ecosense™
slug & snail killer
mata caracoles y babosas

easy to apply granules
granos fáciles de aplicar

can be used around pets & wildlife
puede utilizarse donde hay mascotas y animales silvestres

ACTIVE INGREDIENT  BY WEIGHT
Iron phosphate .......... 1.0%
OTHER INGREDIENTS .......... 99.0%
Total .......... 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION See back panel for first aid.

MANTENER FUERA DEL ALCANCE DE LOS NIÑOS
PRECAUCIÓN Vea el panel trasero para primeros auxilios.

NET WT. / PESO NETO 1 LB. (454 g)
Ortho® Ecocides™ Brand Slug & Snail Killer is effective against a wide variety of slugs and snails and will give protection to home lawns, gardens, outdoor ornamentals, vegetable gardens, fruits, berries, and crop plants. The bait can be scattered on the lawn or on the soil around any vegetable plants, flowers or fruit trees or bushes to be protected. • Rain-Proof Formula. • Guaranteed Results. This product is a unique blend of an iron phosphate active ingredient, originating from soil, with slug and snail bait additives. It is used as an ingredient in fertilizers. After eating the bait the slugs and snails cease feeding, become less mobile and begin to die within three to six days. READ THE LABEL FIRST.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

HOME AND GARDEN: HOW TO APPLY: Scatter the slug and snail bait granules on the soil around or near the plants to be protected. For broadcast application, use standard broadcast spreaders. For row application, use standard granular spreaders. Apply boil evenly of the rate of 0.5 - 1 lb. Per 1,000 square feet, or for small areas, 0.15 oz., or 1 level teaspoon, per square yard, and repeatly as the boil is consumed or at least every two weeks. Do not place in piles. If the ground is dry it will be before applying boil. The product works best when soil is moist but with little or no standing water. Reapply as the boil is consumed or at least every two weeks. Apply more heavily if the infestation is severe, if the area is heavily watered or after long periods of heavy rain. See specific directions for different plant types. WHEN TO APPLY: Evening is the best time to apply the boil, as slugs and snails travel and feed mostly by night or early morning. WHERE TO APPLY: Treat all likely areas of infestation, especially around the perimeter of garden plots because these pests travel into plant areas from daytime refuges. They favor damp places around vegetable plants such as beans, tomatoes, lettuce, cabbage, celery and squash. Other favorite areas are flower gardens, rockeries, hedgerows, dichondra lawns, citrus groves, ivy patches, and other ground cover where they obtain shelter by day. Vegetables: The boil can be used to protect any vegetables from slug and snail damage, including but not limited to: artichokes, asparagus, beans, beets, black-eyed peas, broccoli, Brussels sprouts, cabbage, cantaloupe, carrots, cauliflower, corn, cucumbers, eggplant, garlic, lettuce, onions, peas, peppers, potatoes, radishes, rutabagas, spinach, squash, Swiss chard, tomatoes and turnips. Scatter the boil around the perimeter of the vegetable plot at the rate of 0.5 lb., per square yard, or for small areas, 0.15 oz., or 1 level teaspoon per square yard, to provide a protective "barrier" for slugs and snails entering the garden plot. If slugs or snails are in the rows, then scatter bait on the soil around the base of the plants and between the rows. Fruits (Including Citrus): The boil can be used to protect fruits from slugs and snails, including but not limited to: apples, avocados, apricots, cherries, grapes, melons, peaches, plums, citrus, and pears. For seedlings spread the boil around the base of the stem. Apply at 0.15 oz., or 1 level teaspoon, per square yard, in a 6 inch circular band around the base of the plants to be protected. For older trees, spread the boil around the base of the tree to Intersect slugs enter the base of the trunk. Apply the boil at the rate of 0.5 lb., per 1000 square feet for orchards using standard tiller granular spreaders. Berries: The boil can be used to protect berries from slugs and snails, including but not limited to: strawberries, blackberries, boysenberries, loganberries, and raspberries. Spread the boil around the perimeter of the plot to intersect slugs and snails migrating toward the berries. Use a rate of 0.5 - 1 lb. per 1000 square feet, or for small areas, 0.15 oz., or 1 level teaspoon per square yard and scatter by hand or with a granular spreader. If slugs and snails are already in the plot, then carefully spread boil between the rows near the base of the plants. For small plots, treat around the base of the plant to be protected. Do not spread over the entire area but apply selectively. Outdoor Ornamentals: Scatter boil in 1/2 lb. to a 1 lb. per 1000 square feet for ornamentals using standard tiller granular spreaders. Berries: The boil can be used to protect berries from slugs and snails, including but not limited to: strawberries, blackberries, boysenberries, loganberries, and raspberries. Spread the boil around the perimeter of the plot to intersect slugs and snails migrating toward the berries. Use a rate of 0.5 - 1 lb. per 1000 square feet, or for small areas, 0.15 oz., or 1 level teaspoon per square yard and scatter by hand or with a granular spreader. If slugs and snails are already in the plot, then carefully spread boil between the rows near the base of the plants. For small plots, treat around the base of the plant to be protected. Do not spread over the entire area but apply selectively.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS & DOMESTIC ANIMALS. CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco and using the toilet.

ENVIRONMENTAL HAZARDS: For terrestrial uses. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

CONTAINER DISPOSAL: NON-REFILLABLE CONTAINER. If empty: Do not reuse or refill this container. Offer for recycling if available. If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
