MIR162 maize
Alternative brand name: MIR162 corn

Insect Control Protein
(OECD Unique Identifier: SYN-IR162-4)

Active Ingredient:
*Bacillus thuringiensis* Vip3Aa20 insecticidal protein and the genetic material necessary for its production (via elements of vector pNOV1300) in Event MIR162 maize (SYN-IR162-4) .................................................. 0.00167 – 0.00751%*

Other Ingredient:
A marker protein and the genetic material necessary for its production (via elements of vector pNOV1300) in Event MIR162 corn (SYN-IR162-4) .......................................... 0.00014 – 0.00073%*  

*Percentage in whole plants on a dry-weight basis.

CAUTION

Keep Out of Reach of Children

EPA Registration Number 67979-14  
EPA Establishment Number 66736-NC-1

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product may be used for breeding purposes, agronomic testing, increasing inbred seed stocks, and producing hybrid seed on up to a total of 20,000 acres per county and up to a combined United States total of 30,000 acres per year. Commercial plantings of this product for the purposes of grain production and controlling corn insect pests are prohibited.

This plant-incorporated protectant may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other registered plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

STORAGE AND DISPOSAL

Planting seed, as well as harvested seed, should be stored in a secure, cool, and dry place. Do not contaminate bodies of water by storage or disposal.
