12.5% SODIUM HYPOCHLORITE
ACTIVE INGREDIENT: SODIUM HYPOCHLORITE ........... 12.5%
INERT INGREDIENTS ............ 87.5%
TOTAL.................................. 100.0%

KEEPC OUT OF REACH OF CHILDREN

DANGER: Corrosives can cause severe skin and eye irritation or chemical burns to skin. Causes eye damage. May cause serious internal injury if swallowed or inhaled. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Vapor poorly ventilated areas as soon as possible. Do not inhale dust or fumes.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, or public waters unless this product is specifically identified and authorized in an NPDES permit. Do not discharge effluent containing this product into sewers without permission. Fail to register the sewage treatment plant authority. For guidance, contact your State Water Board or regional office of the U.S. Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS
STRONG CAUSTIC AGENT. Use only according to label directions. Mixing this product with other products, such as bases, acids, etc., or with anionic or cationic detergents or other chemicals will release fumes which are irritating to the lungs and mucous membranes.

STORAGE AND DISPOSAL
STORAGE: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. Do not contaminate food or equipment or mix tank. Refillable container. Refill this container with pesticide only. Do not reuse this container. Use only according to label directions. May be disposed of in either a liquid or solid waste disposal system. Do not contaminate food or equipment. Clean equipment in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution and wash all equipment with a chloride test kit to make sure the sanitizer is available and effective. Prior to use, immerse equipment in the sanitizing solution for at least two minutes and allow the sanitizer to drain. Clean equipment in the normal manner. Flip disinfected equipment, etc. and store for later use or disposal. Repeat this procedure two more times. Turn the container over onto its other end and tip it back and forth, stirring at least one complete revolution, for 30 minutes. Empty the rinsate into application equipment or mix tank. Fill the container 1/4 full with water. Add 20% sodium hypochlorite and recirculate water for 2 minutes. Pour out rinse into application equipment or mix tank. Repeat the rinsing procedure two more times. Cinch container in plastic bag, return it to Brenntag Pacific Inc., or its distributor. Keep container in this state for 24 hours. Rinse out container and discard.

CONTAINER DISPOSAL: (For 55 gal, returnable drum) Refillable container. Refill this container with pesticide only. Do not reuse this container. Use only according to label directions. May be disposed of in either a liquid or solid waste disposal system. Do not contaminate food or equipment. Clean equipment in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, wash all equipment with a chloride test kit to make sure the sanitizer is available and effective. Prior to use, immerse equipment in the sanitizing solution for at least two minutes and allow the sanitizer to drain. Clean equipment in the normal manner. Flip disinfected equipment, etc. and store for later use or disposal. Repeat this procedure two more times. Turn the container over onto its other end and tip it back and forth, stirring at least one complete revolution, for 30 minutes. Empty the rinsate into application equipment or mix tank. Fill the container 1/4 full with water. Add 20% sodium hypochlorite and recirculate water for 2 minutes. Pour out rinse into application equipment or mix tank. Repeat the rinsing procedure two more times. Cinch container in plastic bag, return it to Brenntag Pacific Inc., or its distributor. Keep container in this state for 24 hours. Rinse out container and discard.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES
RINSE METHOD - A solution of 100 ppm available chlorine may be used in the sanitizing solution for a chlorine test kit is available. Sanitizers containing an initial concentration of 100 ppm available chlorine must be added and adjusted periodically to ensure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of this product with 10 gallons of water. If this test kit is available, prepare a sanitizing solution by thoroughly mixing 2 oz. of this product with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Close equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the surface for at least 2 minutes. In rinse solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to re-establish a 200 ppm solution. Do not rinse equipment with water after treatment and do not scale equipment removed.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

INMERSION METHOD - A solution of 100 ppm available chlorine may be used in the sanitizing solution for a chlorine test kit is available. Sanitizers containing an initial concentration of 100 ppm available chlorine must be added and adjusted periodically to ensure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of this product with 10 gallons of water. If this test kit is available, prepare a sanitizing solution by thoroughly mixing 2 oz. of this product with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Close equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the surface for at least 2 minutes. In rinse solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to re-establish a 200 ppm solution. Do not rinse equipment with water after treatment and do not scale equipment removed.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

FLOW/PRESSURE METHOD - Disassemble equipment and thoroughly clean after use. Assemble equipment in operating position prior to use. Prepare a volume of 100 ppm available chlorine sanitizing solution equal to 1/100 of equipment capacity. Add 2 oz. of this product to 100 gallons of water. Pump solution through the system for 30 minutes at 1 gpm. Re-test the solution and add sufficient product to re-establish a 200 ppm solution. Do not rinse equipment with water after treatment.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

See other precautions on this label.

Corporate Headquarters: Brenntag Pacific, Inc. 10477 Patterson Place Santa Fe Springs, California 90670 (562) 903-9626

NOTE TO PHYSICIAN

Probable mucosal damage may contaminate the use of gastric lavage.

SANITIZATION OF POROUS FOOD CONTACT SURFACES
RINSE METHOD - Prepare a sanitizing solution by thoroughly mixing 0.5 oz. of this product with 10 gallons of water to provide approximately 50 ppm available chlorine by weight. Sanitize surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the surface for at least 2 minutes. Rinse equipment with water after treatment and do not scale equipment removed.

INMERSION METHOD - Prepare a sanitizing solution by thoroughly mixing in an immersion tank 6 oz. of this product with 10 gallons of water to provide approximately 50 ppm available chlorine by weight. Sanitize equipment in the normal manner. Prior to use, immerse equipment in the sanitizing solution for at least 2 minutes and allow the sanitizer to drain. Rinse equipment with water after treatment.

FLOW/PRESSURE METHOD - Prepare a sanitizing solution by thoroughly mixing 0.5 oz. of this product with 10 gallons of water to provide approximately 50 ppm available chlorine by weight. Sanitize surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the surface for at least 2 minutes. Rinse equipment with water after treatment and do not scale equipment removed.
