PREVENT Damage

DIRECTIONS FOR USE:

Avoid creating piles when applying the product. Reapply DeFence® every 7 to 10 days. For food crops and specific sites such as ornamental plants, apply product to the area around the plant. For food crops and specific sites such as ornamental plants, apply product to the area around the plant. For food crops and specific sites such as ornamental plants, apply product to the area around the plant.

Begin to fade. More frequent application may be needed during periods of prolonged, heavy or frequent rainfall.

Avoid creating piles when applying the product. Reapply DeFence® every 7 to 10 days. For food crops and specific sites such as ornamental plants, apply product to the area around the plant. For food crops and specific sites such as ornamental plants, apply product to the area around the plant. For food crops and specific sites such as ornamental plants, apply product to the area around the plant.

This unique, long lasting pelletized formula effectively repels rabbits and deer from gardens, flowers and landscaped areas. In its pelletized form, DeFence® by Havahart® won't wash or blow away as easily as some granular & powder applications. Our active ingredients are throughout the pellet and not just coated on - the repellency continues until the pellet disappears! Sprinkle around areas to be protected – it is safe to use around people, pets and plants!
