Clothing. Causes eye (and skin) irritation. Necessary to wipe the sprayed surface. Microban Disinfectant Spray Plus should not stain those materials not stained by water. Microban • MILDEWCIDE • BACTERICIDE • FUNGICIDE

ENGINEERING CONTROLS: During use only, ventilation of an exhaust or using a negative air machine equipped with HEPA filter. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

PERSONAL PROTECTION EQUIPMENT REQUIREMENTS FOR HANDLERS:

All handlers must wear protective eyewear, long pants, long-sleeved shirts and chemical resistant gloves, and chemical resistant goggles. In addition, the ductwork must be ventilated with an airflow of approximately 50 CFM per square foot of duct cross section.

FIRST AID:

1. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

2. IF ON SKIN OR CLOTHING:
   - Rinse slowly and gently with water for 15-20 minutes. Remove clothing if it is possible to do so without further skin exposure. Call a poison control center or doctor if needed.

3. IF SWALLOWED:
   - Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus should be applied with hand or power sprayers with a properly functioning atomizing nozzle, foggers, automated metering systems or gravity drop dispensers as an aerosol. Use in drafty areas will diminish the effectiveness of the product. Avoid over-application. Do not house animals in heated areas until thoroughly dry and free from odors.

- For use on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, locker rooms, telephones, door knobs, furniture and empty containerized storage units. For athletes foot fungus on floors, shower stalls, rest rooms.
- For use on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, locker rooms, telephones, door knobs, furniture and empty containerized storage units. For athletes foot fungus on floors, shower stalls, rest rooms.
- For use as a bacteriostat, fungistat and deodorizing agent on carpeting found in schools, hotels, motels, restaurants, movie theaters, bowling alleys, public and private grade and high schools, office buildings, banks, churches, hospitals, motels, theaters, homes, shelters and commercial, industrial and public buildings.

Storage:

- Keep from freezing. Store in ventilated areas. Store in a cool, dry area. Keep from freezing or excess heat. Disposal of container(s):

   - Consult state, local and federal authorities for disposal instructions. If不慎接触皮肤或衣物，应立即以大量清水冲洗眼睛15至20分钟。移除接触镜片（如适用）后，继续冲洗。必要时，请致电中毒控制中心或医生寻求治疗建议。让病人喝一杯水如果能吞咽。不要诱导呕吐，除非得到中毒控制中心或医生的指示。不要给无法吞咽的病人喂食任何东西。

   - 如果误服：将病人移到空气流通处。如果病人没有呼吸，请立刻呼叫救护车，并进行人工呼吸，如有可能则使用口对口人工呼吸。必要时，请致电中毒控制中心或医生寻求治疗建议。让病人喝一杯水如果能吞咽。不要诱导呕吐，除非得到中毒控制中心或医生的指示。不要给无法吞咽的病人喂食任何东西。

   - 如果接触皮肤或衣物：慢慢而温柔地用大量清水冲洗15至20分钟。除去衣物（如可能）。必要时，请致电中毒控制中心或医生寻求治疗建议。

   - 如果误服：将病人移到空气流通处。如果病人没有呼吸，请立刻呼叫救护车，并进行人工呼吸，如有可能则使用口对口人工呼吸。必要时，请致电中毒控制中心或医生寻求治疗建议。让病人喝一杯水如果能吞咽。不要诱导呕吐，除非得到中毒控制中心或医生的指示。不要给无法吞咽的病人喂食任何东西。

DIRECTIONS FOR USE

- General Method of Application

Surfaces and objects must be cleaned of gross dirt with suitable detergent before treatment. Spray surfaces and articles until thoroughly wet, use as a deodorizing agent on carpeting found in schools, hotels, motels, restaurants, movie theaters, bowling alleys, public and private grade and high schools, office buildings, banks, churches, hospitals, motels, theaters, homes, shelters and commercial, industrial and public buildings.

For use on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, locker rooms, telephones, door knobs, furniture and empty containerized storage units. For athletes foot fungus on floors, shower stalls, rest rooms.

