DuPont Arilon® INSECTICIDE

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back and side panels for additional precautionary statements.

PERSONAL PROTECTIVE EQUIPMENT
All pesticide handlers (operators, loaders and applicators) must wear:
• Shirt and long pants
• Water-proof gloves
• Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

USERS SHOULD: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where aquatic life is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment or washoff. Do not apply when recreational or waterfowl are using the area. Do not contaminate water when disposing of equipment or washoff. Do not apply when recreational or waterfowl are using the area.

NOTICE TO BUYER: Purchase of this material does not carry any rights under patents of countries outside the United States.

REFER TO ACCOMPANYING LABELING FOR ADDITIONAL PRECAUTIONS AND COMPLETE DIRECTIONS FOR USE.

FIRST AID
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or a doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Remove contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

PRECAUTIONARY STATEMENTS

Hazardous to humans and domestic animals

CAUTION: Harmful if swallowed. Causes eyes, skin irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Harmful if inhaled. Avoid breathing dust, vapor or spray mist. Remove contaminated clothing and wash clothing before reuse.

*Indoecarb belongs to the oxadiazole chemical class.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Read entire label before using this product. DuPont will not be responsible for losses or damages resulting from use of this product in any manner not specifically stated on this label or other labels or bulletins published by DuPont. User assumes all risks associated with such non-specified use.

PRODUCT INFORMATION
DuPont™ ARILON® insecticide is a water dispersible granule concentrate which contains the non-repellent active ingredient Indoxacarb. When applied following label directions ARILON® insecticide is effective at controlling a wide range of listed insect pests common in urban environments.

After dilution in water, ARILON® insecticide forms a suspension for making applications. ARILON® is formulated to not stain or cause damage to most building surfaces where water applied alone causes no damage. It is still recommended that before a first application is made, treat a small area and allow to dry to determine whether staining will occur.

Ants
Ants contacting hard surfaces recently treated with ARILON® insecticide (or fresh deposits) may transfer lethal doses to other (untreated) ants.

Brief or limited exposures to fresh ARILON® insecticide deposits on porous or non-porous surfaces (or across a wide ranges of surfaces) are still effective at killing ants.

APPLICATION MIXING DIRECTIONS

* One (1) pack contains 0.33 oz (approximately 9.4 g) of ARILON® insecticide.

Steps When Mixing:

**IMPORTANT:** Do Not pour ARILON® insecticide into an empty tank.

Each packet is constructed of plastic Terrene film and contains ARILON® insecticide concentrate that must first be opened then the contents are poured into the application or mixing tank.

1. Clean application tank prior to using ARILON®.
2. Fill application tank with water to about half of desired volume.
3. Appropriate amount of ARILON® is now poured into tank.
4. Agitate.
5. Fill tank with remaining half volume of water and agitate again.
6. Now ready to apply if treatment mixture sits in the tank for extended periods, re-agitate prior to application.

### APPLICATION VOLUMES

For low to medium infestations or for routine maintenance applications apply a volume of approximately 1 gal. of treatment solution per 1,000 square feet. In order to achieve greater coverage, apply 2 to 4 gals. per 1,000 square feet. Such conditions would include medium to heavy infestations of pasts, porous surfaces, complex sites such as thick, heavy perimeter shrubbery, or for maximum residual performance.

Suggestions for Large Volume Applications

If applying DuPont™ ARILON® to exterior of structures using high volume power spray equipment, ARILON® can be diluted. If targeted spray volume is 5 gals. of spray/1000 sf, mix 0.33 oz. [1 Terrene pack] per 5 gals. of water. If targeted spray volume is 10 gals. of spray/1000sf, mix 0.65 oz. [1 Terrene Pack] per 10 gals. of water. This mix rate and application volume will ensure proper coverage and distribution of the insecticide. These types of spray volumes may be necessary for exterior applications to heavy vegetation/mulch or other challenging perimeters of structures.

