DESCRIPTION: TB-Cide Plus II® is a ready-to-use, broad-spectrum disinfectant containing 3% sodium hypochlorite. It is effective against a wide range of pathogens, including bacteria, viruses, fungi, and some spores. It is designed for use in hospital and institutional settings to control biological contamination, particularly in areas where there is an expected likelihood of blood or body fluid exposure. TB-Cide Plus II® is effective against avian influenza virus, adenovirus type 2, methicillin-resistant Staphylococcus aureus, gentamicin-resistant Staphylococcus aureus, and vaccinia virus, among others.

DIRECTIONS FOR USE:
1. Before use, ensure that the areas to be disinfected are clean. TB-Cide Plus II® is effective in 1:256 dilution. Apply with cloth, sponge, mop or mechanical spray device, making sure all surfaces are wetted thoroughly. Allow surfaces to remain wet for 10 minutes. All surfaces must be rinsed with clean water and allowed to air dry.

2. TB-Cide Plus II® is recommended for use on precleaned, hard, non-porous, inanimate surfaces. It is suitable for use in operating rooms, intensive care units, emergency areas, patients' rooms and rest rooms. It is effective on stainless steel, aluminum, chrome, vinyl and glass.

3. TB-Cide Plus II® should be used in area with standard air exchange or equivalent ventilation. It is also recommended for use in areas where there is an expected likelihood of blood or body fluid exposure. It is effective against avian influenza virus, adenovirus type 2, methicillin-resistant Staphylococcus aureus, gentamicin-resistant Staphylococcus aureus, and vaccinia virus, among others.

PRECAUTIONARY STATEMENTS:
1. TB-Cide Plus II® is corrosive. Causes irreversible eye damage or skin burns. Harmful if swallowed or absorbed through the skin. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or EPA Office for disposal information.

2. TB-Cide Plus II® is a liquid containing sodium hypochlorite, which is a caustic material. Sodium hypochlorite is harmful if swallowed or absorbed through the skin. It is corrosive and causes irreversible eye damage or skin burns. It is harmful if swallowed or absorbed through the skin. It is corrosive and causes irreversible eye damage or skin burns.

3. TB-Cide Plus II® is a liquid containing sodium hypochlorite, which is a caustic material. Sodium hypochlorite is harmful if swallowed or absorbed through the skin.
