† In New York State, this product may NOT be applied using outdoor residential automated misting systems.

KILLS: Angoumois Grain Moths, Ants (excluding Harvester), Boxelder Bugs, Cadelles, Cheese Mites, Cigarette Beetles, Confused Flour Beetles, Crickets, Earwigs, Fruit Flies, German Cockroaches, Gnats, Granary Weevils, House Flies, Indianmeal Moths, Mosquitoes, Rice Weevils, Spiders (excluding Black Widow and Brown Recluse) and Tobacco Moths

FOR USE IN AND AROUND: Commercial (including Food Handling Establishments, Food Service, Storage, Preparation and Processing Areas, and Meat, Poultry and Egg Processing Facilities), Institutional and Residential Areas

See inside booklet for additional insects and use sites.

ACTIVE INGREDIENTS:
- Pyrethrins*, a botanical insecticide ................................................................. 3.0%
- Piperonyl butoxide** ..................................................................................... 15.0%

OTHER INGREDIENTS: .................................................................................. 82.0%

* 1 gallon contains 0.25 lb of pyrethrins and 1.25 lb piperonyl butoxide
** (butylcarbityl)(6-propylpiperonyl) ether and related compounds

TOTAL: 100.0%

EPA Reg. No. 499-511 • EPA Est. No. 7969-M0-1

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel/inside booklet for First Aid, Precautionary Statements, Directions for Use and Storage and Disposal

NET CONTENTS: 1 gal

100%
Booklet (base page) - 5.375” (w) x 5.5” (h)
Applied to front of bottle
PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

See inside booklet for additional Precautionary Statements.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

READ ENTIRE LABEL BEFORE EACH USE.

See inside booklet for complete Directions for Use.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE:
Store this product in its original container in a cool, dry (preferably locked) place, in an area that is inaccessible to children and animals. Do not store above 100°F for extended periods of time. Storage below 32°F may cause freezing. If container is damaged or spill occurs, use product immediately or dispose of product and damaged container as indicated below.

PESTICIDE DISPOSAL:
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL:
Nonrefillable container. Empty container by using the product according to the label directions. Do not reuse or refill this container! Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows:
Empty the remaining contents into application equipment or a mix tank and drain for 10 sec after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 sec. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 sec after the flow begins to drip. Repeat this procedure 2 more times.

Offer for recycling if available, for reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 min. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15 – 20 min. Remove contact lenses, if present, after the first 5 min, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this product (including health concerns, medical emergencies or pesticide incidents), you may call 1-800-832-HELP (4357) 24 hr/day, 7 days/week.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash hands thoroughly with plenty of soap and water after handling, and before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic organisms, including fish and invertebrates. Drift and run-off may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through run-off. This product has a potential for run-off for several months or more after application. Poorly draining soils and soils with shallow water tables are more prone to produce run-off that contains this product. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

To protect the environment, do not allow pesticide to enter or run off into storm drains, draining ditches gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hr will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run-off to water bodies or draining systems.

PHYSICAL OR CHEMICAL HAZARDS

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. READ ENTIRE LABEL BEFORE EACH USE.

APPLICATION INSTRUCTIONS

USED IN COMBINATION WITH OTHER INSECTICIDES: This product may be combined with other insecticides and acaricides when resistance may be a problem, and to flush insects from hiding and into contact with other spray residues. The application must conform to the accepted use precautions and directions for both products.

Prior to tank-mixing, conduct a compatibility test using the proper proportions of chemicals and water to ensure the physical compatibility of the mixture.

Tank mix applications must be made in accordance with the more restrictive of label limitations and precautions. No label application rates may be exceeded. This product cannot be mixed with any product with label prohibitions against such mixing. To provide flushing and quick knockdown, mix 0.50 – 0.8 oz/gal. It is recommended that the final spray mix be buffered to a pH of 5.5 – 7.0.

SPACE SPRAY (INDOORS): Apply using a mechanical aerosol generator which creates particles of aerosol size (80% of droplets < 30 microns), or in a pump sprayer or automated misting system. Use the 0.25% rate for maintenance. Use higher rates for clean outs or high insect infestations.

* DO NOT DILUTE WITH OIL.

NOTE: 1/3 fl oz = 2 tsp and 1/2 fl oz = 1 tbsp

VOID TREATMENT: Use to flush and kill insects harboring in closed or inaccessible areas such as attics, false ceilings and crawl spaces. Calculate the cubic volume (area) of the void and treat at a rate of 1 ft³/1,000 ft². Apply in such a manner that dripping and run-off on structural surfaces is minimized.

DILUTION RATES

Dilute only with water. Follow the rates for specific pests and apply in a mechanical sprayer, mist sprayer, mechanical aerosol generator, which produces particles of aerosol size (80% of droplets < 30 microns), or in a pump sprayer or automated misting system. Use the 0.25% rate for maintenance. Use higher rates for clean outs or high insect infestations.

