AN INSECTICIDE SEED TREATMENT PRODUCT PROVIDING SYSTEMIC SEED AND SEEDLING PROTECTION AGAINST LISTED EARLY SEASON INSECTS

Active Ingredient By Wt
*Clothianidin 47.8%
Other Ingredients 52.2%
Total 100.0%
*(E)-1-(2-chloro-1,3-thiazol-5-ylmethyl)-3-methyl-2-nitroguanidine

NipsIt INSIDE® Insecticide contains 5 lbs clothianidin per gallon.

EPA Reg. No. 59639-151
EPA Est. 228-IL-2®, 39578-TX-1®, 5481-ID-1®, 5905-GA-1®, 61842-CA-1®, 62171-MS-1®, 67545-AZ-1®, 67997-IA-1®, 70815-GA-1®, 86555-MO-1®

Superscript is first letter of lot number

KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE NEXT PAGE FOR PRECAUTIONARY STATEMENTS
**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS & DOMESTIC ANIMALS**

**CAUTION**

Harmful if swallowed.

---

**FIRST AID**

If swallowed: Call a poison control center or doctor immediately for treatment advice.

Do not induce vomiting unless told to by a poison control center or doctor.

Do not give anything to an unconscious person.

Treatment is supportive and symptomatic.

---

**NOTE TO PHYSICIAN**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

You may also contact 800-892-0099 for emergency medical treatment information.

---

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

Some of the materials that are chemical-resistant to this product are barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride or viton. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators and other handlers must wear: long-sleeved shirt and long pants, shoes plus socks and chemical-resistant gloves.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

---

**USER SAFETY RECOMMENDATIONS**

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is toxic to birds, mammals and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wastewater or rinsate. Do not apply where runoff is likely to occur. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Apply this product only as specified on label.

Treated seed exposed on soil surface may be hazardous to birds and mammals. Cover or collect spilled seed.

This compound is highly toxic to bees exposed directly (contact). Ensure that planting equipment is functioning properly in accordance with manufacturing recommendations to minimize seed coat abrasion during planting to reduce dust which can drift to blooming crops or weeds.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.
For wireworm seed protection, use a 0.25 fl oz/100 lbs seed rate or higher, depending on field history and site populations.

CEREAL GRAINS (Except Corn, Rice, Sorghum and Wild Rice)

**Restrictions**

NipsIt INSIDE Insecticide must be used only in accordance with specifications on this label utilizing mechanical, slurry, or mist-type seed treating equipment, provided that the equipment can be calibrated to accurately and uniformly apply the product to seed. This product is for commercial seed treatment facilities for all listed crops and for on-farm application only to cereal grains (except corn and sorghum). Do not apply this product in a hopper-box or planter-box at planting time. Always mix product thoroughly before use.

As stated by regulations specified in 40 CFR 153.155, all seed treated with NipsIt INSIDE Insecticide must be colored with an EPA-approved dye or colorant to visually distinguish seed that is treated with a pesticide. It is mandatory that such dye or colorant be added into the slurry mixture containing NipsIt INSIDE Insecticide, prior to application. This regulation is necessary to prevent treated seed from accidental use as a food for man or feed for animals.

Regardless of application method, do not apply more than 0.2 lb active ingredient clothianidin/A/year.

**Seed Quality And Storage Of Treated Seed**

Seed treatments applied to low vigor or poor quality seed or to mechanically damaged seed may result in loss of seed germination or reduced seedling vigor. To verify seed safety, treat a small portion of seed with the desired slurry mixture (NipsIt INSIDE Insecticide alone or in combination with other commercial seed treatment products) prior to treatment of an entire seed lot. Utilize standard seed germination methodologies to determine and verify seed safety. Proper storage conditions of treated seed are to be followed. Due to seed quality and seed storage conditions beyond the control of Valent U.S.A. LLC, no claims are made to guarantee the germination of carry-over treated seed.

Restriction:
- NipsIt INSIDE Insecticide is to be used only as a dry-seeded rice seed treatment. Cover the planted seed thoroughly by soil.
- NipsIt INSIDE Insecticide is not to be used in areas where rice/crawfish aquaculture practices are in place or in or near fish farms, shrimp, prawn or crab pond or nursery operations.
- NipsIt INSIDE Insecticide is not to be followed by a spray treatment of another neonicotinoid insecticide. Follow approved guidelines established for insect resistance management by consulting your local extension pest management expert.
- Do not apply to wild rice.
- Regardless of application method, do not apply more than a total of 0.2 lb active ingredient clothianidin/A/year.

Restriction:
- Regardless of application method, do not apply more than 0.2 lb active ingredient clothianidin/A/year.

A seed unit is 100,000 seed.

