Timing of Application
Apply 3 to 10 days before harvest prior to swathing when the majority of seed is harvest-ripe, for example, when spinach is tan to gray ripe.

Restricted Entry Interval (REI): 24 hours.

Environmental Hazards
This pesticide is toxic to aquatic invertebrates. For terrestrial uses, do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinsate.
