FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

ASSAIL® 70WP INSECTICIDE
Keep Out of Reach of Children
CAUTION

FOR USE ON ALFALFA GROWN FOR SEED

This label is valid until December 31, 2022 or until otherwise amended, withdrawn, cancelled or suspended.

ACTIVE INGREDIENT: acetamiprid
(E)- N'-(6-chloro-3-pyridyl)methyl] – N²-cyano-N¹-methyl acetamidine..........................70.0% by wt.
OTHER INGREDIENTS...........................................................................................................30.0% by wt.
TOTAL......................................................................................................................................100.0%

EPA Reg. No. 8033-23-70506
EPA SLN No. OR-070017

ENVIRONMENTAL HAZARDS
This product is toxic to wildlife. This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are visiting the treated area. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate. Do not contaminate water used for irrigation or domestic purposes.

Pollinator Protection Requirements: This product is toxic to bees exposed to direct treatment. Do not apply this product to blooming alfalfa grown for seed while bees are actively visiting the treatment area. To prevent the possibility of exposure, if the alfalfa grown for seed is blooming, apply this product in late evening only.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water,
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This supplemental label and the federally registered label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this supplemental label and the main EPA registered label. 

**Spray volume:** Apply in a minimum finished spray volume of 20 gallons per acre by ground and 10 gallons per acre by air. To achieve optimum pest control, it is important to obtain thorough and uniform spray coverage.

For use under this SLN label, do not apply this product through any type of irrigation system.

</table>

**RESISTANCE MANAGEMENT**

Acetamiprid is the active ingredient in ASSAIL® 70WP Insecticide. It is a member of a class of chemicals known as neonicotinoids. Rotating ASSAIL® 70WP Insecticide with pesticides with different modes of action may delay or prevent development of insecticide resistance. The use of ASSAIL® 70WP Insecticide should conform to resistance management strategies established for the use area. Consult your agricultural advisor, university contact or extension service for recommended pest management practices for your area. Use recommended integrated pest management practices so that you are not relying solely on chemical control in your crop production.

**SPECIAL CROP USE RESTRICTIONS**

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a non-feed/non-food use by Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed for 1 year (365 days) after the last applicator of this product. This restriction pertains to, but is not limited to, green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the field crop, stubble or re-growth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or sued for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.
Any seed from a field treated with this pesticide product must bear specific and conspicuous container labeling or if shipped in bulk, on the shipment invoice or bill of lading. The labeling must contain the following statement:

“This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture, and other regulatory agencies.”
