For control of insect and mite pests on vegetables, fruits, tobacco, and other food crops.

PFR-97™ 20% WDG MICROBIAL INSECTICIDE

ACTIVE INGREDIENT
Isaria fumosorosea (strain B-2007)...

Pesticide Injection Pipeline:
- Must contain a functional, automatic, quick-closing check valve, diaphragm pump, or the functional equivalent.
- Must have an interlock that triggers the irrigation system when the pesticide injection pipeline is connected to the irrigation apparatus.
- Must be designed and constructed to prevent the backflow of water into the pesticide injection pipeline when the irrigation system is either automatically or manually shut down.

Personal Protective Equipment:
- Must be worn by applicators and other handlers.
- Must include gloves, goggles, and other appropriate protective clothing.

Mixing and Application Instructions*:
- Mix the required amount of product in clean water and agitate the spray mix for 20-30 minutes before application.
- Apply to the treated area using positive pressure equipment, such as a backpack sprayer or other appropriate equipment.
- Use volumes that thoroughly wet the soil but that do not cause runoff.

Storage and Disposal:
- Do not store near food or feed. Keep in a cool, dry, well-ventilated area.

First Aid:
- In case of eye contact, flush眼睛 to the nearest public water supply. If not available, flush with clean water for 15 minutes. Call a poison control center or doctor for treatment advice.
- In case of skin contact, wash with soap and water. If not available, wash with clean water for 15 minutes. Call a poison control center or doctor for treatment advice.
- In case of ingestion, do not induce vomiting unless instructed to do so by a poison control center. Call a poison control center or doctor for treatment advice.

CAUTION:
- Do not contaminate water, food, or feed by storage or disposal. Wash hands after handling.