**SEED BAG TAG**
The Federal Seed Act requires that the container of seed treated with NipsIt INSIDE Insecticide must be labeled with the following information:
- This seed has been treated with NipsIt INSIDE Insecticide which contains clothianidin.
- Do not use treated seed for feed, food or oil processing.

In addition, the U.S. Environmental Protection Agency requires the following statements on the container of seed treated with NipsIt INSIDE Insecticide:
- Regardless of application method, do not apply more than 0.2 lb active ingredient clothianidin/A/year.
- NipsIt INSIDE Insecticide is to be used only as a dry-seeded rice seed treatment. Cover the planted seed thoroughly by soil.
### PRODUCT INFORMATION

*NipsIt INSIDE* Insecticide (clothianidin) is a systemic insecticide seed treatment providing seed and seedling protection against listed soil insects and early-season foliar insects of barley, buckwheat, barley*, canola, pearl millet, popcorn, proso millet, oats, rice*, rye, sugar beet, soybean*, teosinte, triticale, and wheat. Accurate application of *NipsIt INSIDE* Insecticide to seed is required for control of pests. Pre-test tank mixtures with other seed treatment products to verify formulation compatibility and to assure proper physical compatibility of products. Be aware of limitations or cautions documented on labels of all products used in a seed treatment mixture.

*Not for use in California*

* Not for use in California

• Do not plant *NipsIt INSIDE* Insecticide treated rice in areas where rice/crawfish aquaculture practices are in place or in or near fish farms, shrimp, prawn or crab pond or nursery operations.

• Rapseed greens and seed grown or harvested from *NipsIt INSIDE* Insecticide treated seed must not be used for feed or human consumption. Rapseed grown and harvested from *NipsIt INSIDE* Insecticide treated seed is only for industrial uses and cannot be used for edible oil or any human/food consumption.

• Store away from feeds and other foodstuffs.

• Excess treated seed may be used for ethanol production only if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticide remain in ethanol by-products that are used in agronomic practice.

• Wear long-sleeved shirt, long pants and chemical-resistant gloves when handling treated seed.

• Dispose of all excess treated seed. Left over treated seed may be double-soon around the headland or buried away from water sources in accordance with local requirements. Do not contaminate water bodies when disposing of planting equipment washwaters.

• Dispose of seed packaging in accordance with local requirements.

• This compound is highly toxic to bees exposed directly (contact). Ensure that planting equipment is functioning properly in accordance with manufacturing recommendations to minimize seed coat abrasion during planting to reduce dust which can drift to blooming crops or weeds.

• Do not re-use bags from treated seed to handle food or feed products.

• The compound is toxic to birds and mammals. Treated seeds exposed on soil surface may be hazardous to birds and mammals. Cover or collect treated seeds spilled during loading.

• All seeds must be planted at a minimum depth of 1/2 inch.

• Do not graze or feed soybean forage or hay to livestock.

• Areas planted with treated seed of barley, buckwheat, field corn, pearl millet, popcorn, proso millet, oats, rice*, rye, sugar beet, soybean*, teosinte, triticale, and wheat may be replanted immediately with bulb vegetables, canola, cereal grains, cotton, fruiting vegetables (including cucurbits), leafy vegetables (including brassica vegetables), rapseed, root and tuber vegetables, sorghum and soybean. These areas may also be replanted after 30 days with dry beans, grasses and non-grass animal feeds. These areas may also be replanted after 8 months with sugarcane. Do not plant any other crop in the treated area for at least one year after these treated seeds are planted.

• Areas planted with treated seed of canola*, rapseed*, sorghum* and sweet corn may be replanted immediately with bulb vegetables, canola, cereal grains, cotton, fruiting vegetables (including cucurbits), leafy vegetables (including brassica vegetables), rapseed, root and tuber vegetables, sorghum and soybean. These areas may also be replanted after 30 days with dry beans, grasses and non-grass animal feeds. Do not plant any other crops in the treated area for at least 4 months after these treated seeds are planted.

• Areas planted with treated seed of barley, buckwheat, field corn, pearl millet, popcorn, proso millet, oats, rice*, rye, sugar beet, soybean*, teosinte, triticale, and wheat may be replanted immediately with bulb vegetables, canola, cereal grains, cotton, fruiting vegetables (including cucurbits), leafy vegetables (including brassica vegetables), rapseed, root and tuber vegetables, sorghum and soybean. These areas may also be replanted after 30 days with dry beans, grasses and non-grass animal feeds. Do not plant any other crops in the treated area for at least 4 months after these treated seeds are planted.

