SWIMMING POOL ALGICIDE

BioGuard® has a wide variety of products that prevent specific pool situations. These products are designated as "targeted." The BioGuard Care System has three important parts that help you maintain crystal blue sparkling water:

• Pre-treatment with BioGuard® Algae Defense
• Shock treatment with BioGuard® Shock
• Pre-treatment with BioGuard® Maintain BurnOut 3®

This product is the preferred algae preventative for the BioGuard Care System. Weekly use of this product prevents algae before it starts. This product is supplemented by targeted algaecide and algacide preventative. The selective agent in this product allows it to penetrate small areas where algae are likely to form. This product is a effective and non-staining when used as directed. This product kills and prevents all types of algae: black algae, green algae, and copper algae. This product will not evaporate and it's algae growth preventative effect increases. This product provides a residual effectiveness that protects your pool against algae formation while keeping your pool water sparkling clean. This product protects the chlorinated pool when you are away ("Vacation Save") section in Directions For Use. This product may brown, therefore, do not use for spa treatment or in pools with attached spas, pool stores, or water features.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Final label and use strictly in accordance with product label and precautionary statements and directions.

To ensure pool equipment is working properly. Clean or brush filter following manufacturers instructions. Adjust pH between 7.2-7.6. Adjust chlorine residual to 1-4 ppm. When using other products as outlined in directions. This product may foam, therefor do not use for spa treatment or in pools with attached spas, pool stores, or water features.

For treatment of resistant algae before it starts. Add 4 fluid ounces of this product per 5,000 gallons (2 ppm) when away for one week or more). For algae treatment:

• For algae treatment:
  - Add 4 fluid ounces of this product per 5,000 gallons (2 ppm)
  - For weekly application intervals, pour 2 fluid ounces directly into pool per 20,000 gallons of water.
  - For two week application intervals, pour 2 fluid ounces directly into pool per 20,000 gallons of water.

Resistant algae before it starts. Add 10 fluid ounces of this product per 10,000 gallons of water (10 ppm) in areas of heaviest algae growth. Continuously circulate pool water for the next 24 hours. Afterwards, thoroughly brush pool surfaces. Pour 1 fluid ounce directly into pool per 5,000 gallons of water (2 ppm)

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Wrap container in plastic, seal and put in trash or offer for recycling if available.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS. Danger: Causes irreversible eye damage and skin burns. May be fatal if swallowed, absorbed through skin, or inhaled.