### APPLICATION DIRECTIONS

**Cockroaches**

ARILON® insecticide is effective at controlling cockroaches. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to ARILON® Insecticide dilution chart). For heavy infestations of cockroaches and/or extreme environmental conditions, use the higher listed rate.
Indoors: Apply ARILON® insecticide using a coarse, low pressure water-based spot or crack and crevice treatment that targets areas of cockroach infestation or areas known or suspected to be cockroach harborage sites. Directed applications can be made to areas including, but not limited to, pest entry sites, attics, wall voids, behind cabinets or equipment, under counters or appliances, along baseboards and reticulation systems. ARILON® insecticide may be applied as a crack and crevice or spot application using ULV equipment such as a Micro Injector or Actisol machine.

Outdoors: Apply ARILON® insecticide using a coarse, low pressure spray as a spot, crack and crevice, general surface or perimeter band-type treatment to control or prevent cockroach infestations. A perimeter band of 10 ft., for example, can include 3 ft. up the exterior wall and out to 7 ft. of horizontal substrate away from the wall base. Treat heavier infestations or more complex substrates such as stone or brick with greater volumes of treatment solution. Refer to volume directions earlier in this label for more information. In addition to exterior structural elements, outdoor breeding sites such as refuse collection areas, loading docks, adjacent tree holes, crawl spaces, or other sources of cockroach infestations should be located and receive a treatment.

Ants

ARILON® insecticide is effective at controlling ants. Apply using a treatment solution containing 0.05% - 0.1% insecticide in water (refer to ARILON® insecticide dilution chart). For heavy infestations of ants and/or extreme environmental conditions use the higher listed application rate.
Beetles, Boxelder Bugs, Centipedes, Crickets, Earwigs, Grasshoppers, Kudzu Bugs, Millipedes, Pillbugs, Silverfish, Sowbugs, Springtails and Stink Bugs
ARILON® insecticide is effective at controlling Beetles, Boxelder Bugs, Centipedes, Crickets, Earwigs, Grasshoppers, Kudzu Bugs, Millipedes, Pillbugs, Silverfish, Sowbugs, Springtails and Stink Bugs. ARILON® is also effective at killing Centipedes. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to dilution chart). For heavy infestations and/or extreme environmental conditions, use the higher listed rate.

Indoors: Apply ARILON® insecticide using a coarse low pressure spray as a spot or crack and crevice treatment that targets infested areas or areas suspected to be infested. Direct applications can be made to areas including, but not limited to, pest entry sites, attics, wall voids, behind cabinets or equipment, under counters or appliances, along baseboards, storage rooms, garage areas, basements and cistern systems.

Outdoors: Apply ARILON® insecticide using a coarse, low pressure spray as a spot, crack and crevice, general surface or perimeter band-type treatment to control or kill above listed insect pests and to help prevent these nuisance pests from invading the structure. A perimeter band of 10 ft., for example, can include 3 ft. up the exterior wall and out to 7 ft. of horizontal substrate away from the wall base. Treat heavier infestations or more complex substrates such as stone or brick with greater volumes of treatment solution. Refer to volume directions earlier in this label for more information.

Termites
ARILON® Insecticide will kill subterranean termite species of Coptotermes, Heterotermes, Reticulitermes, and Zootermopsis. This product will kill workers and/or winged reproductive forms of termites present at the time of application only. Application of this product will not provide structural protection nor substitute for mechanical alteration, soil or foundation treatment with termicide. This product is not to be used as sole protection against termites, as it is not designed to offer structural protection and will not prevent future infestations. A professional inspection is recommended.

DuPont™ ARILON® can be applied as a spot treatment to kill active termites by applying as a coarse liquid spray at 1 gal per 10 sq. ft. of infested area. Treat infested sites directly. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to ARILON® insecticide dilution chart). For heavy infestations of termites and/or extreme environmental conditions, use the higher listed rate.

Flies (Including permethrin-resistant house flies): ARILON® insecticide is effective at killing house flies, fruit flies and other filth/flush flies. ARILON® is also effective at killing stable flies and permethrin-resistant house flies using a higher volume (2 gals/1,000 sq ft) or higher concentration (0.1%) spray dilution.