• Areas planted with treated seed of canola*, rapseed*, sorghum* and sweet corn may be replanted immediately with bulb vegetables, canola, cereal grains, cotton, fruiting vegetables (including cucurbits), leafy vegetables (including brassica vegetables), rapseed, root and tuber vegetables, sorghum and soybean. These areas may also be replanted after 30 days with dry beans, grasses and non-grass animal feeds. Do not plant any other crops in the treated area for at least 4 months after these treated seeds are planted.
STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store in a dry place away from excessive heat. Do not store near food or feed. Store in original container only. To close package, replace and tighten cap to form an airtight seal. 

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. 

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available; otherwise dispose of in a sanitary landfill or by incineration.

NipsIt INSIDE Insecticide

AN INSECTICIDE SEED TREATMENT
PRODUCT PROVIDING SYSTEMIC SEED
AND SEEDLING PROTECTION AGAINST
LISTED EARLY SEASON INSECTS

Active Ingredient
*Clothianidin ........................................... 47.8%
Other Ingredients ........................................ 52.2%
Total .......................................................... 100.0%

*N(E)-1-(2-chloro-1,3-thiazol-5-ylmethyl)-3-methyl-2-nitroguanidine
NipsIt INSIDE Insecticide contains 5 lbs clothianidin per gallon.

NET CONTENTS 1 GALLON
KEEP OUT OF REACH OF CHILDREN

CAUTION
SEE BELOW FOR PRECAUTIONARY STATEMENTS

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION
Harmful if swallowed.

FIRST AID
If swallowed:
Call a poison control center or doctor immediately for treatment advice.
Have a person sip a glass of water if able to swallow.
Do not induce vomiting unless told to by a poison control center or doctor.
Do not give anything to an unconscious person.

NOTE TO PHYSICIAN
Treatment is supportive and symptomatic.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 800-892-0099 for emergency medical treatment information.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Some of the materials that are chemical-resistant to this product are barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride or viton. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators and other handlers must wear: long-sleeved shirt and long pants, shoes plus socks and chemical-resistant gloves.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to birds, mammals and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Do not apply where runoff is likely to occur. Do not rinse applications down drains. Do not contaminate water and nearby areas. Do not contaminate water when disposing of equipment washwater or rinsate. Do not apply when runoff is likely to occur. Do not contaminate water when disposing of equipment washwater or rinsate. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment washwater or rinsate. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

For complete directions for use, disclaimer and storage and disposal see pamphlet.

AN INSECTICIDE SEED TREATMENT PRODUCT PROVIDING SYSTEMIC SEED AND SEEDLING PROTECTION AGAINST LISTED EARLY SEASON INSECTS

Insecticidal properties of this product are systemic. For best protection, the seed should be in place at planting time. This product does not provide residual control. See local pest management guidelines for the best control of insects.

PRECAUTIONARY STATEMENTS

KEEP OUT OF REACH OF CHILDREN

CAUTION - See below for precautionary statements

FOR FURTHER INFORMATION OR TO REPORT SUSPECTED RESISTANCE, YOU MAY CONTACT VALENT U.S.A. LLC AT 800-892-0099

FIRST AID

IF IN EYES: Hold eyelids open and rinse slowly with running water for 15 minutes. If irritation persists, consult a physician.

IF INHALED: Remove to a fresh air area. If breathing is difficult or breathing stops, consult a physician.

If swallowed: Do not induce vomiting. Give 2-3 glasses of water. Consult a physician.

DO NOT USE ON OR NEAR ANY FOOD OR FEED.

PPE - PERSONAL PROTECTIVE EQUIPMENT (PPE)

First aid and personal protective equipment (PPE) is required for handlers and other workers who may be in the treated area post-application. Workers must wear appropriate PPE. PPE to be worn include the following: Nitrile rubber or neoprene rubber gloves, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride or Viton. If you suspect that this product may be present in any food or feed, consult a physician immediately.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL:

Do not contaminate water, food or feed by storage and disposal. Do not contaminate water supplies when disposing of rinsate. Clean application equipment and rinsate according to Pesticide Disposal Instructions. If used in conjunction with other herbicides, make sure that all other label directions are followed.

IN CASE OF OVER-APPLICATION:

Insecticide to seed is required for control of pests. Pre-test the insecticide before use. Only apply listed crops. Avoid over-treating with up to 20% of the recommended rate. For further information or to report suspected resistance, you may contact Valent U.S.A. LLC at 800-892-0099.

PET Ownership

This product is toxic to pets. Keep pets away from treated areas. Avoid use in areas where pets are present.

Insect Pests

The information below lists the insects controlled by this product. The table lists the rate and the size of the treated seed required for effective control. The treated seed is to be followed. Due to seed quality and seed storage conditions beyond the control of Valent or Seller, it shall be barred from obtaining any remedy.