- For use as a bacteriostat, fungistat and deodorizing agent on carpeting found in schools, hotels, motels, restaurants, movie theaters, bowling alleys, public and private grade and high schools, office buildings, banks, churches, hospitals, motels, theaters, homes, shelters and commercial, industrial and public buildings.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING: Harmful if swallowed (inhaled or absorbed through the skin). Do not breathe vapors (dust or spray mist). Do not get in eyes, on skin, or on clothing. Caution: Can irritate skin and eyes.

GENERAL METHOD OF APPLICATION
Surfaces and objects must be cleaned of gross dirt with suitable detergent before treatment. Spray surfaces and articles until thoroughly wet, using a suitable atomizer or sprayer. Spray all surfaces until moisture soaks through to the material below. Let stand for 5 minutes. Repeat applications as needed. Be sure to follow directions for use on package. For maximum contact, allow to dry for 15 minutes. For fogging and other large volume applications use appropriate spraying equipment.

For use on hard non-porous surfaces such as floors, surfaces and articles until thoroughly wet, using a suitable atomizer or sprayer. Spray all surfaces until moisture soaks through to the material below. Let stand for 5 minutes. Repeat applications as needed. Be sure to follow directions for use on package. For maximum contact, allow to dry for 15 minutes.

STORAGE AND DISPOSAL
Storage: Keep from freezing. Store in ventilated areas. Do not contaminate water, food or feed by storage and disposal. Dispose of container and unused product in a safe manner following the disposal instructions on the container label. Do not dispose of in a drain or sewer. Do not burn. Disposal must comply with federal, state, and local regulations.

Container Disposal: Non-hazardous container. (Do not reuse or refill container. Keep out of reach of children.) Place empty container in appropriate disposal container. Place used container in a special waste container, or in a suitable waste disposal container approved for this product.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Harmful if inhaled (inhaled or absorbed through the skin). Do not inhale vapors or spray. Do not get in eyes, on skin, or in the clothing. Causes skin and eye irritation.

FOR AIR DUCT USAGE:

SPECIAL INSTRUCTIONS FOR APPLICATORS:

Applicators treating the inside of an air duct system with this product must wear chemical resistant coveralls, chemical resistant gloves, and a self contained breathing apparatus (SCBA) or approved airline respirator with escape. An air duct system must be isolated from the building atmosphere and use of adequate respirator protection. If the level of contamination cannot be determined, then maximum respiratory protection (SCBA or airline with an escape) shall be used.

PERSONAL PROTECTION EQUIPMENT REQUIREMENTS FOR HANDLERS:

All handlers must wear protective eyewear, long pants, long-sleeved shirts and chemical resistant gloves.

FIRST AID:

IF INHALED: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a Poison Control Center or doctor immediately for treatment advice.

IF SWALLOWED:

Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able and conscious. Do not induce vomiting unless told to do so by a poison control center or doctor.

IF SKIN OR EYES CONTACTED:

Wash thoroughly with water and mild soap. If irritation persists, call a Poison Control Center or doctor immediately for treatment advice.

If any of the above first aid advice does not apply, the first aid advice from the product label should be followed.

TO DISINFECT AIR DUCTS, POULTRY HOUSES, ANIMAL PENS AND VEHICLES

Remove all animals and feed from premises, vehicles and enclosures. Remove all filter and mesh from floors, walls and surfaces of barns, pens, stalls, and other facilities and fixtures occupied or traversed by animals. Sprays and sprays and powders containing Microban are effective against mold, mildew, fungus, and odors caused by bacteria. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate all surfaces with the recommended disinfecting solution.

For cleanup operation in areas such as attics, wall voids, basements, areas above suspended ceilings and similar inaccessible spaces in buildings.

