Mold Control

Eliminates, cleans and prevents mold

Wherever mold takes hold

Directions for Use must be read
completely prior to using this product.

Active Ingredient
Sodium Carbonate............... 0.95%
Other Ingredients............. 99.05%
Total........................... 100.00%

Fungistat/Mildewstat
EPA Reg. No. 82552-1
EPA Est. No. 082993-CAN-001
Sold by Simmons International Inc.
Toronto, Canada

Net Contents 1 quart

Keep out of reach of children
Eliminates mold & musty odors
Cleans mold & mildew stains
Prevents mold growth

Concrobium Mold ControlTM dries on surfaces to create an invisible antimicrobial shield that eliminates and prevents mold and gets rid of musty odors. Contains no bleach, ammonia, alcohol or VOCs. Odorless and colorless. Suitable for use on most surfaces.

For use in homes, institutions, boat interiors, RVs – wherever mold takes hold. Can be used for pretreatment of building materials for mold resistance.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
MOLD AND MILDEW CONTROL, IN WOOD, WALLBOARD, CONCRETE AND MASONRY (Cinder) BLOCK CONSTRUCTION MATERIALS IN BUILDINGS
Concrobium Mold Control is used to treat wood, wallboard, concrete and masonry (cinder) block building materials to inhibit or prevent the growth of mold organisms when the materials are subjected to moist or wet environments. Before applying this product, visible mold growth must be removed and conditions favorable to mold growth must be identified and corrected.

Read label before using.

PREVENTATIVE TREATMENT
To inhibit the growth of mold and mildew on surfaces:
1) Apply Concrobium Mold Control on area until evenly wet.
2) To prevent drying and to avoid residue marks, use a clean cloth or paper towel to wipe off excess wetness.
3) Allow treated surfaces to dry completely.

REMEDIAL TREATMENT
Areas of visible growth of less than 30 square feet (the area of a single wall pass) can normally be remediated without elaborate procedures. When these areas are identified, apply Concrobium Mold Control to retard growth and spread of fungal spores and other contaminants until the area can be thoroughly cleaned and remediated. If growth is on ceiling tiles or other such easily removable items of nominal value, remove them and seal them in a plastic bag and dispose with normal trash.

If the surface is not easily replaceable:
1) Clean contaminated area to remove surface soil. For best results, and to avoid possible interference from other chemicals, use Concrobium Mold Control for initial cleaning. Use a cloth, cleaning pad or brush suitable to the durability of the surface being cleaned. Remove as much dirt and visible mold as possible.
2) Apply Concrobium Mold Control on cleaned area until evenly wet.
3) To promote drying and to avoid residue marks, use a clean cloth or paper towel to wipe off excess wetness.
4) Allow treated surfaces to dry completely.

Refer to the Personal Protection Equipment Requirements for Applicator section for the appropriate PPE to wear. Peel back label for additional directions and storage and disposal instructions.

Ready to use – Do not dilute.
Concrobium Mold Control must come in direct contact with mold to be effective.

DIRECTIONS FOR USE (cont’d)
Concrobium Mold Control is designed to be used to prevent and inhibit the growth of mold, fungi and mildew on floors, walls, interior building surfaces, and other hard non-porous surfaces until such time as the cause of such growth can be identified and corrected. This product should be used in those cases when visible mold growth has been detected (or conditions are likely to immediately result in such growth) as part of a comprehensive program that removes the growth and identifies and corrects the conditions that led to that growth, including:

> Periodic monitoring and inspection of conditions favorable to mold growth such as moisture ingress and high relative humidity
> Effectively repairs as necessary to eliminate conditions favorable to mold growth
> Drying of affected areas to below 20% moisture content

The following associations and Internet sites should be consulted for information on standards and guidelines for remedial treatment of mold and mildew:
IAQA – Indoor Air Quality Association (www.iaqa.org)
EPA – Environmental Protection Agency (www.epa.gov)
IICRC – Institute of Inspection, Cleaning and Restoration Certification (www.iicrc.org)

Concrobium Mold Control is suitable for use on most surfaces. If in doubt, perform a test on a small, inconspicuous section. Materials vulnerable to water marks should be wiped away immediately after contact with Concrobium Mold Control. Over-application may in some cases result in residue formation, which can be easily wiped away with a Concrobium Mold Control-dampened cloth.

REAPPLICATION
Repeat application weekly or when growth or odor reappears. Prior to reapplication determine the cause of re-growth and correct that problem.
Reapplication or Concrobium Mold Control may be required if surfaces are washed or painted or are otherwise directly exposed to water.

PERSONAL PROTECTION EQUIPMENT REQUIREMENTS FOR APPLICATORS
For areas less than 30 sq. ft., an N-95 respirator, gloves and goggles/respiratory protection are recommended to avoid exposure to mold or mold spores. If over-exposure occurs, call your poison control center at 1-800-222-1222.
