**ACTIVE INGREDIENTS:**
- Chlor-2,4-dimethyl-4-isothiazolin-3-one...1.11%
- Methylene glycol...0.30%

**EPA Reg. No.**
- 707-134-1529

**KEEP OUT OF REACH OF CHILDREN DANGER**

**FIRST AID**
- **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment if needed.
- **IF EYES:** Hold eyes open and rinse slowly with running water for 15-20 minutes. Call a poison control center or doctor for treatment if needed.
- **IF INHALED:** Move the person to fresh air. If not breathing, call 911 or an ambulance, then give artificial respiration. If breathing resumes, move to fresh air.
- **IF SWALLOWED:** Call a poison control center or doctor immediately for additional treatment information.

**INFORMATION FOR USERS**

- **STORAGE AND DISPOSAL**
  - Keep out of reach of children and pets.
  - Keep container tightly closed.
  - Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment.
  - Do not apply this product in a way that will contact workers or other persons.

- **PESTICIDE DISPOSAL**
  - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

- **CONTAINER DISPOSAL**
  - Nonrefillable container. Do not refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other processes approved by state and local authorities.

**GENERAL**
- **CONSULT FEDERAL, STATE, OR LOCAL DISPOSAL PRACTICES, ADHERED TO IN TREATMENT OF INK COMPONENTS.**

- **POLYMER LATEX PRESERVATION**
  - Nuosept 515R microbicidole is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latexes including acrylics, styrene/butadiene, carboxylated styrene/butadiene, ethyl/vinyl acrylic acrylates, ethylene/acylate, and silicone latexes. Add 0.49 to 3.3 pounds of Nuosept 515R (155 g/1 kg) to each 1000 pounds (453 kg) of solution. The final concentration should be 0.25 to 25 ppm effective solutions.

- **INK COMPONENTS**
  - Nuosept 515R is recommended for the control of bacteria and fungi in printing ink components such as resins, pigments, water-soluble dyes, thickeners and thixotropics. Nuosept 515R microbicidole should be added to achieve the recommended dosage range for ink components of 0.1% to 1.0% on a total weight basis. A level adjustment may be necessary to accommodate the slight change in ink solids formulation.

- **ADHESIVE AND TACKIFIER PRESERVATION**
  - Nuosept 515R microbicidole is recommended as an in-container preservative for the control of bacteria and fungi in water-soluble and water-dispersed adhesives such as acrylic resins, vegetable gums, natural rubber latexes, poly(vinyl acetate), styrene butadiene and acrylic latexes. Nuosept 515R is recommended as a preservative for tackifiers derived from resin and hydrocarbon resins.

**IN CASE OF TRANSPORTATION EMERGENCY**
- Call CHEMTREC 800-248-0808 (703-527-3987)

**POTENTIAL HAZARDS TO ENVIRONMENT**
- **Acute and chronic aquatic toxicity.** 
- **Other potential hazard.**
