EPA Reg. No. 352-505

PRE-PLANT OR AT-PLANTING BURNDOWN IN COTTON, FIELD CORN, GRAIN SORGHUM, RICE, AND SOYBEANS

DuPont™ EXPRESS® Herbicide or DuPont™ EXPRESS® XP Herbicide (EXPRESS®) may be applied for burndown of emerged weeds before planting, or at planting, of cotton, field corn, grain sorghum, rice and soybeans.

DIRECTIONS FOR USE
EXPRESS® may be used as part of a pre-plant or at-planting burndown treatment, in combination with other suitable registered herbicides.
Read and follow all manufacturers label recommendations for the companion herbicide. If those recommendations conflict with this label, do not tank mix the herbicide with EXPRESS®. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
In fields to be planted to cotton, apply EXPRESS® at 0.2 ounce per acre. In fields to be planted to corn, or soybeans, apply EXPRESS® at 0.17 to 0.33 ounce per acre for control or partial control of the weeds listed on the EPA registered label. Allow at least 14 days between application and planting of cotton, corn, soybeans or grain sorghum. Include a nonionic surfactant, petroleum based crop oil concentrate, or vegetable-seed oil-based product (methylated seed oils are considered a vegetable seed-based oil).

Crop Oil Concentrate
Under dry conditions or during cool weather, a petroleum based crop oil concentrate, or vegetable-seed oil-based product may be used in place of a nonionic surfactant at 1-2 gallon/100 gal of spray solution 1-2% v/v to enhance weed control. Use a petroleum-based crop oil concentrate with at least 14% emulsifiers/surfactant and 80% oil.
Ammonium Nitrogen Fertilizer
An ammonium nitrogen fertilizer can be added to a surfactant or a crop oil concentrate to enhance control. Alternatively, a high-quality, sprayable grade of ammonium sulfate (21-0-0) may be used.

IMPORTANT PRECAUTIONS
Seedling disease, nematodes, cold weather, deep planting (more than 2"), excessive moisture, high salt concentration, and/or drought may weaken cotton seedlings and increase the possibility of crop injury. Cotton resumes normal growth once favorable growing conditions return.

RESTRICTIONS
• DO NOT apply later than 14 days before planting cotton, corn, soybeans or grain sorghum.
• DO NOT apply after planting field corn, grain sorghum, rice or soybeans.
• DO NOT allow livestock to graze on, or feed forage, hay or straw from treated soybean fields.
• DO NOT make more than one pre-plant or at-planting application of EXPRESS® to field corn, grain sorghum, rice, or soybeans per growing season.
• DO NOT apply more than 0.33 oz. of EXPRESS® to rice, grain sorghum, field corn, or soybeans pre-plant or at-planting.

IMPORTANT
BEFORE USING EXPRESS®, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully. This labeling must be in the possession of the user at the time of pesticide application.

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