Spray avian, rodent and other animal and human wastes and carcasses as directed above, prior to removal and disposal. Treat spaces and surfaces as specified in method of application. For use on contact with meat, milk, eggs, and other food products, hand washing is required. For thorough cleaning and disinfection as directed in the general method of application:

GENERAL METHOD OF APPLICATION

Surfaces and objects must be cleaned of gross dirt with suitable detergent before treatment. Spray surfaces and articles until thoroughly wet, use coupon rate application for spaces and areas of 100.0% coverage. Thoroughly clean all surfaces with soap or detergent and rinse with water. For use on non-porous hard non-porous surfaces such as tile, porcelain, floors, countertops, sinks, bathtubs, shower enclosures, faucets, toilet seats, locker rooms, telephones, door knobs, furniture and empty containerized storage units. For athletes’ foot fungus on floors, shower stalls, mold, and mildew, and odors caused by bacteria. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Mold & Mildew, and Odors Caused by Bacteria.

DIRECTIONS FOR USE ON AIR DUCTS ARE CONTAINED IN THE ATTACHED BOOKLET AND MUST BE FOLLOWED CAREFULLY.

Storage: Keep from freezing. Store in ventilated areas. Do not contaminate water, feed or feed by storage and disposal. Dispose in inrefillable container. Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent). Then offer for recycling, if available or dispose of in a manner consistent with Federal, State, and local regulations.

Container Disposal: Nonrefillable container. Do not mix or replace with other ingredients. The product is not harmful to wildlife or aquatic life even when used according to directions. The product is not harmful to beneficial insects and is not expected to be detrimental to nontarget species. See other precautions on side panel.

© 2017 PRORESTORE® PRODUCTS 1702 L1 REV B
PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Harmful if swallowed (inhale or absorbed through the skin). Do not breathe vapors (dust or spray mist). Do not get in eyes, on skin, or on clothing. Causes eye and skin irritation.

FOR AIR DUCT USAGE:

PERSONAL PROTECTION EQUIPMENT REQUIREMENTS FOR HANDLERS: All handlers must wear protective eyewear, long pants, long-sleeved shirts and chemical resistant gloves.

SPECIAL INSTRUCTIONS FOR APPLICATORS: Applicators treating the inside of an air duct system with this product must wear chemical resistant coveralls, chemical resistant gloves, and chemical resistant goggles. In addition, the ductwork must be ventilated with an airflow of approximately 50 CFM per square foot of duct cross section. If this is not possible, OSHA confined space regulations must be followed and the requirements for a permit required space apply. These requirements include testing the atmosphere and use of adequate respirator protection. If the level of contamination cannot be determined, then maximum respiratory protection (SCBA or respirator) must be used. If needed, the full-face respirator should also be equipped with a spray mist pre-filter in addition to the charcoal filters.

ENGINEERING CONTROLS: During UV, mist or spray application, the duct system interior must be maintained under slight negative pressure (0.015 to 0.025 in. W.G) with an outdoor exhaust or using a negative air machine equipped with HEPA filter. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

STORAGE AND DISPOSAL

Storage: Keep from freezing. Store in ventilated areas. Do not contaminate water, food or feed by storage and disposal. Dispose leftovers in landfill approved for pesticides.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) Then. Offer for recycling, if available or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

GENERAL METHOD OF APPLICATION

Surfaces and objects must be cleaned of gross filth with suitable detergent before treatment. Spray surfaces and articles until thoroughly wet, use enough so that treated surfaces and objects remain wet for at least 10 minutes. May be applied with a sponge to impervious covers and surfaces, allowing to dry for 10 minutes. For fogging and other large volume applications use appropriate spraying equipment, protective clothing, gloves and respirator. Heavily treated spaces should be adequately ventilated and not re-entered for at least one hour after treatment.

AS A MILDEWCIDE, FUNGICIDE, BROAD SPECTRUM DISINFECTANT AND VIRUCIDE*: (Kills influenza virus). In lobbies, hallways, washrooms, mop rooms, and veterinary clinics; in schools, hotels, motels, restaurants, offices, homes and industrial buildings.

