DIRECTIONS FOR USE:

1. At the end of the workday, add eight (8) ounces of HOT water to a Sterilex measuring bottle. Do not use PET Bottles (See note for bottle requirements). Use within 24 hours after initial startup treatment.

2. Add one packet of Sterilex Ultra to the hot water. Use stirrer to mix or swirl to dissolve.

3. Allow the mixture to sit in the unit overnight (Place the ends of waterlines into a sink or effluent water <500 cfu/ml). It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

4. At the beginning of the next workday, discard any remaining mixture in external water bottle. Do not use PET Bottles (See note for bottle requirements). Use within 24 hours after initial startup treatment.

5. Fill the external water bottle with hot water. Flush each line (A/W Syringe, Handpiece) before reuse.

6. Rinse the external water bottle with hot water. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

FIRST AID:

IF IN EYES: Hold the eyelids open and flush with plenty of water for 15 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Do not give anything by mouth to an unconscious person. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes are not disposed of properly, they can cause serious or fatal injuries. If these wastes are disposed of properly, they will not cause serious or fatal injuries.

CONTAINER DISPOSAL:

Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available or puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Completely empty packet into Regional Office for guidance.

Note: Do Not Use Than Mixed Polyethylene Terephthalate (PET) Bottles. Do Recommended Use High/Low Density Polyethylene. Blend With A Minimum Thickness Of 0.08 Inches

KILLS BIOFILM BACTERIA IN DENTAL UNIT WATERLINES

Removes® biofilm from dental unit water lines

*Laboratory studies have shown >99% removal
Kills Biofilm Bacteria in Dental Unit Water Lines

- Removes* biofilm from dental unit water lines
- Prevents and suppresses formation of biofilm in dental unit water lines
- Kills biofilm bacteria in dental unit water lines
- Maintains dental unit water line effluent water <500 cfu/ml

**Think Pink Once A Week**

Active Ingredients:

N-Alkyl(C_{12-15}, C_{16-20})

- dimethylbenzylammonium chloride................................. 10.00%
- Sodium Carbonate Peroxyhydrate.................................. 29.75%
- Other Ingredients .......................................................... 60.25%
- TOTAL ......................................................................... 100.0%

* Laboratory studies have shown >90% removal

**KEEP OUT OF THE REACH OF CHILDREN**

**DANGER**

See box for first aid and precautionary statement

Net Contents 12.5 grams
DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Important Notice:
Before using Sterilex Ultra please read the following information.
1. This product is to be used in conjunction with regular testing of dental unit water.
2. The manufacturer of the dental unit should be consulted before use of this product about compatibility of Sterilex Ultra with the dental unit.
3. Initial Start-Up Treatment: Treat the Dental Unit Water Lines (DUWL) for three consecutive nights.
4. Routine Treatment: Treat DUWL one night/week (Monday Thursday recommended) after Initial Start-up treatment.

HOW TO APPLY STERILEX ULTRA POWDER:
1. At the end of the workday, add eight (8) ounces of HOT water to a Sterilex measuring cup or other empty container.
2. Add one packet of Sterilex Ultra to the hot water. Use stirrer to mix or swirl to dissolve. Be sure all powder is dissolved. Pour pink liquid into an empty external dental unit water bottle. Do not use PET Bottles (See note for bottle requirements). Use within 24 hours after powder has been dissolved in water.
3. Run Sterilex Ultra mixture through the system until the pink mixture appears at the end of the A/W Syringe and Handpiece Line. Always remove the Handpiece.
4. Allow the mixture to sit in the unit overnight (Place the ends of waterlines into a sink or cuspidor in case any pink mixture drips overnight).
5. At the beginning of the next workday, discard any remaining mixture in external water bottle. Rinse the external water bottle with hot water.
6. Fill the external water bottle with hot water. Flush each line (A/W Syringe, Handpiece) until the bottle is empty.

Note: Do Not Use Thin Walled Polyethylene Terephthalate (PET) Bottles. We Recommend Either A High Density Polyethylene Bottle With A Minimum Thickness Of 0.08 Inches Or A High/Low Density Polyethylene Blend With A Minimum Thickness Of 0.14 inches.
