**LICE SOLUTION KIT**

**THE ALL IN ONE LICE CONTROL**

1-2-3 Lice Control System

**STEP 1 TREAT**
- Apply Lice Treatment Shampoo according to directions.
- Apply Lice Treatment Gel to hair and scalp to help prevent re-infestation.

**STEP 2 COMB OUT**
- After Step 1, comb out the eggs and lice from the head with a fine-toothed comb or with the comb included.
- Keep Lice Egg Removal on stand-by to make removing eggs easier.
- For household items: Remove bedding, linens and other non-washable items.

**STEP 3 CLEAN**
- Wash bed, clothing, and other items in hot water and remove soiled bedding, laundry and other items.

IMPORTANT: Read detailed directions before using this product. Sprayed or treated surfaces must be left to dry before re-use. Never leave items treated with this product in contact with other household items.

**LICE KILLING SHAMPOO**

**DIRECTIONS FOR USE**
- Wash hair thoroughly with warm water to form a lather, shampoo, then rinse thoroughly with warm water after you have applied Lice Killing Shampoo.
- Apply this product to one section of damp hair at a time. Massage well to ensure product covers the scalp and remains for 10 minutes, but no longer than 20 minutes.
- Towel dry hair and comb out tangles with regular comb.
- If either lice or nits are found, treat with this product according to directions.
