If ingested, administer Vitamin K1, intramuscularly or orally as center or doctor.

Establish permanent bait stations and replenish as needed. Source of rodent food, water, and harborage as much as possible. If reinfestation dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit rats and mice:

- Needed at points of very high mouse activity. Maintain an uninterrupted supply of location. Space placements at 8- to 12-foot intervals. Two 1-ounce pieces may be expected to kill more than two to eight rats. Maintain an uninterrupted rain or snow. Remove as much alternative food as possible.

- Generally, these are along walls, by gnawed surface or in grass or other ground cover. Do not place bait in areas where there is a possibility of contaminating food or structures. This product is especially suited for use in wet or damp areas, including around homes, industrial and agricultural buildings, and similar man-made open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or be secured or otherwise immobilized. Even stronger bait stations are needed in areas and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized.

- Resistant to destruction by dogs and by children under six years of age, and must be non-target wildlife, or in tamper-resistant bait stations. These stations must be used in a manner that prevents such children from reaching into bait compartments.

- This product is toxic to mammals and birds. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. This product is toxic to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

- Keep away from humans, domestic animals and pets. If swallowed, this can be very dangerous or fatal. If you think you have swallowed this product:

- Get medical help right away. Do not induce vomiting unless told to do so by a doctor.

- Keep this product out of the reach of children.

- Do not expose children, pets, or other non-target animals to precautions.

- IMPORTANT:

- Do not apply this product directly to ground water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

- Do not contaminate water, food or feed by storage or disposal.

- Handled with care, this product is effective against most of the following arthropods:

- Rodents
- Insects
- Arachnids
- Other pests
