Probable mucosal damage may be transmitted to others through respiratory droplets, through contact with mucous membranes, or through contact with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type I (HIV-1 Associated AIDS) or HBV (Hepatitis B Virus).

To kill HIV-1 in 5 minutes at room temperature (20-25°C): Herpes simplex virus Type 2, Influenza A2/Japan, HBV (Hepatitis B Virus) inanimate surface/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type I (HIV-1 Associated AIDS) or HBV (Hepatitis B Virus).

For HBV, use concentration of 10 oz per gallon (10 parts per 118 parts) of cold tap water. Apply to hard, non-porous surfaces.

Caution: If skin or clothing comes into contact with products, wash clothing and skin thoroughly with soap and water immediately. If skin irritation occurs and continues, consult a physician.

FIRST AID

If swallowed: Do not induce vomiting. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, unresponsive, unconscious person.

For treatment advice. Have person sip a glass of water if able to swallow water. Do not give anything by mouth to an unconscious person.

If eye contact occurs: Rinse eyes immediately with plenty of water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further advice.

If skin contact occurs: Wash thoroughly with soap and water. If irritation or sensitization occurs, call a poison control center or doctor for further advice.

If inhaled: Remove person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, unresponsive, unconscious person.

For treatment advice. Have person sip a glass of water if able to swallow water. Do not give anything by mouth to an unconscious person.

IN CASE OF SPILL:

If Empty

If used as directed, this product is not flammable. Avoid direct contact with external heat sources. For non-food use only.

Safe for use directly on tile, grout, ceramic, porcelain, fiberglass, plastic, and stainless steel. Use with caution on finishes and painted surfaces, and in carpeted areas. Do not use on marble, granite, on unfinished wood, or on leather.

Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks and eye protection when using the product, especially when mixing or cleaning and other body fluids are present. Avoid contact with mucous membranes. When inhaled or ingested, flush with water before medical assistance is given in directions for use. Perform first aid immediately. Information for first aid procedures given on this label. For HBV, use concentration of 10 oz per gallon (10 parts per 118 parts) of cold tap water. Apply to hard, non-porous surfaces.

CONCENTRATE 18™

The product is not to be used as a TURBING, STERILANT, DETERGENT or DIRT REMOVER. If the label so directs, use the product as directed for the stated application. This product is not intended for household or industrial use directly on tile, grout, ceramic, porcelain, fiberglass, plastic, and stainless steel. Use with caution on finishes and painted surfaces, and in carpeted areas. Do not use on marble, granite, on unfinished wood, or on leather.

WEAR APPROPRIATEbard protection when using this product:

• Latex or nitrile gloves
• Rubber apron or overall clothing
• Heavy duty reusable masks and eye coverings.

MANUAL AND DISPENSER DILUTIONS

Oxidizing Multi-Purpose Cleaner, Degreaser & Sanitizer (Non-Food Contact Surfaces) Virucide & Deodorizer for Hard, Non-Porous Surfaces, Carpet Extraction for Cleaning, Deodorizing, and Killing Odor Causing Bacteria

DIRECTIONS FOR USE:

Add 10 oz. of EnvirOx Concentrate 118 Manual & Dispenser Dilution (10 parts to 118 parts) of cold tap water. To kill HBV in 5 minutes at room temperature (20-25°C) on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids:

• Bonnet cleaning solution for carpets
• Urine and garbage odor eliminator
• Pre-spray for carpet extraction

To USE AS A SANITIZER AND VIRUCIDE IN BATHROOMS:

For general disinfecting and decontamination against HBV, use a concentration of 1 Oz. of EnvirOx Concentrate 118 Manual & Dispenser Dilution per gallon (1 part to 127 parts) of cold tap water. To kill HBV in 5 minutes at room temperature (20-25°C) on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids:

• Cleans mold & mildew stains
• Heavy carpet spot remover
• Bonnet cleaning solution for carpets
• Urine and garbage odor eliminator
• Pre-spray for carpet extraction

Notes:

When used on food contact surfaces, always use in conjunction with an approved Sanitizer. Not for use on marble, granite, stainless steel or plastic.
