Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Users should:
1. Not eat, drink or smoke while using this product.
2. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
3. Remove clothing and wash immediately after exposure.
4. Wash any exposed skin with soap and water.
5. Avoid contact with eyes, mouth, and broken skin.
6. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.
7. Do not clean equipment or wash contaminated equipment in rivers, lakes, streams, ponds, ditches, sewers or septic tanks.
8. Do not apply to water bodies or adjacent areas.
9. Do not contaminate water, food, or household or animal feed when applying this product.
10. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Environmental Hazards

This product is toxic to fish and wildlife. Do not apply directly to water or to intertidal areas where surface water is present or to intertidal areas below the mean high water mark.

Precautionary Statements

For use in and around Residential, Institutional and Commercial Structures including Homes, Apartments, Greenhouses, Hospitals, Hotels, Kennels, Stables, Farm Buildings, Trucks, Trailers, Warehouses and Non-Area Specials of Supermarkets, Restaurants and Food Processing Plants.

I. USE RESTRICTIONS

A. Use Restrictions

1. Not to be used on aquatic organisms and or other wildlife unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the authority having had such an authority issued in writing prior to discharge.
2. Do not discharge effluent containing this product to sewer systems without prior written permission of the appropriate authority.
3. For guidance contact your state water board or regional office of the EPA.

DIRECTIONS FOR USE

A. Dilution

1. Treatment of Dimensional Lumber, Plywood and Exterior Wood Surfaces (Decks, Sheds, Fences, etc.):

Applying the product:

i. Use a hand sprayer or a tank mix sprayer. For sprayers that use 4:1 or 2:1 mixing ratios of AntiBlu® Diffuze, mix entire contents of FrameGuard® Pack A with one gallon of clean water. For sprayers that use 1:1 mixing ratios of AntiBlu® Diffuze, mix entire contents of FrameGuard® Pack A with 1/2 gallon of clean water. The larvicide will have to be added to this product.

2. Treatment of Logs and Lumber:

a. Treat from the log ends, notches, corners and sill logs. Actual number of coats waiting at least 20 minutes between applications.

C. Storage and Disposal

Storage and Disposal:

1. The Initial Desired Dilution Ratio:

a. The Initial Desired Dilution Ratio:

b. The Initial Desired Dilution Ratio:

C. Storage and Disposal

D. Maintaining and Finishing Treated Surfaces:

For long-term protection, exterior wood treated with AntiBlu® Diffuze should be maintained and finished to prevent the build-up of debris or deposits on exteriors that can serve to redirect water to untreated surfaces.

Initially, the exterior wood treated with AntiBlu® Diffuze should be maintained and finished to prevent the build-up of debris or deposits on exteriors that can serve to redirect water to untreated surfaces.
