Environmental Hazards
This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, ditches, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permit authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Do not store on site. Avoid creating or impacting of side walls.

Pesticide Disposal: Pesticide wastes are acutely hazardous, improper disposal of excess pesticide, spray mixture or residue is a violation of Federal Law. Do not allow wastes to be disposed of by use according to label instructions, contact your State or Environmental Protection Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Rinse container as follows: Empty the remaining contents into an application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirculate for 10 seconds. Follow pesticide disposal instructions for rinseate. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by state and local authorities by burning. If burned, stay out of smoke.

Directions for Use
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not use in greenhouses where food crops are grown. For treatment of ornamentals in greenhouses only. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only apply products that are labeled for use in greenhouses and parks.

General and Microbial Control
Pythium Control in Irrigation Systems - “End of Season”
1. Rinse irrigation lines of debris prior to cleaning by filling them with 1.25 fl oz. of SPACE 49 Inc. STRIP-IT™ per gallon of water.
2. Allow STRIP-IT™ to sit for up to 12 hours before flushing with clean water.
3. Fill irrigation system with KleenGrow® at 0.5 oz. per gallon of water and allow system to sit for at least 10 minutes.
4. Drain lines thoroughly, allow to dry and then recharge with nutrient solution.

Disinfection of Hard, Non-Porous Surfaces
Use 1.6 oz. of KleenGrow® per gallon of water. Apply solution with a cloth, mop, sponge, co-spray device or by immersion to previously cleaned surfaces. Allow solution to remain on surfaces for up to one (1) hour. Evaluate removal of all visible contaminants and reapply solution if necessary. Surfaces must remain wet for 10 minutes. Wipe dry with a clean cloth or sponge or allow to air dry. Prepare a fresh solution daily or more often if solution becomes visibly discolored or soiled.

Disinfection of Packaging Facility and Equipment
Remove debris and thoroughly clean all surfaces of packaging equipment with soap or detergent and rinse with water. Saturate all surfaces with a solution of 1.0 fl. oz. of KleenGrow® per gallon of water for 10 minutes. Wipe dry with a clean cloth or sponge or allow to air dry. Ventilate closed spaces. If treated surfaces will contact food, thoroughly rinse surfaces with potable water.

Disinfection of Trucks and Transportation Equipment
Remove debris and thoroughly clean all surfaces of trucks and other transportation equipment with soap or detergent and rinse with water. Saturate all surfaces with a solution of 1.0 fl. oz. of KleenGrow® per gallon of water for 10 minutes. Wipe dry with a clean cloth or sponge or allow to air dry. Ventilate closed spaces. If treated surfaces will contact food, thoroughly rinse surfaces with potable water.

Precautionary Statements
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage. Causes skin burns. Do not get in eyes, on skin or clothing. Harmful if swallowed or absorbed through the skin. Wear protective eyewear (goggles, face shield or safety glasses), protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment (PPE)
Applicators and other handlers must wear protective eyewear, long pants and long-sleeved shirt, shoes plus socks and chemical resistant gloves. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Requirements: Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove PPE clothing immediately if the pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Algae, Fungus and Odor Control in Evaporative Cooling Pads
Add 0.03 to 0.25 fl. oz. of KleenGrow® per gallon of water to evaporative cooling pad systems once a month to control algae and biofilm growth. CONTROL OF FUNGAL AND BACTERIAL DISEASES ON ORNAMENTAL CROPS:
Do not apply to fruits or vegetables or other food crops. This product is to be used in greenhouses and not outdoors. Do not spray directly on fruits and vegetables. Do not apply to tools or equipment that will contact food.

Borrelia, Powdery Mildew, Downy Mildew, Fusarium, Xanthomonas, Thiophiaviotia, Fusarium and Bacterial Leaf Spots and Blights for Ornamental Plants, Nursery Stock and Barn Roof Cuttings - Foliar Spray
Apply KleenGrow® starting at Week 3 or earlier conditions are favorable for disease. Use a watering device to spray the top and bottom of the leaves and stems, avoiding other fungal organisms up to 0.3 fl. oz. per gallon of water (25 to 230 ppm w/v) every 14 days. Apply KleenGrow® with a direct spray every 14 days to prevent the spread of spores and the build-up of organic material. Remove severely infected plants and discontinue the area with 1.0 fl. oz. KleenGrow® per gallon of water.

Borrelia Control for Ornamental Plants - Fogging in Coolers (Not to be used on food crops within coolers or vegetables greenhouses applications)
Use fogging equipment to control borrelia on cut flowers and potted plants in coolers with a rate of 0.25 - 0.50 fl. oz. per gallon of water.

Root Rot - Thielaviopsis, Pythium, Rhizoctonia, Phytophthora - Preventive Drench
Apply KleenGrow® by injecting 0.06 to 0.05 fl. oz. per gallon of water (50 to 200 ppm) on one or two weeks, making sure that the root zone completely wet with solution. KleenGrow™ drench can be done with filter injector pumps, automatic dosing pumps or for smaller operations, by hand using pressure gloves.

Seed, Bulb and Corn Root Dip (pre-planting) - Borrelia, Rhizoctonia, Fusarium, Penicillium, Erwinia, Pseudomonas
For control of Borrelia, Rhizoctonia, Fusarium and Penicillium bulb and root infections, use 0.06 to 0.05 fl. oz. per gallon of water (50 to 200 ppm) on one or two weeks, making sure that the root zone completely wet with solution. KleenGrow™ drench can be done with filter injector pumps, automatic dosing pumps or for smaller operations, by hand using pressure gloves.

NOTE: KleenGrow® may be phototoxic to some ornamental plants and phototropism may develop after repeated applications in a short time interval. A filter spray or drench is recommended before treating the entire crop, especially when using the higher concentration. Use caution on young seedlings or tender young growth.

EPA Registration: 81200-2 EPA Establishment: No. 50728-CH-01
MET CONTENTS: 5 gallons (18.9 liters)
