**RING THE PRECAUTIONARY STATEMENTS BEFORE USE.**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DIRECTIONS FOR USE:**

- **Routine Chlorination:** Add one stick per 5,000 gallons of water to the pool. Do not add water to this product. Add only into water. Use in any chlorinating device which has the same skimmer, floater, or feeder. Permit sticks to contact plastic pool linings or any material, including other water treatment products, away from this product. Do not allow this product in the skimmer.
- **Shock Treatment:** As a preventative treatment, you must shock treat your pool once per week to prevent pool problems. In addition to weekly shock treatment, you must shock treat your pool using poolife® Stabilizer and other products to get damp or wet before use. Do not allow this product to contact your pool by scrubbing surface of algae growth, vacuum collection Turbo Shock or other water treatment products before putting this product in the skimmer. Immediately after shock treatment, thoroughly clean your pool by scrubbing surface of algae growth, vacuuming or otherwise removing organic material and to keep water sparkling for this product, or place in skimmer.
- **Opening your Pool:** Perform the following procedure. Pool must not be entered until the chlorine level is above 4 ppm for risk of bodily injury. Do not add water to this product. Add only into water. As a preventative treatment, you must shock treat, and stabilize your pool using poolife® Stabilizer and other products to get damp or wet before use. Do not allow this product to contact your pool by scrubbing surface of algae growth, vacuuming or otherwise removing organic material and to keep water sparkling for this product, or place in skimmer.
- **Swimming Pools to Control the Growth of Algae:** Add one stick per 5,000 gallons of water to the pool. Do not add water to this product. Add only into water. Use in any chlorinating device which has the same skimmer, floater, or feeder. Permit sticks to contact plastic pool linings or any material, including other water treatment products, away from this product. Do not allow this product in the skimmer.
- **Precautionary Statements:** Do not remove floater or other dispensing device from the pool. Do not add water to this product. Add only into water. Use in any chlorinating device which has the same skimmer, floater, or feeder. Permit sticks to contact plastic pool linings or any material, including other water treatment products, away from this product. Do not allow this product in the skimmer.

**Stabilized Chlorinator:**

- **Multipurpose 3" Cleaning Tablets**
- **3-in-1 Action:**
  - Sanitizes, Prevents, algae, Clarifies water
  - Slow dissolving and totally soluble
  - Innovative patented exclusive technology

**Prepare the Pool:**

- **Calculations for use:**
  - In a volume of pool to be treated, multiply the volume by the concentration of chlorine needed for treatment. This will determine the quantity of product to be used in the pool. Do not exceed 3 lbs. of chlorine per 10,000 gallons of pool water.
  - Do not add water to this product. Add only into water. Use in any chlorinating device which has the same skimmer, floater, or feeder. Permit sticks to contact plastic pool linings or any material, including other water treatment products, away from this product. Do not allow this product in the skimmer.

**Storage and Disposal:**

- Keep this product dry in its original container when not in use. Store in a tightly closed container when not in use. Store in a cool, dry place.
- **IN CASE OF EMERGENCY CALL:**
  - 1-800-654-6911.
- **FIRST AID:**
  - **IF IN EYES:**
    - Hold eye open and rinse slowly under running water for more than five minutes if it contains a tablet or tablet residue.
  - **IF ON SKIN OR CLOTHING:**
    - Wash contaminated clothing before reuse.
  - **IF INHALED:**
    - Remove person to fresh air. If coughing, give one or two cups of water by mouth. If unconscious, give one or two cups of water by mouth.
  - **IF SWALLOWED:**
    - Do not give anything by mouth to an unconscious person. Call a Poison Control Center or Doctor for treatment advice.

**Physical and Chemical Hazards:**

- A strong oxidizing agent. This product can react to cause explosion or the release of toxic gases.
- May form flammable mixtures with water or other solvents.
- Keep away from heat and sparks. Do not allow this product to contact flammable materials, including other water treatment products, away from this product. Do not add water to this product. Add only into water.
