First Aid

If in eyes • Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing • Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed • Call poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow. Do not induce vomiting unless in do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If inhaled • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage.

Environmental Hazards

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Storage and Disposal

Pesticide Storage: Store only in original container. Keep product dry in tightly closed containers when not in use and under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixtures, or contaminated containers is a violation of Federal Law. Do not dispose of these wastes in the environment. Call your local waste services for possible reuse or recycling options. Do not contaminate water, food, or feed by storage or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling, incineration, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Purchaser must be able to use Chlorine Test Kit to make sure available chlorine level does not fall below 50 ppm or above 100 ppm. Prepare a sanitizing solution by dissolving 1 oz. of PCS per 10 gallons of water. This gives a solution containing 100 ppm available chlorine. See additional precautions on side panel.
PCS is recommended for use on hard (non-porous) surfaces or on dishes, glasses, or food processing equipment or utensils, including dairy and bakery equipment and utensils.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Danger. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles or face shield, use rubber gloves, and use only thoroughly clean, dry utensils when handling.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into lakes, streams, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into lakes, streams, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into lakes, streams, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

CHEMICAL HAZARDS: Danger. Strong oxidizing agent. Mix only with water. Use only clean, dry utensils. Contamination with moisture, organic matter or other chemicals (including pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire or explosion. Avoid any contact with flaring or burning material, such as a lighted cigarette. PCS decomposes at 460-500°F with liberation of heat and harmful gases. Do not use PCS in any chlorinating device which has been used with any inorganic or unstable chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion.

EMERGENCY HANDLING: In case of contamination or decomposition of product, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store only in original container. Keep product dry in tightly closed containers when not in use and under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray drift, or waste rinse water may violate federal law. PCS wastes cannot be disposed of by use according to labeling instructions, contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Non-refillable container. Do not re-use or refill this container. Triple rinse container promptly after emptying. Triple rinse container as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ½ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse in a safe place for later use or discard. Drain for 10 minutes. If flow begins to drip, repeat this procedure two more times. Then offer for recycling, if available, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Purchaser must be able to use Chlorine Test Kit to make sure available chlorine level does not fall below 50 ppm or above 100 ppm. Prepare a sanitizing solution by dissolving 1 oz. of PCS per 10 gallons of water. This gives a solution containing 100 ppm available chlorine. Contaminated water is prior to using large volumes of water. Do not use the solution to sanitize dishes, glasses, equipment or utensils in the solution or spread it over the surface to be sanitized. Follow standard disinfectant or sanitizing procedures used in the food service industry. Recycle off for 2-3 minutes and spray type machines providing 2-5 minutes contact time for sanitizing. The items are then ready for use. The sanitizing solution should be used promptly after mixing.
