DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Converting From Chlorine

If you are using chlorine in your pool, it is important to eliminate the chlorine from the pool since Aqua Silk swimming pool sanitizer is incompatible with chlorinating chemicals.

Follow these simple steps:

1. Make sure your water is properly balanced. Take a sample of your pool water to your dealer for a complete water analysis. Adjust as necessary following your dealer's recommendations.
2. Use a chlorine test kit to check for the level of free chlorine in your pool.
3. If your pool water is clear, add a chlorine neutralizer per label directions. Filter overnight.
4. If your pool water is cloudy or if algae is present, add one gallon of Aqua Silk shock oxidizer per 10,000 gallons of pool water. Filter overnight.

The next morning, check with your chlorine test kit for free chlorine. If free chlorine is detected, repeat steps indicated above.

FRESHLY FILLED AND DECHLORINATED POOLS

To get started properly with Aqua Silk sanitizer, follow these steps:

1. Backwash or chemically clean your pool's filter with a filter cleaner. Check the pool's pH, adjusting to a range between 7.2 - 7.8 if necessary.
2. Add Aqua Silk sanitizer at a rate of 6 oz. per 10,000 gallons of pool water to obtain an initial reading of 50 ppm. Filter overnight.
3. After 24 hours, use test strips to check the pool's pH and Aqua Silk sanitizer reading and adjust if necessary.

NORMAL POOL MAINTENANCE

To properly maintain your pool with Aqua Silk sanitizer during the swimming season, follow these steps on a weekly basis:

1. Once a week, check the Aqua Silk sanitizer concentration, pH and total alkalinity in your pool.
2. Maintain your Aqua Silk sanitizer concentration between 20-30 ppm. To insure proper sanitization and protection, the level should never be allowed to drop below 20 ppm. To raise the Aqua Silk Sanitizer concentration 10 ppm, add 1 oz. per 10,000 gallons of pool water.

PROBLEM-SOLVING AND SUPPLEMENTAL POOL INFORMATION

Please remember that Aqua Silk Sanitizer and chlorine-based sanitizers are not compatible. Consult your dealer for information on how to deal with accidental chlorination. Do not use Aqua Silk sanitizer in unheated plastic pools previously exposed to metals that may cause staining. Do not use in free-standing spas or hot tubs. Aqua Silk sanitizer is not compatible with many detergents and some slipjoints (such as those based on copper). Always check with your dealer for compatibility before adding a product that isn't labeled Aqua Silk. If algae, cloudiness or pool problems develop, consult your dealer.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with skin or clothing. Avoid breathing vapor or mist. Causes substantial but temporary eye injury. Do not get in eyes. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. Wear goggles or face shield when handling concentrate. May cause allergic skin reaction.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or go equipped for treatment.

IN CASE OF EMERGENCY CALL 1-800-454-6911

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not contaminate water by clearing of equipment or disposal of wastes.

STORAGE AND DISPOSAL

Keep this product in its tightly closed container when not in use. Nonmetallic container. Do not reuse or refill this container. Rinse empty container thoroughly with water prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or clearing of equipment.

Store in original container in an area inaccessible to children. Protect from freezing.

In case of a leak or spill soak up with absorbent, such as sand, earth, or sawdust, and shovel into waste container. Remove waste to chemical waste area, and dispose of in accordance with local pollution regulations. For information on spills, call 1-800-454-6911.