Prior to applications, cover or remove food in the treatment area.

Prior to applications, cover food processing surfaces, in the treatment area, or clean after treatment and before use.

When used in dairy barns or facilities: Close milk bulk tank lids to prevent contamination from spray and from dead or falling insects.

Remove or cover milking utensils before application. Wash teats of animals before milking.

Do not apply this product in hospital rooms while occupied or in any rooms occupied by the elderly or infirm. Remove patients from room prior to treatment and thoroughly ventilate (2 hr) after application. Do not return patients to room until after ventilation.

Do not use in patient rooms in hospitals and nursing homes for treatment of bed bugs.

Do not apply to cracks and crevices in any area where pests hide, harbor, live and breed (such as behind baseboards, sinks, cabinets, door frames and windows). Place injector tip into cracks, crevices, holes and other small (openings) areas. For lighter infestations, move injector tip along cracks while treating at the rate of 0.25 ft/sec. For heavier infestations, move injector tip along cracks while treating at the rate of 1.00 ft/sec. For heavier infestations, move injector tip along cracks while treating at the rate of 4 ft/sec. For heavier infestations, move injector tip along cracks while treating at the rate of 4 ft/sec.

NOTE: 1/3 fl oz = 2 tsp and 1/2 fl oz = 1 tbsp

**INDOOR TREATMENTS**

**FLYING INSECTS** (such as Cluster Flies, Flies, Gnats, Mosquitoes, Moths, Small Flying Moths and Webbing Clothes Moths): Apply as a crack and crevice, void treatment, direct spray, or space spray at 0.025% − 0.108%, using 0.5 − 1.0 fl oz concentrate/1,000 ft³ of space. Close all windows and doors. Direct aerosol upward and disperse in all locations. Do not apply as a space spray in residences.

**CRACKING INSECTS** (such as Ants (excluding Harvester), Booklice, Carpet Beetles, Centipedes, Clothes Moths, Clover Mites, Cockroaches, Crickets, Dermestid Beetles, Earwigs, Firebrats, Flies, Millipedes, Scorpionflies, Silverfish, Sawbugs and Spiders (excluding Black Widow and Brown Recluse)): Crack & Crevice, Void: Direct Spray and/or Space Treatment: Apply at 1.0% − 3.0%, using 8 fl oz concentrate/1,000 ft³ of space. Use only in areas where food is not exposed. Thoroughly clean all food preparation areas after treatment and before food is exposed. Direct aerosol upward and disperse in all locations. Do not remain in treated areas after application. Keep area closed for at least 1 hr. Open and thoroughly ventilate treated areas before recoupicing.

**STORED PRODUCT PESTS** (such as Angoumois Grain Moths, Cadelles, Carpet Beetles, Chocolate Moths, Cigarette Beetles, Dermestid Beetles, Dried Fruit Beetles, Drug Store Beetles, Flour Beetles, Grain Mites, Granary Weevils, Indianmeal Moths, Meal Worms, Mediterranean Flour Moths, Psocids, Red Flour Beetles, Sawtoothed Grain Beetles, Spider Beetles, Trogoderma and Weevils): Apply as a crack and crevice, void treatment, direct spray, or space spray at 1% − 3%, using 1.0 fl oz concentrate/1,000 ft³ of space. Use only in areas where food is not exposed. Thoroughly clean all food preparation areas after treatment and before food is exposed. Direct aerosol upward and disperse in all locations. Do not remain in treated areas after application. Keep area closed for at least 1 hr. Open and thoroughly ventilate treated areas before recoupicing. Do not apply as a space spray in residences.

**BEDBUGS**: Thoroughly inspect area of suspected bed bug infestation, and note potential harborage sites or actual infestations. Prior to treatment, ensure that infested bedding (pillows and linens), clothing and other items or obstacles have been removed from the area that may prevent thorough inspection or treatment. Apply to mattresses as a spot treatment to mattress seams, edges and tufts of bed bugs from view. Do not use directly on pillows, bed linens or clothes. Do not saturate the mattress, and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and/or bedding linens.

Bed bugs may also harbor in areas of the room away from the bed. Apply as a Crack & Crevice or spot application where evidence of bed bugs occurs. This includes bed frames, box springs, inside empty drawers and clothes closets, night stands and other furniture in the room, carpet edges, high and low wall moldings (such as floor molding or window casings), wall voids, behind wall hangings and mirrors, wallpaper edges and popcorn ceilings. Remove all clothes and other articles from dressers or closets before application. Take bed apart, dried points and channels, if necessary, such as square or round tubing, and see that interior framework is treated. Apply as a surface application to carpeting, drapes and Flooring. Allow all treated areas to dry thoroughly before use. Do not apply as a space spray in residences.

