It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Industrial microbiocide for use in wood and wood products.

**DIRECTIONS FOR USE**

Preservative for Wood and Wood Products: 0.027 - 0.086 GAL (3.4 to 11 FL OZ) per 1000 GAL of solution. Cleawood® AC is recommended for the protection of wood and wood products such as landscape timbers, fences, posts, pilings, cross ties, decks and similar exterior structures, from mold and mildew. Treat pressure-treatment solution in the pressure-treatment process for mold and mildew control. Under extreme mildew conditions, Cleawood AC may be used up to a maximum concentration of 343 ppm product (33 fluid ounces Cleawood AC per 1000 gallons of treatment solution).

This application will afford protection up to 12 weeks and repeated use of solution. Cleawood AC may be used at higher concentrations so long as the end-use product/article contains a maximum concentration of 343 ppm Cleawood AC.

For the control of blue stain, mold and decay of freshly cut lumber and logs: 1 GAL per 3500 GAL of water (286 ppm Cleawood® AC). Treat lumber immediately after it is sawn. Freshly dipped or sprayed lumber must be protected from rain. Dip tanks and drip aprons must be rooted, paved and drained to prevent dilution and loss of stain solution. Aristan treatment concentrations must be geared to achieve protection of the thickest or most valuable item being treated. The concentration of the ready-to-use aristan solution must be adjusted to accommodate seasonal changes in the exposure and species being treated. Dip tanks and spray equipment and metering equipment must be properly maintained. Lumber and logs must be totally immersed or sprayed to ensure all surfaces are treated. Ensure good mixing prior to and during the treatment process. *Not approved for use in the State of California.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARD**

This product is corrosive to mild steel.

**STORAGE AND DISPOSAL**

**PROHIBITIONS:** This product (pH 3.0) is corrosive to mild steel. **PESTICIDE STORAGE:** Do not store or transport in unlined metal containers. Do not contaminate food or feed by storage, disposal or cleaning of equipment. **PESTICIDE DISPOSAL:** Pesticide waste is acutely hazardous. Improper disposal of excess pesticide or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Non-refillable containers (> 5 gallons in size). Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinseate). After emptying and cleaning, it may be allowable to temporarily hold rinseate or other pesticide-related materials in the container. Contact your state regulating agency to determine allowable practices in your state. Empty tote container may be returned to a tote collection agent. Residue removal – Cleaning container before final disposal is the responsibility of the person disposing of the container. To clean container before final disposal, fill container about 10 percent full with water; agitate container vigorously; discard rinseate according to pesticide disposal instructions; repeat this rinsing procedure two more times. Then remove rinsate if available or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. For additional container disposal information, contact product supplier.

**GENERAL:** CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

**ACTIVE INGREDIENTS:**

- Chloro-2-methyl-4-isothiazolin-3-one - 10.60%
- Methylisothiazolinone - 3.50%
- Other Ingredients - 85.90%

**TOTAL:** 100.00%

**KEEP OUT OF REACH OF CHILDREN**

**DANGER - PELIGRO**

See Side panel for additional precautionary statements

**FIRST AID**

If In Eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, than continue rinsing.
- Call a poison control center or doctor for treatment.

If Swallowed:

- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Call a poison control center or doctor immediately for treatment advice.

If On Skin:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment.

If Inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment.

To note to physician:

- Probable mucosal damage may contaminate the use of gastric lavage.

**PRECAUTIONARY STATEMENTS:**

Hazards to Humans and Domestic Animals

**DANGER**

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed or absorbed through skin. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Do not breathe vapor or spray mist. Avoid contact with skin. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Remove contaminated clothing and wash before reuse.

**PERSONAL PROTECTIVE EQUIPMENT (PPE):** Mixers, loaders, and others exposed to methylisothiazolinone must wear:

- Coveralls over long-sleeved shirt and long pants
- Socks and chemical resistant rubber shoes
- Goggles or face shield
- Chemical-resistant gloves (such as rubber or made out of any waterproof material)
- A respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number pretex TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number pretex TC-145), or NIOSH approved Respirator with an organic (OV) cartridge or canister with any P, R, or P, R, or HE prefilter.

In addition, mixers and loaders and persons cleaning equipment must wear a chemical-resistant apron.

**CONDITIONS OF SALE AND WARRANTY**

Manufacturer/supplier warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label and is usually used in accordance with the directions under normal conditions of use. MANUFACTURER/SUPPLIER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of Manufacturer/supplier. Risks such as ineffectiveness or other unintended consequences resulting from, but not limited to, failure to follow label directions will be assumed by the Buyer or User. IN NO CASE WILL MANUFACTURER/SUPPLIER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT.

**UN 2922, CORROSIVE LIQUID, TOXIC, N.O.S.**

[mixture containing 5-Chloro-2-methyl-4-isothiazolin-3-one and 2-Methyl-4- isothiazolin-3-one (3:1)], 8 + 6.1, PG-II
