Poultry Protector™ is an all-natural solution to the common problem of mites, lice, fleas, and ticks in the backyard flock. The natural enzymes in Poultry Protector™ clean away these pesky bugs safely, without the use of harsh chemicals found in so many other insect treatment products. Ridding the coop of these pests helps reduce stress and makes your birds more comfortable so they can do what they do best: lay beautiful eggs, grow, and flourish.

ACTIVE INGREDIENTS: Potassium Sorbate .1% by weight
INSERT INGREDIENTS: Water, Yeast, Citric Acid .99%
TOTAL: 100%

APPLICATION RATE:
The product requires dilution prior to use. Mix with warm, fresh water (75°F - 90°F) according to the chart below.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Severe Infestation</td>
<td>10 to 25 fl. oz.</td>
<td>1 gal</td>
</tr>
<tr>
<td>Average Infestation</td>
<td>6 to 12 fl. oz.</td>
<td>1 gal</td>
</tr>
<tr>
<td>Light Infestation</td>
<td>4 to 8 fl. oz.</td>
<td>1 gal</td>
</tr>
</tbody>
</table>

DIRECTIONS FOR USE:
To get started:
• Use MannaPro Mist (see mix) for application.
• Remove bedding material.
• Spray entire habitat (top, sides, and surrounding grounds) with a fine mist.
• Replace bedding with new material before introducing birds.
• Repeat the process periodically to maintain appropriate cleanliness.

CAUTION: Keep out of reach of children. The contents of this bottle are highly concentrated. In case of eye contact, rinse with water. Should any irritation occur, seek medical attention. Do not ingest. Use only as directed. Buyer assumes all responsibility when not used as indicated.

Storage: Store Poultry Protector™ in its original container in an area inaccessible to children and pets. Do not reuse empty container. Place in trash or offer for recycling if available. Keep from freezing.

Birds: Poultry Protector™ can be sprayed directly onto your birds as often as desired. Keep spray away from the eyes to avoid irritation. To avoid potential chilling and associated stress, Poultry Protector™ is not recommended for birds under 10 days of age, extremely sick or debilitated birds. For best results, ensure that Poultry Protector™ thoroughly coats the birds’ skin by manually displacing the feathers or inverting birds completely during application. Spray chest, behind the head, under wings and around vent. For severe infestations or directions for dipping birds, please visit www.mannapro.com or call 1-800-601-5908.
