PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
CAUTION Harmful if swallowed. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Thoroughly wash with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Wear long sleeved shirt and long pants, socks and shoes, and chemical-resistant gloves (such as latex or made of other non-porous material, selection category A). Wash contaminated clothing prior to reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water bodies where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment, washwater or rinse.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a dry place inaccessible to children and pets.

Container Disposal: Non-refillable container; do not reuse or refill this container. Completely empty bags then offer for recycling, if available, otherwise dispose of empty bag in a sanitary landfill; or incineration.

NET WT. 50 LBS. (22.7kg)

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its label. Apply this product only for the sites, pests and application methods specified on this label.

Important: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:
1. Store product not in use in locations out of reach of children, pets and other animals.
2. Apply bait in locations out of the reach of children, pets, domestic animals and non-target wildlife.
3. Dispose of product container, unused, spoiled and ununseamed bait as specified on this label.

Use Restrictions: For control only of Rats only Pocket Gophers (Plague species and Thomomys sp.) in and bordering crops (alligator, hognose, tapir, lizards, and lizards; raccoons, hogs and porcine animals). Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not apply bait above ground. Remove or bury any bait spilled on the ground during application.

Endangered Species Considerations: Do not use this product within prairie dog towns within the range of the black-footed ferret without first contacting endangered species specialists. U.S. Fish and Wildlife Service, Denver Regional Office. Do not use this product within any area of critical areas of the San Joaquin Kit Fox. In the following California counties: Fresno, Kern, Kings, Merced, Monterey, San Benito, Santa Barbara, San Luis Obispo, Tulare and Ventura. Prior to use, contact endangered species specialists at the Department of Fish and Game or the U.S. Fish and Wildlife Service, Portland Regional Office, for recommendations. To review endangered species within your state and county, log on to www.oes.gov, at the top of the page use the drop down menu to select your region; then select endangered species or ecological services (depending on the region); next search for the list of species by state or county, review list of endangered species for that area. Selection of Treatment Areas: Pocket gophers throw out law. Sun-shaped mounds of earth from their under- ground tunnels. The tunnel entrance is plugged with soil and is found near one edge of the mound. The mounds are usually at the end of short lateral tunnels which connect with the main burrow system. The main burrow is typically about 18 inches from the mound and within 10 inches of the surface. A single gopher burrow system will be about 50 feet in diameter. Application Directions: For use in machine applications using burrow building equipment. Adhere to manufacturer’s instructions for the equipment used to apply Kapta-D. Construct artificial burrows at the same depth as existing gopher tunnels, spaced about 20-30 feet apart. Apply at the rate of 8 to 10 bags per acre. Apply only when soil conditions allow for the formation of good artificial tunnels. Collect and dispose of spilled bait according to this label.
