**PRECAUTIONARY STATEMENTS**

**Hazardous to humans and domestic animals.**

Caution: Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**INHALATION:**

Remove victim to fresh air. If breathing or heart has stopped, give artificial respiration immediately. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**INGESTION:**

Rinse skin immediately with plenty of water for 15-20 minutes.

**Eyes:**

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Do not give anything by mouth to an unconscious person.

**IN CASE OF ACCIDENTAL CONTACT WITH SKIN:**

Rinse skin immediately with plenty of water for 15-20 minutes. Wash with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove any restrictive clothing before washing of contaminated clothing.

**IN CASE OF ACCIDENTAL CONTACT WITH CLOTHING:**

Wash clothing promptly. Wash clothing before wearing or storing.

**IN CASE OF INHALATION:**

Get person into fresh air. If not breathing, give artificial respiration immediately. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IN CASE OF EXPOSURE TO THE EYES, NOSE, OR MOUTH:**

Rinse skin immediately with plenty of water for 15-20 minutes. Rinse skin immediately with plenty of water for 15-20 minutes.

**IF ON CLOTHING:**

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Hold eye open and rinse slowly and gently with water for 15-20 minutes. Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

IF ON SKIN OR CLOTHING:

Handle with care. Avoid contact with eyes, nose, or mouth.

**IF INHALED:**

Get person into fresh air. If not breathing, give artificial respiration immediately. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF SWALLOWED:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF ON CLOTHING:**

Wash with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove any restrictive clothing before washing of contaminated clothing.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.

**IF INHALED:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF IN EYES:**

Rinse skin immediately with plenty of water for 15-20 minutes. If on skin, wash skin with soap and water. If on clothing, remove clothing and wash clothing promptly.

**IF INHALED OR IN EYES:**

Do not give anything by mouth to an unconscious person. Consult local and state regulations governing use in areas such as food processing plants and retail food areas.
FOR INDOOR COCKROACH AND CRICKET CONTROL:

Insect Growth Regulators (IGR) can be used in addition to or in conjunction with a residual insecticide to slow down and eventually eliminate cockroaches and crickets. NyGuard EZ1 IGR Concentrate is mixed with water and applied with spray equipment such as a pressure sprayer or ULV aerosol sprayer. NyGuard EZ1 IGR Concentrate is effective against both adult cockroaches and crickets, and fast-acting adulticides. Application should also be made into cracks and crevices around insulation. Repeat treatments may be required after several days or weeks, when the population is re-established. Maintaining a year-round treatment program will prevent background populations from reaching problem levels.

FOR CONTROL OF FLYING INSECTS (such as Flies, Mosquitoes, and Gnats):

GENERAL SURFACE APPLICATIONS: Use NyGuard EZ1 IGR Concentrate to control flying insects in food handling establishments, restaurants, or other areas where foods are commercially prepared or served. Special attention should be paid to hiding places such as beneath sinks, behind and beneath stoves and refrigerators, cracks and crevices, around garbage cans, corners, along the sides of heating devices, door and window sills, doors and window frames and doors, animal feeds, and drains, plumbing, bedding, storage, garbage, and other animal used areas where insects are hiding and where NyGuard EZ1 IGR Concentrate can reach all areas of an insect’s life cycle. NyGuard EZ1 IGR Concentrate can also be applied to walls and floors at cleanout, before reintroduction of animals from immediate treatment area and old litter. Surface treat immediately after animals are removed from area. Apply product at the rate of 2 fluid ounces diluted in one gallon of water per 1,000 square feet to floor areas and to walls, posts, and cage framing (birds grown in cages only).

FOR COMPANION ANIMALS AND AVIARY USES:

NyGuard EZ1 IGR Concentrate causes a decrease in the number and hatching of eggs laid by treated adults. NyGuard EZ1 IGR Concentrate insect growth regulator will result in a reduction in the number and hatching of eggs laid by treated adults. NyGuard EZ1 IGR Concentrate may be used for control of insect pests in those areas in and around residential and commercial livestock housing, including poultry houses, pet kennels, and travel-related areas of farms. It is also highly effective against stored product insects in food storage areas.

TREATMENTS TO INTERIOR AREAS AND SUFRACES: Use 1 fluid ounce of NyGuard EZ1 IGR Concentrate per gallon of water and apply to 1,000 square feet of surface area in sufficient volume to achieve adequate coverage. Treat all areas where flying insects may collect, rest and breed. In Veterinary medicine, animals cannot be treated with an adulticide prior to NyGuard EZ1 IGR Concentrate. NyGuard EZ1 IGR Concentrate is not labeled for use with any other insecticide. NyGuard EZ1 IGR Concentrate insect growth regulator will result in a reduction in the number and hatching of eggs laid by treated adults. NyGuard EZ1 IGR Concentrate may be used for control of insect pests in those areas in and around residential and commercial livestock housing, including poultry houses, pet kennels, and travel-related areas of farms. It is also highly effective against stored product insects in food storage areas.
