Expanded postemergence application window and increased use rate in soybean

This supplemental label expires April 1, 2016, and must not be used or distributed after this date.

Active Ingredient*: dimethenamid-P: (S)-2-chloro-N-[(1-methyl-2-methoxy)ethyl]-N-(2,4-dimethyl-thien-3-yl)-acetamide .......... 63.9%
Other Ingredients**: .......................................................... 36.1%
Total: .................................................................................. 100.0%

* Contains 6.0 pounds of active ingredient per gallon
** Contains petroleum distillates

EPA Reg. No. 7969-156

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Outlook® herbicide container label, EPA Reg. No. 7969-156, must be in possession of the user at the time of application.
- Read the label affixed to the container for Outlook before applying.
- Use of Outlook according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Outlook.

Product Information

Outlook is a selective residual herbicide for controlling annual broadleaf weeds, annual grasses, and sedges. Emerged weeds will not be controlled and must be controlled with an appropriate postemergence herbicide. Refer to Table 1 on the Outlook container label for a complete list of weeds controlled.

Application Information

Outlook may be applied preplant surface, preplant incorporated, preemergence, or postemergence [from emergence (cracking stage) to fifth-trifoliate leaf stage] to soybean.

If Outlook is applied preplant incorporated, incorporation must be uniform and shallow (upper 1 to 2 inches of soil). Deeper incorporation may reduce weed control or increase the potential for crop injury. Preplant incorporated treatments are not for use on coarse soils with less than 1.5% organic matter.

If extreme conditions of high rainfall and extended periods of water-saturated soil occur during soybean germination or early seedling development, Outlook use may result in temporary growth suppression.

Temporary soybean burn and/or stunting may occur with postemergence applications of Outlook. Tank mixtures with other herbicides not listed in the Soybean Tank Mixes section and/or spray adjuvants may increase the level of crop injury. Crop injury is typically transient and has not resulted in reduced soybean yield potential.

Application Rates

Outlook may be applied in a single application or two split applications.

Outlook maximum use rates in a single application are 12 to 18 fl ozs/A on coarse-texture soils and 14 to 21 fl ozs/A on medium-texture or fine-texture soils, but are also influenced by soil organic matter content. Refer to Table 2 on the Outlook container label for specific maximum use rates of Outlook depending on soil type and organic matter content. If Outlook is applied only as a single application, DO NOT exceed 21 fl ozs/A.

BASF Corporation
26 Davis Drive, Research Triangle Park, NC 27709
If Outlook® herbicide is applied in two split applications, maintain a minimum of 14 days between split applications and DO NOT exceed a seasonal total of 24 fl ozs/A of Outlook. If two applications are made, apply no more than 8 to 16 fl ozs/A during the first application (applied preplant, preemergence, or postemergence); then apply the remainder (8 to 16 fl ozs/A) of the seasonal maximum rate during the second application (postemergence).

Crop-specific Restrictions and Limitations

- DO NOT graze or feed forage, hay, or straw to livestock.
- DO NOT use Outlook in soybean in California.

Soybean Tank Mixes

Outlook may be tank mixed or applied sequentially in soybean with one or more of, but not limited to, the following herbicide products according to the specific tank mixing instructions in this label and respective product labels:

- Extreme® herbicide
- OptTill® powered by KIXOR® herbicide
- Poast® herbicide
- Prowl® H2O herbicide
- Pursuit® herbicide
- Raptor® herbicide
- Scepter® herbicide
- Sharpen® powered by KIXOR® herbicide
- Verdict® powered by KIXOR® herbicide
- glyphosate
- Gramoxone Inteon® herbicide
- Touchdown® herbicide

1 Includes postemergence tank mixes on Roundup Ready® (glyphosate-tolerant) soybean varieties
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
