Spray Concentrate

Kills fleas, ticks, mosquitoes, ants, aphids, mites, caterpillars, beetles, sod webworms, chinch bugs, and mole crickets

Kills mosquitoes that may transmit West Nile virus, Deer ticks and other listed pests

Outdoor pest control lasts for up to 6 weeks

APPLICATION INSTRUCTIONS

1. Thoroughly wet down grass a few hours before application. Apply when lawn is no taller than 3 inches. Maintain control. Wait 4 to 6 weeks between applications.

2. Measure the area to be treated. Calculate the square footage by multiplying length times width.

3. Spray evenly over the measured area, treating the entire lawn.

4. For best control of surface insects, delay additional watering or mowing for 24 hours after application.

APPLICATION INSTRUCTIONS

- Hard to control insects/pests may require 2 to 3 applications.
- Mosquitoes coming to rest on treated areas will be killed for varying periods of time after application, depending on exposure of foliage. When treating potted plants also lightly spray the soil surface. Spray when air is calm to avoid drift. Application should be made at temperatures between 60° and 75° F. Spray in the early morning or late afternoon when it is cooler, if temperatures will exceed 80° F. Apply as needed, waiting 7 to 14 days between each application.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Food utensils such as spoons and measuring cups must not be used for food purposes after use with pesticides. Do not allow children and pets into the treated area until spray has dried.

STORAGE AND DISPOSAL

- Keep from freezing. Keep pesticide in original container. Do not put into food or drink containers. Do not contaminate water, food or drainage systems. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas. Care should be taken when spraying to avoid fish and reptile pets in/around ornamental ponds. This product is highly toxic to bees exposed to spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or putting anything in mouth. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS:

This pesticide is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run into storm drains, ditches, gutters and surface waters. Applying this product in calm weather when rain is not expected for the next 24 hours will help to ensure that wind and rain do not blow off or wash pesticide off the treatment areas. Trimming equipment used on the treatment area will help avoid spills to water bodies or drainage systems. Do not use or allow treated area to be hazardous to aquatic organisms in neighboring areas. Care should be taken when spraying to avoid fish and reptile pets in/around ornamental ponds. This product is highly toxic to bees exposed to spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or putting anything in mouth.
