See back panel for precautionary statements and first aid.

IN CASE OF EMERGENCY CALL: 1-800-654-6911.

Have the product container or label with you when calling a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN:

If present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor if you feel unwell after using this product.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

IN CASE OF CONTACT WITH EYES:

Rinse gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor if you feel unwell after using this product.

IN CASE OF CONTACT WITH SKIN:

Wash thoroughly with water and soap. If irritation occurs, get medical help.

IN CASE OF INHALATION:

Move person to fresh air. If person is not breathing, begin CPR or mouth-to-mouth if possible. Call a poison control center or doctor if you feel unwell after using this product.

IN CASE OF SwALLOWING:

If the person swallowed the product, do not induce vomiting. Call a poison control center or doctor if you feel unwell after using this product.

• Avoid contact with skin, eyes and clothing. Do not eat, drink or smoke while using this product.

• Wash hands thoroughly with soap and water after handling this product.

• After use, wash and dry hands and other exposed skin.

• Do not contaminate the swimming pool with urine, feces, blood, vomit, mouth wash, cigarettes, or any other material that may cause intense fire, explosion, and release of toxic gases.

• Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is operating continuously.

• Do not use this product in any chlorinating method other than a chlorinator.

PROBABLY MUCOSAL DAMAGE:

Reduced Maintenance

STABILIZED POOLS:

Begin by using 1 tablet per 10,000 gallons of pool water.

For stabilized pools, begin by using 1 tablet per 10,000 gallons of pool water.

1. Start the filter pump and check chlorine residual with a reliable test kit.

2. If chlorine residual is 1.0 to 4.0 ppm, allow product to dissolve completely. Do not remove or add chlorine tablets or any chemical treatment products. Do not remove or add chlorine tablets or any chemical treatment products. Do not remove or add chlorine tablets or any chemical treatment products.

3. Always maintain pH between 7.2 and 7.6 by using a suitable pH lowering agent. Work chlorine residual to readjust. The pool should be below 4.0 ppm chlorine addition. If the pool is above 4.0 ppm chlorine addition, it is recommended to lower the pool pH to 7.2.  After 24 hours, check the chlorine residual. If 1 to 4 ppm, allow product to dissolve completely. Do not remove or add chlorine tablets or any chemical treatment products. Do not remove or add chlorine tablets or any chemical treatment products.

4. After 24 hours, check the chlorine residual. If 1 to 4 ppm, allow product to dissolve completely. Do not remove or add chlorine tablets or any chemical treatment products. Do not remove or add chlorine tablets or any chemical treatment products.

5. If chlorine residual is below 1 ppm, add 2 tablets per 10,000 gallons of pool water. After 24 hours, check chlorine residual. If below 1 ppm, add 2 tablets per 10,000 gallons of pool water. After 24 hours, check chlorine residual.

STORAGE & DISPOSAL:

STORAGE:

Keep away from flame or burning material (like a lighted cigarette). Do not throw tablets directly into pool or use in any chlorinating method other than a chlorinator. Do not reuse floaters or feeders from other brands of dry chlorine.

Disposal:

This pesticide is toxic to fish and wildlife. Do not contaminate water, food, or feed. Wash hands after using this product.