For use on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, locker rooms, telephones, doors, knobs, furniture and empty containerized storage units. For athletes foot fungus on floors, showers, stalls, rest rooms. Follow method of application specified above.

AS A BACTERIOSTAT, FUNGISTAT AND DEODORIZING AGENT

Apply Microban Disinfectant Spray Plus as directed to floors, walls, ceilings that have been damaged by smoke, fire, floods and sewage backups. For cleanup operations in areas such as attics, wall voids, basements, areas above suspended ceilings and similar inaccessible spaces in buildings. Spray equipment, rood and other animal and human wastes and carcasses as directed above, prior to removal and disposal. Treat spaces and surfaces as specified in method of application. For use as a bacteriostat, fungistat and deodorizing agent on carpeting found in schools, hotels, motels, homes, shelters and commercial, industrial and public buildings. After a flood or water damage, vacuum or extract as much water as possible before application. Apply full strength with sprayer until moist to carpet nap or rake or brush in. To treat the backing and padding, a loquor is recommended. Allow to remain until dry. For best results carpets should be cleaned before application.

TO DISINFECT FARM PREMISES, POULTRY HOUSES, ANIMAL PEN S AND VEHICLES

Remove all animals and feed from premises, vehicles and enclosures. Remove all litter and manure from floors, walls and surfaces of barroo, pens, stulls, chutes and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Sanitize all surfaces with the recommended disinfecting solution for a period of ten minutes. Immense all halliers, ropes and other types of equipment used in handling and restraining animals, as well as links, chains and straps used for removing litter and manure. Ventilate buildings, cars, barns and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed, set or dried. Thoroughly scrub all treated feed racks, mangers, troughs, automatic feeders, feeders and watering vessels with soap or detergent and rinse with potable water before re-use. Apply Microban Disinfectant Spray Plus full strength as directed in the general method of application until thoroughly wet. Allow all surfaces to dry thoroughly, ventilate enclosed spaces adequately. Do not house animals in treated areas until thoroughly dry and free from odors.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drop dispensers as a broad spectrum, mild and mildewicide, fungicide and deodorizing agent to previously cleaned surfaces. Spray areas until thoroughly moist, giving special attention to cracks and crevices. Allow 10 to 20 minutes for drying. It is not necessary to wipe the sprayed surface. Microban Disinfectant Spray Plus should not stain those materials not stained by water. Microban Disinfectant Spray Plus when used as directed is effective in decreasing bedding, mattresses, textiles, drapes, upholstered furniture, rugs, carpets and in storage areas to control mold, mildew, fungus and odors whenever they are a problem.

USE DIRECTIONS FOR AIR DUCTS: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. THE PERSON APPLYING THIS PRODUCT IS RESPONSIBLE FOR FOLLOWING THESE DIRECTIONS UNDER BOTH STATE AND FEDERAL LAWS.

1.8 General. Microban Disinfectant Spray Plus is designed to be used as one component of a comprehensive HVAC and duct maintenance program. The purpose of such a program is to assure that the HVAC system and duct functions in the manner they were designed to, remain free from mold and other microbial growth and other contamination, and continue in that condition. This product must only be used in those cases where visible microbial growth has been detected in the system and then only after removing that growth and identifying and correcting the conditions that lead to that growth. If you need help in understanding any part of these instructions or have additional questions after reading these instructions, DO NOT APPLY THIS PRODUCT until you have received the answers for all of your questions.

2.0 Inspection. Prior to inspecting, cleaning, treating, repairing or otherwise working on a duct section, the HVAC system should be turned off or the section under repair physically isolated from sections in active use.

Prior to any application of Microban Disinfectant Spray Plus the system must be inspected for cleanliness and mechanical condition. When initiating any measures to repair, clean or treat ducts and associated HVAC system components, industry standards from the National Air Duct Cleaners Association (NADCA) and other organizations must be followed. NADCA standards should be used as the standard for cleaning by visual means. The NADCA Standard, Assessment, Cleaning and Restoration of HVAC Systems (ACR 2002 or the latest revision), provides minimum recommended inspection frequency schedules for ducts and other system components. More information on NADCA standards can be obtained from the NADCA web site at www.nadca.com.

