PROCESS YELLOW = WHITE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions
When used indoors: Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not enter or allow others to enter the treated area until the sprays have dried. Do not allow others to enter treated areas until vapors, mists and aerosols have dispersed, and the treated area has been thoroughly vented. Wait 2 hours after application, then open windows, vents and doors for 2 hours. If an odor is still detected, additional ventilation is required. Remove pets/birds and cover fish aquariums and ornamental fish ponds before spraying, and turn off aquarium systems. Do not apply when food is present. Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Service areas are where prepared foods are served, such as dining rooms but excluding areas where foods may be prepared or held. Non-food areas are areas such as garbage rooms, lavatories, entries, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage areas (after bottling or canning). When used outdoors: Do not water the treated area to the point of run-off. Do not make applications during rain. Application is prohibited directly into sewers or drains or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses: 1) Treatment to soil or vegetation around structures; and 2) Applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack-and-crevice applications.

For Control of Nests of Hornets, Wasps and Yellow Jackets: The best time to spray the nest is in the early morning or early evening, when air temperature is cooler and most insects are in the nest and little activity is observed around the nest opening. Spray only if the air is still. Stand at a safe distance from the nest, not directly under it. Hold container upright at arm's length, point the actuator at the nest and first spray in the opening of the nest, then spray the rest of the nest until saturated. Treated insects may fall out of the nest and die. Any insects returning to the nest after treatment will be killed. Wait 48 hours before removing the hose. Hose off foliage of desirable plants that are contacted with spray. This product may stain or adversely affect vinyl, painted and plastic surfaces. Avoid application to asphalt roofing shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Keep in a cool, dry, well-ventilated area, away from children, food and feed. Do not store in a manner that will allow contact to contaminate food or feed. Do not store in unapproved containers. Pesticide Disposal: Do not reuse containers. Do not puncture or incinerate. Do not mix with other materials, except as specified in the directions for use. Do not allow contamination of130°F may cause bursting.

If partly filled:
Call your local solid waste agency for disposal instructions.

FIRE AND EXPLOSION HAZARDS
This product is flammable. Keep out of reach of children. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.
