Contans® WG
Biological Fungicide

For agricultural, greenhouse and nursery uses to reduce/control Sclerotinia sclerotiorum and Sclerotinia minor in the soil.

ACTIVE INGREDIENT:
Coniothyrium minitans strain CON/M/91-08 ............................... 5.30%
OTHER INGREDIENTS: ............................................................. 94.70%
TOTAL: .............................................................................. 100.00%

Contains a minimum of 1 x 10^9 cfu/gram

The active ingredient of Contans WG is exempt from the requirement of a tolerance for residues in and on all food commodities, and can be used in any agricultural soil without rotational crop restrictions.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
If swallowed
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If on skin or clothing
• Remove contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Harmful if swallowed, if absorbed through skin or inhaled. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.

**Agricultural Use PPE**

Applicants or other handlers must wear long sleeved and long cuffed shirts, waterproof gloves and shoes plus socks. All equipment operators and applicators must wear a dust mask, eye protective gear, rubber boots, and face guards.

**ENVIRONMENTAL HAZARDS**

Do not apply when weather conditions are expected to be conducive for disease development, or if the field has a history of disease development, if the fields is shared with susceptible to Sclerotinia sclerotiorum and Sclerotinia minor are present.

**DIRECTIONS FOR USE**

Do not use this product in a manner inconsistent with its labeling. For all requirements specific to your state or tribe, consult the agency responsible for pesticide registration. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area.

**Agricultural Use Requirements**

Use Rate/ Application

- When applying Contans WG post harvest and prior to replant of a susceptible crop, use a rate of 1 to 2 lbs.
- When applying Contans WG prior to disease infection to obtain optimal efficacy.

**Use Ratement or disposal of equipment washwaters.**

**Do not tank mix with other fungicides.**

**Rotation with other fungicides is allowed after 3 weeks following application of this product.**

**CHEMICAL INSTRUCTIONS**

Application through sprinkler: Contans WG may be applied through sprinkler (overhead) systems used for applications on fields where there is a potential for drift. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located at the discharge of the injection pump and connected to the system interlock. This valve must be withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlock controls to automatically shut off the pesticide injection pump in the event the water pump motor stalls.

The irrigation line or water pump must also contain a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where there is no longer a possibility of drift.

Systems must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed factors drift beyond the area intended for treatment.

**STORAGE AND DISPOSAL**

Do not contain water waste or food by storage or disposal.

**PESTICIDE STORAGE**

Store in a cool place out of direct sunlight and away from heat sources at approximately 37°F. Keep from open or damaged containers. Do not store directly in the sun or in direct sun's heat and solar rays. Do not store in direct sunlight or near extreme temperature conditions.

**CONTAINER HANDLING**

Non-refillable contains. Do not reuse or refill this container.

Bag: Completely empty bag into application equipment. Then offer for recycling if available or dispose of container in a sanitary landfill or by incineration, or as allowed by state and local authorities, by burning if burned, or stay out of stack.

Plastic Container: Clean container promptly after emptying. Triple rinse as follows: Empty the remaining liquid from the container. Pour at least 3 quarts of water into the container, agitate for 10 seconds to 1 minute, then drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use.

WARRANTY: PROPHYS Biologischer Pfanzenschutz GmbH warrants that the product conforms to the low or no loss standard and is responsible for its performance under the following normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to the labeled instructions; the buyer assumes the risk of any loss.