2.1 Cleanliness Inspection. According to NADCA Standards, HVAC system cleaning must be performed when any of the following conditions are found in the cleanliness inspection. If any of these deficiencies are found during cleaning, in cleaning with industry standards must be performed prior to the application of MICROBAN DISINFECTANT SPRAY PLUS.

2.1.1 Contamination. HVAC systems should be operated in a clean condition. If significant accumulations of contaminants or debris are visually observed within the HVAC system, then cleaning is necessary. Likewise, if evidence of microbial growth is visually observed or confirmed by analytical methods, then cleaning is required.

• If the HVAC system discharges visible particulate into the occupied space, or a significant contribution of airborne particles from the HVAC system into the indoor ambient air is confirmed, then cleaning is necessary.

Continued on other side.
3.0 General Directions for MICROBAN DISINFECTANT SPRAY PLUS Usage. MICROBAN DISINFECTANT SPRAY PLUS effectively controls by inhibiting growth of odor causing bacteria, fungi, and other odor, stain or damage causing organisms in air ducts in residential, commercial, institutional, and industrial buildings. MICROBAN DISINFECTANT SPRAY PLUS also eliminates odors associated with bacteria, mold, mildew, smoke, animals, cooking, spoilage, musty and other odors and removes odor-causing organisms when used as a part of the preventive maintenance program in air ducts and other HVAC system components.

MICROBAN DISINFECTANT SPRAY PLUS is a bacteriostat, fungistat (mold and mildew), mildewstat and deodorizer for use in residential, commercial and industrial settings. It will not stain or bleach materials or fabrics and will not harm or damage HVAC system components.

MICROBAN DISINFECTANT SPRAY PLUS is formulated for use in all types of air duct and HVAC components including:

- Unlined sheet metal
- Air supply and return ducts and plenums fabricated with plywood, OSB or other wood like material
- Flexible air ducts fabricated of metal or plastic
- Air distribution components such as air handlers, mixing boxes, transfer boxes, transitions, turning vanes, damper boxes and associated components
- Coordinate drain pans

Follow the directions below for the specific type of duct or component being treated. It is vital that the following directions be carefully read and understood prior to using the product. If you have any questions, need further information, require clarification, or do not understand any of the directions, call ProRestore® Products at 800-332-6037 prior to use.

3.1 Application Instructions. Sprays area up to 1,000 square feet per gallon. Allow ten to twenty minutes for drying. It is not necessary to wipe the sprayed surface. MICROBAN DISINFECTANT SPRAY PLUS does not stain those materials not stained by water.

3.2 Application Equipment and Devices. Refer to the procedural statements for the Personal Protective Clothing and other special instructions that must be followed.

3.2.1 Brush, Mop or Wipe Application. Brush, Mop or Wipe Application may be specified by some facility maintenance or remediation plans. These techniques are generally more labor intensive than other methods and are normally used only when specifications require. These methods are suitable for the most uniform smooth surfaces. Do not use on porous or non-uniform surfaces. If in doubt about a given surface, contact ProRestore® Products at 800-332-6037 before proceeding. When using brush or mop application, tools and materials used should be reserved only for application of MICROBAN DISINFECTANT SPRAY PLUS, kept clean and protected from dust, and properly disposed of in the appropriate waste receptacle.

3.2.2 Air Sprayer Application. Sprayers are preferred on large surfaces that are easily accessible (such as in long runs of large diameter ducts, duct assemblies, fans and their housings and other HVAC components). Micro-particle sprayers are powered medium pressure sprayers. They can be used for spraying MICROBAN DISINFECTANT SPRAY PLUS to protect HVAC system components and the ducts themselves.

