ALL-WEATHER BAIT

BLOX™

NET WT: 18 lbs (8.16 kg)

See back panel for First Aid, additional Precautionary Statements, and Directions for Use.

KILLS RATS, HOUSE MICE & MEADOW VOLES*

Mold Resistant • Moisture Resistant

FOR ORGANIC PRODUCTION

KEEP OUT OF REACH OF CHILDREN

CAUTION

This Product May Only be Used Inside and Within 100 Feet of Man-made Structures

ACTIVE INGREDIENT:

Cholecalciferol (CAS #: 67-97-0): 0.075%

OTHER INGREDIENTS: 99.925%

TOTAL 100.000%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, Bushy-tailed woodrat, and Mexican woodrat.

DIRECTIONS FOR USE

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately. Follow manufacturer’s instruction for cleaning/maintaining PPE.

USE RESTRICTIONS:

Do not sell or distribute this product in individual containers holding less than 4 pounds of bait.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility. Container Nonrefillable. Do not reuse or refill this container.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

NET WEIGHT: 18 lbs (8.16 kg)

EP A EST. NOs. 12455-WI-1k, 12455-WI-2p, 12455-WI-3w

Superscript is first letter of the lot number.

NOTE TO PHYSICIAN

If serum calcium levels are elevated, treatment with Calcitonin is effective in reducing calcium to normal levels. Continue monitoring serum calcium and treat as necessary for hypercalcemia. Reference, AMA Drug Evaluations, Third Edition (1977), Chapter 16, pp. 248-251.

NOTE TO VETERINARIAN

Calcium Mobilizer Cholecalciferol: For animals ingesting bait, induce vomiting by using hydrogen peroxide or administration of activated charcoal with a cathartic. If clinical signs develop, treatment consisting of saline diuresis combined with the use of furosemide, corticosteroids, and phosphate binders are recommended. Calcitonin or pamidronate may be needed for animals that remain hypercalcemic despite symptomatic treatment.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing. All handlers, including applicators, must wear shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

USER SAFETY REQUIREMENTS: Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using the toilet and changing into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests and application methods described on this label.

IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, and in inaccessible to children and pets for the sites, pests and application methods described on this label.

3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not broadcast bait.

Burrow baiting with TERA® Ag Bloc is prohibited.

Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell or distribute this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats, house mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by grained openings, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: Route. Place 2 to 8 blocks per placement (usually at intervals of 15- to 30- feet). Maintain an uninterrupted supply of fresh bait for 10 days or until there no longer are signs of recent feeding on bait by rats.

House Mice, Eastern Harvest Mice*, Golden Mice* and Meadow Voles*

Use 1 Block per placement. Space placements at intervals of 8- to 10- feet in infested areas. Larger placements, up to 2 Blocks, may be needed at points of extremely high house mouse or meadow vole activity. Maintain an uninterrupted supply of fresh bait for 15 days or until there no longer are signs of recent feeding on bait.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Using waterproof gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To discourage reinfection, limit sources of rodent food, water, and harborage as much as possible. If reinfection does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, Buoy-tailed woodrat, and Mexican woodrat.
