELAND PRODUCTS, INC. and the seller. The buyer or user of this product assumes all such inherent risks.

Subject to the foregoing inherent risks, LOVELAND PRODUCTS, INC. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use when the product is used in strict accordance with such Directions for Use under normal conditions of use. EXCEPT AS WARRANTED IN THIS LABEL AND TO THE EXTENT CONSENTS WITH APPLICABLE LAW, THIS PRODUCT IS SOLD “AS IS,” AND LOVELAND PRODUCTS, INC. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO MERCHANTABILITY; FITNESS FOR A PARTICULAR PURPOSE; OR ELIGIBILITY OF THIS PRODUCT FOR ANY PARTICULAR TRADE USAGE.

IN THE UNLIKELY EVENT THAT BUYER OR USER BELIEVES THAT LOVELAND PRODUCTS, INC. HAS BREACHED A WARRANTY CONTAINED IN THIS LABEL AND TO THE EXTENT REQUIRED BY APPLICABLE LAW, BUYER OR USER MUST SEND WRITTEN NOTICE OF ITS CLAIM TO THE FOLLOWING ADDRESS: LOVELAND PRODUCTS, INC., ATTENTION: LAW DEPARTMENT, P.O. BOX 1286, GREELEY, CO 80632-1286.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE BUYER’S OR USER’S EXCLUSIVE REMEDY FOR ANY INJURY, LOSS, OR DAMAGE RESULTING FROM THE HANDLING OR USE OF THIS PRODUCT, INCLUDING BUT NOT LIMITED TO CLAIMS OF BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, STRICT LIABILITY, OR OTHER TORTS, SHALL BE LIMITED TO ONE OF THE FOLLOWING: At the election of LOVELAND PRODUCTS, INC. OR THE SELLER: DIRECT DAMAGES NOT EXCEEDING THE PURCHASE PRICE OF THE PRODUCT OR REPLACEMENT OF THE PRODUCT; TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, LOVELAND PRODUCTS, INC. AND THE SELLER SHALL NOT BE LIABLE TO THE BUYER OR USER OF THIS PRODUCT FOR ANY CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES, OR DAMAGES IN THE NATURE OF A PENALTY.
