Switch® 62.5WG
Fungicide

Broad spectrum fungicide for the control of certain diseases

Active Ingredients:
Cyprodinil (CAS No. 121552-61-2) .................................................. 37.5%
Fludioxonil (CAS No. 131341-86-1) .............................................. 25.0%
Other Ingredients: ...................................................................... 37.5%
Total: 100.0%

Switch 62.5WG is a water-dispersible granule.

EPA Reg. No. 100-953

KEEP OUT OF REACH OF CHILDREN.

CAUTION

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

Before using Switch 62.5WG as permitted according to this supplemental label, read and follow all applicable directions, restrictions, and precautions on the EPA registered label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

<td>11-14</td>
<td>Begin applications of Switch at early bloom. Up to three additional applications may be made at berry touch, veraison, or preharvest. Botrytis Bunch Rot is most effectively controlled by ground application, using sufficient water volume to provide thorough coverage. Thorough coverage of bunches is essential. Do not apply closer than a 21-day interval. For sour rot, make an application at veraison followed by 1-2 additional applications. Do not apply closer than a 21-day interval. <strong>Resistance Management:</strong> After 2 applications of Switch 62.5 WG, alternate with another fungicide with a different mode of action for 2 applications.</td>