**FLEAS**: Apply as a directed or space spray to infested areas at 1% − 3%. Remove or cover animal feed and drinking water before spraying. To control the source of flea infestations, treat pets with a product registered for such use. Do not apply as a space spray in residences.

**DARKLING BEETLES**: Empty poultry houses and apply, undiluted, as a space spray using 0.25 fl oz concentrate/1,000 ft³ of space. Keep closed for 1 hr. Thoroughly ventilate (24 hr) before returning poultry.

**DIRECT SPRAY OR VOID INJECTION**: Use equipment designed for space or mist treatments. Follow the manufacturer’s recommendations for proper equipment setup and operation. The tip of the applicator or air or into the crack or crevice or opening to the void. Apply in short bursts into area being treated. Apply 1 sec of product for every 3 ft³ of void area. For Direct Spray, apply the product in short bursts into the area where insects are to be contacted, such as corners of the room, behind and under furniture or other equipment. Apply from a distance of 18 − 24” away from the surface and allow the material to drift to area to be treated. The amount of product applied is not to exceed 0.5 fl oz/1,000 ft³.

**INDOOR AND OUTDOOR TREATMENTS**

**BOXELDER BUGS, CARPENTER ANTS, CRAWLING INSECTS, CRACK & CREEVICE TREATMENT**: Apply as a Crack & Crevice treatment or as a spot injection to voids and other areas where these insects are found. Use undiluted or diluted at 1% − 3%.

**CR W A L IN G INSECTS** (such as Ants (excluding Harvester), Booklice, Carpet Beetles, Centipedes, Clothes Moths, Clover Mites, Cockroaches, Crickets, Dermestid Beetles, Earwigs, Firebrats, Flies, Millipedes, Scorpionflies, Silverfish, Sawbugs and Spiders (excluding Black Widow and Brown Recluse)): Crack & Crevice, Void and/or Direct Spray: Apply at 1% − 3% into cracks, crevices and structural voids such as behind baseboards, sinks, cabinets, door frames and windows, and inside and around food conveying, processing and handling equipment.

**OUTDOOR TREATMENTS**

**MOSQUITOES, FLIES, MIDGE S AND GNATS**: Dilute to 0.05% − 0.125% when applying with mechanical, electrical, fogging or automated misting equipment. To combat these pests in open areas near homes, buildings and in campgrounds, allow product to drift through shrubbery, vegetation and other harborage/feeding areas. Structural surfaces, shrubbery and vegetation around stagnant pools, marshy areas, ponds and shorelines may be treated. Treatment of vegetation in water from land is also permitted by allowing wind to move product into vegetation, but application of this product directly to any body of water is prohibited.

**PERIMETER TREATMENT**: To reduce infestations of buildings, treat a band of soil 6 − 10 ft wide around and adjacent to building. Also treat the building foundation up to a maximum height of 3 ft above grade. Applications around potential pest entry points where pests are active and may find entrance into buildings are limited to a surface band not to exceed 1” in width. Treat the underside of eaves, soffits, doors, windows, under siding and eaves of structures. This product may be applied in compressed air, backpack or low pressure power spray equipment at the rate of 1% − 3%. Apply in sufficient water to adequately cover the area being treated. Apply in such a manner to limit dripping and run-off, and do not allow this product to enter or run-off into storm drains, drainage ditches, gutters or surface waters.

**INDOOR RESIDENTIAL MISTING SYSTEMS**: Use at 0.025% (1:100) − 0.108% (1:27).

**USE RESTRICTIONS**

1. In New York State, this product may NOT be applied using outdoor residential automated misting systems.

**USE RESTRICTIONS**

When using this product, installers and service technicians must comply with the license, certification or registration requirements of the state(s), tribe(s) or local authority(ies) where they are installed.

If the system works on an automatic timer, set the timing for application when people, pets and food are unlikely to be present.

If the system works when a person operates a remote activation device, then application of this product when people, pets and food are present is prohibited.

Do not use in an evaporative cooling system.

Direct nozzles to spray towards the target area and away from swimming pools, water bodies, or eating and cooking areas.

Do not set nozzles to direct mist near outside air condition systems or other home air intakes.

If used in a system with a reservoir tank for the end use dilution, the system reservoir tank must be locked. Securely attach the end use label and a dilution statement to the system reservoir tank in a weather protected area or plastic sleeve. The dilution statement must be phrased as follows: This container holds ___ parts [product name] to ___ parts water.

If used in a direct injection system, the pesticide container must be locked. Securely attach the end use label to the pesticide container in a weather protected area or plastic sleeve.