Indoors: Apply as a crack and crevice or spot application to fly resting areas.

Outdoors: Apply as a spot or surface broadcast application directly to flies or to fly resting areas. Use of heavier volumes (2-4 gals./1,000 sq. ft.) will provide better coverage in many outdoor substrates/areas.
Fleas
ARILON® insecticide is effective at killing larval and adult fleas. Indoors: Direct application as crack and crevice or spot treatment to and around pet bedding areas and other known breeding areas of adult or larval fleas.
Outdoors: Direct application as spot or broadcast treatment within perimeter of structures known to harbor fleas. Use of heavier volume (2-4 gals/1000 sq. ft.) will provide better coverage in most outdoor substrates such as lawn, mulch, and other flea breeding areas.

Carpenter Bees
ARILON® insecticide is effective at killing carpenter bees. Direct application to boles and their nests should be made including use of foam to improve treatment to galleries.
When treating bee galleries, ensure complete coverage of wood surfaces. Note: ARILON® will provide adequate control but is not a quick knockdown agent.

Wasps
ARILON® insecticide is effective at killing wasps. Direct application to insects including nest should be made with pin stream or coarse spray. Ensure complete coverage when treating nests directly. Note: ARILON® will provide adequate control but is not a quick knockdown agent.

Pantry Insect Pests
Before application of ARILON®, infested food materials must be removed/saved. For control of pantry insect pests/stored product insect pests, including beetles such as Granary weevil and saw-toothed grain beetle, apply ARILON® as crack and crevice or spot treatment to infested areas focusing on cracks in food storage areas, closets, cabinets, shelving and baseboards. Direct application to pantry insect pests will provide best results. Do not apply directly to food. Remove or cover any remaining food items or food serving surfaces.

FOOD HANDLING ESTABLISHMENTS
(Food handling establishments are places other than private residences in which food is held, processed, prepared or served.)
Applications in Nonfood Areas: ARILON® insecticide may be used as a spot or crack and crevice treatment to control cockroaches in residential structures and the non-food areas of commercial, industrial, public and institutional buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, daycares, laboratories, computer facilities, aircraft, buses, boatsheds, banks, pet shops and zoos.
Nonfood/non-feed areas include areas such as garbage rooms, lavatories, floor drains (to sewers), entries, and vestibules, closets, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after bottling or canning). Refer to section below for use directions and restrictions when making applications in food/feed handling areas of Food/Feed Handling Establishments.
Applications in Food/Feed Handling Areas: Application to food/feed areas of food/feed handling establishments may be used as a spot or crack and crevice treatment.
Food and feed handling areas include areas for receiving, storage, pecking (canning, bottling, wrapping, boxing), preparing edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food/feed area when food is exposed and facility is in operation.
Apply into cracks and crevices using equipment designed to deliver a pin stream between different elements of construction, between floor and equipment, openings to voids and hollow spaces in walls, bases and equipment.

Specific Restrictions:
- Do not apply to areas or surfaces where food/food, food utensils or food processing surfaces may come into contact and become contaminated.
- Do not apply to areas that are routinely washed such as cracks and crevices in tops of tables, food/feed preparation and prepared food holding surfaces.

**RE-TREATMENT DIRECTIONS**

Application to specific areas previously untreated can be treated as necessary. Typical or maintenance applications can be made as frequently as necessary up to a maximum of once per month. For heavy infestations of insect pests that require more than one treatment application to gain control, retreatment is allowed 7 days after initial application.

