**KILLS RATS & MICE**

- Can Be Used Indoors or Out
- Can Be Used For Burrow Baiting
- Kills Anticoagulant-Resistant Norway Rats

**ACTIVE INGREDIENT:**

- Calcium Mobilizer Cholecalciferol: 0.075%
- Other Ingredients: 99.925%

**TOTAL:** 100.000%

**WARNING:**

- Use only as directed.
- Use only on surfaces where ingesting is unlikely or very low.
- Use in areas not easily accessible to children, pets, and wildlife.

**CAUTION:**

- Harmful if swallowed. Keep out of reach of children, pets, and wildlife.
- All handlers (including applicators) must wear shoes, long-sleeved shirt, long pants, gloves, and a respirator with a high-efficiency particulate air (HEPA) filter when handling this product.
- Do not apply this product in any manner that will result in exposure to humans, pets, or wildlife.

**USE RESTRICTIONS:**

- This product must not be applied to food or feed crops.
- This product is not to be applied to meat, milk, meat by-products, or food handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
- Do not apply this product to meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

**STORAGE AND DISPOSAL:**

- Store only in original container in a cool, dry place inaccessible to children, pets, and wildlife.

**ENVIRONMENTAL HAZARDS:**

- Stale bait is toxic to birds, non-target mammals, and wildlife. Ensure that stale bait is not applied to any area where ingestion by wildlife is likely.

**PRECAUTIONARY STATEMENTS:**

- HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**FIRST AID:**

- If animal eats bait, call veterinarian or 1-877-854-2494 at once.
- For animals ingesting bait, induce vomiting by using hydrogen peroxide or administration of activated charcoal with a cathartic. If clinical signs develop, treatment consisting of saline diuresis combined with the use of furosemide, corticosteroids, and phosphate binders is recommended. Calcitonin or pamidronate may be needed for animals with hypocalcemia or hypercalcemia.
- If serum calcium levels are elevated, treatment with Calcitonin is effective in reducing calcium to normal levels. Continue treatment as needed. If the calcium level returns to normal, treatment may be discontinued.
- Other ingrediens: 99.925%
- Cholecalciferol (CAS #67-97-0): 0.075%

**TOTAL:** 100.000%