Contact the system manufacturer for guidance or assistance to ensure compliance with the following requirement:

This product must only be used in systems that have been calibrated to apply no more than the maximum rate equal to 0.00011 lb pyrethrins per 1,000 ft³/day.
LIVESTOCK ANIMALS

For Treatment of Livestock Animals: Use to protect beef cattle, dairy cattle and horses from horn flies, house flies and gnats; apply a light mist sufficient to wet the tips of the hair. To kill stable flies on beef cattle, dairy cattle and horses, apply 2 fl oz/adult animal, sufficient to wet the hair but not to soak the hide. Repeat every 2 − 3 weeks as required, but do not apply more than 1 time/day. Do not apply this product directly to domestic (companion animals) such as dogs, puppies, cats or kittens.

Space Treatment Over Animals in Barns and Corrals or in Indoor Misting Systems Used in Commercial Barns, Stables and Animal Quarterm: Select proper dilution and treat with ULV equipment over animals, or apply through Indoor Misting Systems.

For Treatment of Livestock Animals:

- Do not use for outdoor residential misting systems (indoor or outdoor). See URBAN MISTING SYSTEMS under OUTDOOR TREATMENTS for directions for use in Urban/Residential automated misting systems.
- Do not apply this product in barns or stables where animals intended for slaughter or human consumption will be maintained.
- Do not apply when food, feed and/or water is present.
- When using this product, installers and service technicians must comply with the license, certification or registration requirements of the state(s), tribe(s) or local authority(ies) where they are installed.
- When applying via a remote activation device, do not apply when people and pets are present. If possible, when applying via automatic timer, set the timing for application when people and pets are unlikely to be present.
- Direct nozzles to spray towards the target area and away from areas where people are typically present.
- Do not use in evaporative cooling system.
- Do not use in misters located within 3 ft of air vents, air conditioner units or windows.
- If used in a system with a reservoir tank for the end use dilution, the system reservoir tank must be locked. Securely attach the end use pesticide label and a dilution statement to the system reservoir tank in a weather protected area or plastic sleeve. The dilution statement must be phrased as follows: This container holds ___ parts [product name] in ___ parts water.
- If used in a direct injection system, the pesticide container must be locked. Securely attach the end use label to the pesticide container in a weather protected area or plastic sleeve.
- This product must only be used in systems that have been calibrated to apply no more than the maximum application rate of 0.0033 lb/1,000 ft3 (no animals present) [diluted to 1% = 4.5 fl oz/1,000 ft3 = 0.0833 lb/gal] or 0.0008 lb/1,000 ft3 (animals present) [diluted to 1% = 0.0007 lb/1,000 ft3 = 0.0833 lb/gal].
- Double rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Fill this container with water and recap. Shake for 10 sec. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 sec after the flow begins to drip. Repeat this procedure 2 more times. Offer for recycling if available, for reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store this product in its original container in a cool, dry (preferably locked) place. In an area that is inaccessible to children and animals. Do not store above 100°F for extended periods of time. Storage below 32°F may cause freezing. If container is damaged or split occurs, use product immediately or dispose of and damaged container as indicated below.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. However, if you choose to dispose of this product other than as indicated below, then you must contact the appropriate state environmental agency for approval. You must also comply with any pertinent state, local, or federal regulations for disposal.

CONTAINER DISPOSAL: Nonrefillable container. Empty container by using the product according to the label directions. Do not reuse or refill this container! Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows:

1. Empty the remaining contents into application equipment or a mix tank.
2. Fill the container 1/4 full with water and recap. Shake for 10 sec. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal.
3. Drain for 10 sec after the flow begins to drip. Repeat this procedure 2 more times.

When using this product, installers and service technicians must comply with the license, certification or registration requirements of the state(s), tribe(s) or local authority(ies) where they are installed.

When applying via a remote activation device, do not apply when people and pets are present. If possible, when applying via automatic timer, set the timing for application when people and pets are unlikely to be present.

Direct nozzles to spray towards the target area and away from areas where people are typically present.

Do not use in evaporative cooling system.

Do not use in misters located within 3 ft of air vents, air conditioner units or windows.

If used in a system with a reservoir tank for the end use dilution, the system reservoir tank must be locked. Securely attach the end use pesticide label and a dilution statement to the system reservoir tank in a weather protected area or plastic sleeve. The dilution statement must be phrased as follows: This container holds ___ parts [product name] in ___ parts water.

If used in a direct injection system, the pesticide container must be locked. Securely attach the end use label to the pesticide container in a weather protected area or plastic sleeve.

This product must only be used in systems that have been calibrated to apply no more than the maximum application rate of 0.0033 lb/1,000 ft3 (no animals present) [diluted to 1% = 4.5 fl oz/1,000 ft3 = 0.0833 lb/gal] or 0.0008 lb/1,000 ft3 (animals present) [diluted to 1% = 0.0007 lb/1,000 ft3 = 0.0833 lb/gal].

Double rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Fill this container with water and recap. Shake for 10 sec. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 sec after the flow begins to drip. Repeat this procedure 2 more times. Offer for recycling if available, for reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
