Tips for Lawn Care Success:

- **Feed regularly for your best lawn.** Regular feedings of Scotts Turf Builder® will help build a lawn you and your family can enjoy. Scotts Turf Builder provides the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought and family activity.
- **Mow your lawn high.** Mowing high allows the grass to develop a deep root system & helps your lawn use water more efficiently.
- **Leave the grass clippings on your lawn.** This recycles the plant nutrients back into the soil.
- **Conservate water.** Your lawn will begin to wilt when water is needed. As much as possible, take advantage of nature's sprinkler and rely on the rain to water your lawn.

**Plan your feeding schedule. Choose the right product for your lawn.**

---

**Watering or Rain**

Do not water your lawn for 24 hours after application. Wait until the water coats the roots of the plants and reduces the effectiveness of this product. This product should not be applied if rain is expected within the next 24 hours.

---

**Riego o lluvia**

No debe regar en las siguientes 24 horas después de la aplicación. Deje que el agua deje el fertilizante a las raíces de las plantas y disuelva con esta producto. Este producto no debe aplicarse si se espera lluvia en las siguientes 24 horas.