3.3 Application Techniques. Application techniques are as follows:

3.3.1 Brush, Mop or Wipe Application. For Brush, Mop or Wipe Application, start at the point of entry into the duct, work in one direction and overlap applications to assure complete coverage. Cover completely for full coverage spraying from side to side then repeat the application moving the spray from top to bottom.

3.3.2 Air Sprayer Application. Micro-particle sprayers provide a consistent fine (1-300 micron) particle size and uniform spray pattern. Powered medium pressure sprayers are preferred. However, airless sprayers are suitable.

When using airless sprayers, the most satisfactory spray pattern will be achieved using a 0.011” spray tip. For other brands and options contact ProRestore® Products at 800-332-6037.

3.4 Rate of Application. The recommended rate of application for MICROBAN DISINFECTANT SPRAY PLUS varies depending on the surface being treated. Users of this product must carefully follow the rate of application instructions provided below.

3.4.1 Bare Metal and Flexible Ducts. Apply until surface is evenly wet. Mist or wipe coverage 1,000 ft2 per gallon. Spray coverage 500 ft2 per gallon. If the above application rates result in surface runoff or liquid pooling on the bottom of the duct, lower the application rate until the surface is thoroughly and evenly wet without runoff or pooling. The exception to this is when treating coil assemblies. In this case, the spray should be applied generously until there is runoff into the drain pan so as to permit the coil assembly to drain properly.

3.4.2 Semi Porous Surfaces such as Concrete or Plaster. Apply until surface is evenly wet. Mist coverage 500 ft2 per gallon. Wipe not recommended. Spray coverage 250 ft2 per gallon. MICROBAN DISINFECTANT SPRAY PLUS must penetrate into surface crevices and irregularities or it will not be effective. Inspect and assure that penetration is satisfactory. This may be helpful to apply half of the quantity needed for full coverage spraying from side to side then repeat the application moving the spray from top to bottom.

3.5 Frequency of Application. Normally, intermittent application (6 months to every two years) will provide effective control. Do not apply more often than monthly and then only if there is evidence of re-growth. This product must only be used in those cases where visible microbial growth has been detected in the system and then only after removing that growth and identifying and correcting the conditions that led to that growth. Prior to reapplication in such cases, inspect and determine the cause of re-growth and correct that problem prior to re-application. Before embarking on a program of frequent application (more often than six months) contact ProRestore® Products at 800-332-6037 and discuss the specific application and situation. Also make sure the reoccurrence of microbial growth does not have another cause such as persistently high humidity, standing water or hidden leaks. Prior to reapplication, the interior of the ducts and other surfaces must be inspected and found to be free of accumulated soil. If soil or growth is found, the cause should be determined and corrected and then the ducts cleaned in accordance with accepted industry standards.

If microbial growth persists following application re-inspect for duct leaks, corroder of water from cooling coils or humidifiers and other sources of moisture-promoting growth. Eliminate such sources of moisture before re-treating.

3.6 Returning the System to Operation following Application. Fans and blowers in the section of duct being treated must be turned off during application of MICROBAN DISINFECTANT SPRAY PLUS. If the system cannot be shut down, the section of duct being treated must be isolated until treatment is complete. This will prevent the spray of fog from being blown away from the surface that is being treated. Do not attempt to use the system fan or blower to carry MICROBAN DISINFECTANT SPRAY PLUS to the surfaces in the air duct system. Such a practice will not result in uniform application of the product to the surfaces being treated and will lead to ineffective control. A separate system must be used.

The system can be returned to full operation as soon as treatment is completed or at any time following completion of treatment. MICROBAN DISINFECTANT SPRAY PLUS will dry on surfaces within 15 minutes following application. Extended drying time does not have an effect on effectiveness of treatment. MICROBAN DISINFECTANT SPRAY PLUS should not be applied to following application so it will continue to inhibit the growth of microorganisms on treated surfaces.

When the above directions are followed properly, there will not be significant concentrations of MICROBAN DISINFECTANT SPRAY PLUS released to the spaces served by a system being treated. It is recommended that affected areas of the building be occupied during treatment.
