WYSIWASH® Sanitizer is protected by U.S. Patent #5,411,073

RINSE METHOD

SANITIZATION OF NONPOROUS NON FOOD CONTACT SURFACES:

- Using a suitable chemical feed dispenser, dissolve and dose the chlorinated
  solution until a concentration of 100 ppm is achieved.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES:

- Dissolve the WYSIWASH® Sanitizer in water. Using a suitable chemical feed dispenser,
  dissolve and dose the chlorinated solution until a concentration of 100 ppm is achieved.

FIRST AID:

- For additional protection of skin, wear long sleeves and long pants.
- Wear goggles and use rubber gloves.
- Do not handle with bare hands.
- Do not get in eyes, on skin, or on clothing.
- Only use utensils that are thoroughly clean and dry.
- Remove and wash contaminated clothing before reuse.
- m be fatal if swallowed. Irritating to nose and throat.

DANGER: Highly corrosive. Causes skin and eye damage.

NOTE TO PHYSICIAN:

- May be fatal if swallowed. Irritating to nose and throat.
- Probable indication the use of gastric lavage.

Toll-Free

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES:

RINSE METHOD
A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that the available chlorine does not drop below 50 ppm. Using a suitable chemical feed dispenser, dissolve and dose the chlorinated solution until a concentration of 100 ppm is achieved.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight. Sanitizers used in automated systems may be used for general cleaning but may not be reused for sanitizing purposes.

This pesticide is toxic to fish and aquatic organisms.

ENVIRONMENTAL HAZARDS:
• Store in a cool, dry, well ventilated area. Strong oxidizing agent. This product can increase fire intensity. Keep away from heat and from flame and burning material (like a lighted device which has previously contained other chemicals.

DO NOT
• Do not allow this product to contact other water treatment products. If used with a chlorinating compound has been used.

DO NOT
• Do not use this product in a floater or feeder that has been used with any other product.

DO NOT
• Keep all foreign matter, including other water treatment products, away from this product.

DO NOT
• Do not allow to become wet or damp before use. Can react with other materials, toxic gases and spatter. Do not add water to this product. Add only into water.

EMERGENCY HANDLING:
In case of contamination or decomposition – Do not reseal container.

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Call a poison control center or doctor if needed.

Rinse slowly and gently with water for at least 5 minutes. Do not rinse equipment with water after treatment and do not soak surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. If solution contains less than 50 ppm available chlorine, a solution of 100 ppm available chlorine may be used in the sanitizing solution for sanitizing purposes. Automated systems may be used for general cleaning but may not be reused improperly. A solution of 200 ppm available chlorine is recommended for reestablishing a 200 ppm residual. Do not rinse equipment with water for the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor if needed.

Call a poison control center or doctor for treatment advice.

If person is unconscious, give artificial ventilation, then give artificial respiration. If necessary, give gastric lavage.

Provide appropriate medical care.

NOTE TO PHYSICIAN:
Do not give anything by mouth unless told to do so by a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor imme-