**USE RESTRICTIONS**
- Not for use on plants being grown for sale or other commercial use, or for commercial seed production.
- Do not formulate this product into other end-use products without written permission of DuPont Professional Products.
- Do not apply this product through any type of irrigation system.
- Do not apply this product in commercial nurseries and greenhouses or on sod farms.
- Keep pets away from treated areas until treatment has dried.
- Do not apply a broadcast or general surface application to interior surfaces of residential or commercial structures.
- Do not apply this product to pets, edible crops, or sources of electricity.
- Do not use water base sprays of DuPont™ ARILON® in or on electrical equipment due to possible shock hazard.
- At residential sites, all food processing surfaces and utensils in the treatment area must be covered during treatment or thoroughly washed before reuse.
- Do not apply this product in patient rooms or in any rooms being occupied including the elderly or infirm.
- Do not apply when classrooms are in use.
- Do not apply to institutions (i.e., libraries, recreational facilities, etc) when occupants are present in the immediate area/room being treated.
- Do not clean equipment near wells, water sources or desirable vegetation. Dispose of waste rinse water in accordance with local regulations.
STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store product in original container only in a location inaccessible to children and pets. Do not contaminate water, other pesticides, fertilizer, food or feed in storage.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING:

Refer to the Net Contents section of this product's labeling for the applicable Nonrefillable Container or Refillable Container designation.

Nonrefillable Plastic Containers (Capacity Equal to or Less Than 50 Pounds): Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 15 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then, for Plastic Containers, offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances. For Metal Containers, offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Do not transport if this container is damaged or leaking. If the container is damaged, leaking or obsolete, or in the event of a major spill, fire or other emergency, contact DuPont at 1-800-441-3637, day or night.

NOTICE TO BUYER—Purchase of this material does not confer any rights under patents of countries outside of the United States.

LIMITATION OF WARRANTY AND LIABILITY

NOTICE: Read This Limitation of Warranty and Liability Before Buying or Using This Product. If the Terms Are Not Acceptable, Return the Product at Once, Unopened, and the Purchase Price Will Be Refunded. It is impossible to eliminate all risks associated with the use of this product. Such risks may arise from factors such as weather conditions, soil factors, off-target movement, unconventional technique, presence of other materials, the manner of use or application, or other unknown factors, all of which are beyond the control of DuPont or Seller. These risks can cause: ineffectiveness of the product or other unintended consequences. DuPont does not agree to be an insurer of these risks. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, WHEN YOU BUY OR USE THIS PRODUCT, YOU AGREE TO ACCEPT THESE RISKS.

DuPont warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purpose stated in the Directions for Use, subject to the inherent risks described above, when used in accordance with the Directions for Use under normal conditions.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, DUPONT MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT SHALL DUPONT OR SELLER BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT TO THE EXTENT CONSISTENT WITH APPLICABLE LAW THAT ALLOWS SUCH REQUIREMENT, THE EXCLUSIVE REMEDY OF THE USER OR BUYER AND THE EXCLUSIVE LIABILITY OF DUPONT OR SELLER, FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHER LEGAL THEORY) RESULTING FROM THE STORAGE, USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT, OR AT THE ELECTION OF DUPONT OR SELLER, THE REPLACEMENT OF THE PRODUCT.

To the extent consistent with applicable law that allows such requirement, DuPont or its distributor must have prompt notice of any claim so that an immediate investigation of buyer's or user's claim can be made. Buyer and all users shall promptly notify DuPont or a DuPont distributor of any claims, whether based on contract, negligence, strict liability, other tort or otherwise or be barred from any remedy. This Limitation of Warranty and Liability may not be amended by any oral or written agreement.

PERSONAL PROTECTIVE EQUIPMENT

All pesticide handlers (mixers, loaders and applicators) must wear:
- Shirt and long pants
- Water-proof gloves
- Shoes plus socks

Follow manufacturer’s instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

USER SHOULD: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Rinse clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water to areas where surface water is present or to intermittent areas below the main high water mark. Do not contaminate water when disposing of equipment rinsate. Do not apply when weather conditions could favor runoff. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas.

NOTICE TO BUYER: Purchase of this material does not confer any rights under patents of countries outside the United States.

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or a doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Remove contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-444-2203 for emergency medical treatment information.

For information on the use of this product call DuPont Professional Products at 1-888-4-DUPONT (1-888-438-7668).

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed. Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Harmful if inhaled. Avoid breathing dust, vapor or spray mist. Remove contaminated clothing and wash clothing before reuse.
