SANURIL TABLETS
A Concentrated Chlorinating Agent
For Use As A Bactericide And Disinfectant

ACTIVE INGREDIENT:
Calcium hypochlorite .................................................. 70%
OTHER INGREDIENTS: .................................................. 30%
TOTAL: ........................................................................ 100%

Contains a minimum of 70% Available Chlorine
KEEP OUT OF REACH OF CHILDREN

DANGER
See additional precautionary statements on back panel.
DO NOT MIX WITH OTHER CHEMICALS.
DO NOT ADD WATER TO PRODUCT – ADD PRODUCT TO WATER

FIRST AID
If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed, call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER: Contact 1-800-621-9189 or your poison control center for 24-hour emergency medical treatment information. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Note to physician, probable mucosal damage may contraindicate the use of gastric lavage.

DE NORA
SANURIL® TABLETS is a slow dissolving product in a convenient, ready-to-use tablet form. The SANURIL® TABLETS provide a source of available chlorine. It is recommended for use as a sewage effluent disinfectant and for other related applications where a continuous source of chlorine is required.

Sewage and Wastewater Effluent Treatment:
For best results and reliable performance, SANURIL® TABLETS should be dosed using the De Nora Tablet Feeder.

The amount of chlorine delivered will depend upon the flow rate of the water being treated, the number and placement of feed tubes filled with SANURIL® TABLETS and the outlet weir size selected. For example, to provide an available chlorine dosage of 6 ppm, the recommended dosage will require about 0.8 pounds or 3 tablets of SANURIL® TABLETS for each 10,000 gallons of water to be treated. Refer to the Tablet Feeder Manual to determine the required feeder settings and adjustments to provide this level of dosage. In practice, the amount of SANURIL® TABLETS used should be adjusted to satisfy the chlorine demand and to maintain the required chlorine residual.

Allow the SANURIL® TABLETS System to operate approximately one (1) to one and one-half (1-1/2) hours before testing residuals. Measurement of the total available chlorine (combined plus free) in the treated water can be determined by employing a standard iodometric titration technique. A suitable method is described in Standard Methods for the Examination of Water and Wastewater, Nineteenth Edition, 1995, American Public Health Association, section 4, pp 36-53.

For detailed information concerning specific applications, write to De Nora Water Technologies Texas LLC, 1110 Industrial Boulevard, Sugar Land, Texas 77478.

Warranty Statement: Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on this label when used in accordance with directions under normal conditions of use and buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warrant of fitness or of merchantability and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller’s liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Highly Corrosive – Causes Skin and Eye Damage – May Be Fatal if Swallowed – DO NOT get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Do not breathe dust or fumes. Wash thoroughly with soap and water after handling. Irritating to nose and throat. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT! Mix only with water. Use clean, dry utensils. Open container only where adequate ventilation is available. DO NOT add this product to any dispersing device containing remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Keep away from flammable or burning material. In case of contamination or decomposition, DO NOT reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL
DO NOT contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Shelf life is one (1) year in an UNOPENED container.

Pesticide Disposal and Container Handling: In case of decomposition, isolate container and flood with large amounts of water to dissolve all material before discarding this container. Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or place in trash collection.
