ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Read this SLN label and the label affixed to the container for Dithane® F45 Rainshield® fungicide before applying.
- Use of Dithane F45 Rainshield according to this SLN label is subject to all use directions, precautions and limitations imposed by the label affixed to the product container.

Active Ingredients
mancozeb†: A coordination product of zinc ion and manganese ethylene bisdithiocarbamate ...37.0%
In which the ingredients are:
  Manganese++ ........................................... 7.4%
  Zinc++ ................................................... 0.9%
  Ethylene bisdithiocarbamate ion (C₄H₆N₂S₄) ................................ 28.7%
Other Ingredients .......................................................... 63.0%
Total ................................................................. 100.0%
†Equivalent to 4 lb active ingredient per gallon

Keep Out of Reach of Children

Environmental Hazards
This pesticide is toxic to aquatic organisms. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters or rinsate.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.
General Information
Dithane® F45 Rainshield® is a broad-spectrum protectant fungicide. Optimum disease control is achieved when the fungicide is applied in a regularly scheduled preventative spray program. The addition of an agricultural surfactant will improve fungicide performance by providing a more uniform spray deposit, increased foliar redistribution, and improved fungicide retention during periods of wet weather.

- Carefully read, understand, and follow label use rates and restrictions.
- For proper application, determine the number of acres to be treated, the recommended label use rate and the volume to be applied per acre. Prepare only the amount of spray solution required to treat the measured acreage. Careful calibration of spray equipment is recommended prior to use.

Mixing Procedures for Agricultural Applications
Slowly place into spray tank as it is being filled or thoroughly premix in a nurse tank for concentrate or aircraft sprayers. Add other co-applied fungicides, insecticides, growth regulators, micronutrients, and spray adjuvants after Dithane F45 fungicide has been placed into suspension.

Compatibility
Dithane F45 Rainshield fungicide is compatible with most commonly used agricultural fungicides, insecticides and growth regulators. When preparing tank mixes, user should consult spray compatibility charts or State Cooperative Extension Service Specialists prior to actual use.

Spray Adjuvants
The addition of agricultural surfactants to Dithane F45 sprays will improve initial spray deposits, fungicide redistribution and weatherability.

Add Dithane F45 to the spray mixture prior to adding an adjuvant. Follow applicable use directions, precautions and limitations on the label of the adjuvant product.

Specific Use Directions
Begin applications when disease first appears or is reported in the area. Apply 1.5 quarts Dithane F45 (1.5 lbs active ingredient) per acre in thorough coverage sprays. Repeat applications on a 7 to 10 day application schedule until the threat of disease is over. Do not apply more than 8 quarts Dithane F45 (8 lbs active ingredient) per acre per crop year.

Dithane F45 Rainshield fungicide may be used on the following seed crops for control of the following diseases:

<table>

### Specific Use Restrictions

- **Chemigation:** Do not apply Dithane F45 Rainshield through any type of irrigation system.
- For use only on crops grown for seed as listed on this label in the state of Oregon.
- Do not apply more than 8 quarts Dithane F45 (8 lbs active ingredient) per acre per crop year.

### Special Crop Use Restrictions:

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/non-food use by the Oregon Department of Agriculture and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use on Crops Grown for Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to, green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

> "This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies."
