APPLICATION

ClearWood-MW2 may be applied by dip, or pressure treatment methods. Solution uptake and treatment conditions for each method should result in a 250-2500 ppm combined retention of active ingredients in the treated article. Treated wood should be used only for above ground uses.

For pressure treatment, follow the general requirements of American Wood Protection Association Standards U1, T1. For dip treatment, immerse wood completely until enough solution has been absorbed to meet the retention requirements given above. Use dip treatment procedures consistent with the equipment being used and standard treatment practices.

ClearWood-MW2 can be tank-mixed with other pesticide products labeled for wood treatment. Read and follow the label of each tank mix product used for precautionary statements, directions for use, application rates, and other restrictions.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE:
Pesticide Storage: Store in a cool, dry place

PESTICIDE DISPOSAL:
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these pesticides cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable Container. Do not reuse or refill this container. Empty tote container must be returned to a tote collection agent.

Residue Removal: Cleaning container before final disposal is the responsibility of the person disposing of the container. To clean container before final disposal, fill container about 10 percent full with water; Agitate container vigorously; discard rinsate according to pesticide disposal instructions; repeat this rinsing procedure two more times. For additional container disposal information, contact product supplier.
