**ENVIROMENTAL HAZARDS**

This product is toxic to fish and highly toxic to other aquatic organisms including shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply directly to water, or to areas where surface water is present, or to intermittent areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**STORAGE AND DISPOSAL**

Do not contaminate water, foodstuffs, feed or soil by storage or disposal.

**STORAGE**

Store this product in its original container in a dry, cool, secured area.

**DISPOSAL**

Wastes resulting from the use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal in accordance with the requirements of the relevant Federal, state or local procedures.

**EMPTY CONTAINER DISPOSAL**

Do not reuse empty bag. Dispose of empty bag in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**SPILLS**

In case of spill, sweep up material and dispose of material according to product disposal directions listed above.

---

**USE DIRECTIONS FOR TURF**

This product may be used on seeded, sodded, or sprigged lawns and ornamental turfs that are well-established. Initial application of this product should be made only after turfgrasses have developed a vigorous root system, a uniform stand, and have received at least two mowings following seeding, sodding, or sprigging. Use of this product in turf that are not well-established, or by way of weather, pests, disease, chemical, or mechanical influences, may increase the chances of turf failure.

Apply this product only to turfgrass species listed on this label. The following turfgrass species are tolerant to this product when applied as directed:

**USE PRECAUTIONS FOR TURF**

This product may be used on seeded, sodded, or sprigged lawns and ornamental turfs that are well-established. Initial application of this product should be made only after turfgrasses have developed a vigorous root system, a uniform stand, and have received at least two mowings following seeding, sodding, or sprigging. Use of this product in turf that are not well-established, or by way of weather, pests, disease, chemical, or mechanical influences, may increase the chances of turf failure.

Apply this product only to turfgrass species listed on this label. The following turfgrass species are tolerant to this product when applied as directed:

**Precautionary Statements**

- **KEEP OUT OF REACH OF CHILDREN**
- **CAUTION**
- **NOTICE:** Read the entire label. Use only according to label directions. Before using this product, read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies at end of Directions for Use. If terms are unacceptable, return at once unopened.
- **WARNING:** Do not ship or store with food, feeds, drugs or clothing.
- **CAUTION:** Causes Eye Irritation • Harmful If Inhaled
For applications made in the spring or early summer, use an appropriate application rate corresponding to one of the three postemergence control programs listed in Table 1. Specific rates recommendations are based on the user's location (Region), the growing height of the turfgrass, and whether the application timing is considered to be preemergence or early postemergence. The duration of residual weed control provided by this product is directly related to application rate, but will vary depending on weather, weed pressure, turfgrass competitiveness, and the user's location within a region. Use Program 2 for preemergence control at sites where (a) turfgrass is cut relatively low (e.g., golf fairways), and (b) turf maintenance or weed control has been conducted during the previous year. This program provides 4 - 6 months of preemergence crabgrass control. This program may also be used for postemergence control of crabgrass up to the 3-leaf stage or first tiller at sites where turfgrass is cut relatively high (e.g., homeowner lawns).

Use Program 3 for preemergence control at sites where (a) turfgrass is cut relatively low (e.g., golf fairways), and (b) turf maintenance or weed control has been conducted during the previous year. This program provides 3 - 4 months of preemergence crabgrass control. This program may also be used for early postemergence control of crabgrass up to the 3-leaf stage or first tiller at sites where turfgrass is cut relatively high (e.g., residential lawns).

For applications made in the late summer through early fall (late August through November) this product will control or suppress the following weeds in addition to providing preemergence control of crabgrass in the following spring.

Table 1 Recommended Use Rates

Region | Application Rates | Program 1 | Program 2 | Program 3
--- | --- | --- | --- | ---
All states, except NY, and parts of southeastern PA, southern areas of IL, IN, and coastal areas of FL & GA | Echinochloa crus-galli | 100 | 100 | 100
| germination | 100 | 100 | 100
| Echinochloa crus-galli | 120 | 120 | 120
| 6.0 lb/1000 sq ft | 132 | 132 | 132
| 3.0 lb/1000 sq ft | 132 | 132 | 132
| 1.5 lb/1000 sq ft | 132 | 132 | 132

Application Frequency and Timing

Early postemergence weed control with this product is limited to crabgrass. Postemergence application effectively controls crabgrass, but only if application is made prior to the 3-leaf stage of growth or first tiller. For best results, (a) apply weed control at the recommended application rate, (b) do not delay mowing and delay mowing again for a few days after application, (c) avoid applying this product until crabgrass has reactivated growth after rainfall, and (d) avoid overlapping turf areas or neglecting irrigation or fertilization which delay or prevent crabgrass from reactivating growth.

Secondary rates are recommended for preemergence control at sites where (a) turfgrass is cut relatively low (e.g., golf fairways), and (b) turf maintenance or weed control has been conducted during the previous year. This program provides 1 - 2 months of preemergence crabgrass control. This program may also be used for early postemergence control of crabgrass up to the 3-leaf stage or first tiller at sites where turfgrass is cut relatively high (e.g., homeowner lawns).

The maximum use rates for this product are 1 lb ai/acre or more than 790 lb (1.5 lb active ingredient) per acre (18.0 lb per 1000 sq ft) per year if using split or sequential applications.

Do not apply this product until turfgrass has reactivated from the mechanical injury caused by these cultural practices. Use of this product may be applied with drop or rotary-type spreaders designed to apply granular herbicides. For best results, application should be made in the late spring to mid-summer at the recommended rate and when weeds are actively growing. Avoid the use of spreaders that tend to apply granules in narrow rows or concentrated bands. Calibrate the spreader according to the manufacturer's directions. Initial spreader settings may require adjustment to deliver the recommended application rate under actual application conditions. The desired calibration setting may be marked or recorded for future reference. Apply this product uniformly over the treatment area. Do not use of application can usually be achieved by applying one-half of the required amount of product over the treat-ment area and then applying the remaining one-half in a different direction (e.g., at a right angle to the first application), or overlap or stagger applications. Check equipment frequently to verify calibration and proper functioning.

Terms and Conditions of Use

If terms of the following Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies are not accepted, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, all such risks shall be assumed by the buyer.

Warranty Disclaimer

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the uses stated on the label in strict accordance with the directions, subject to the limitations of the clearance guarantee. Seller MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other consequences claimed because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable soil temperature, soil conditions, etc.), unreasonable conditions, unreasonable use, or misuse, or lack of cooperation by the user or other factors, all of which are beyond the control of the Seller. All such risks shall be assumed by buyer.

Limitation of Remedies

The exclusive remedy for losses or damages resulting from this product (including claims based on contract, neg-ligence, warranty, liability, or otherwise), shall be limited to, at Seller's election, one of the following:

1. Refund of purchase price paid by buyer or user for product bought, or 2. Replacement of product at no cost to buyer or user.

Seller shall not be liable for losses or damages resulting from handling or use of this product unless Seller is promptly notified of such loss or damage in writing. In no case shall Seller be liable for consequential or incidental losses beyond the purchase price of the product used.

The terms of the Warranty Disclaimer, Inherent Risks of Use and this Limitation of Remedies cannot be altered, modified, accepted, or negotiated in any way by the buyer or user, nor may the seller be required to do so by law. All rights of the seller is authorized to vary or exceed the terms of the Warranty Disclaimer or this Limitation of Remedies in any manner.
